THE INSIGHT

A NEWSLETTER INITIATIVE FROM IDEA

JAN - FEB 2025 EDITION

EDITOR'S NOTE

Welcome to the Industrial Engineering and Management Department Newsletter! This newsletter is designed to keep our department community informed, engaged, and connected. Each issue will bring you the latest updates on department events, curriculum enhancements, research breakthroughs, and student and faculty achievements that highlight the depth of talent within our department.

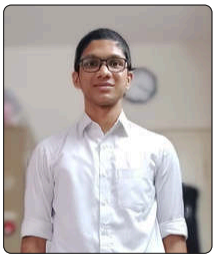

We aim to foster a strong sense of community by sharing social events, collaborative opportunities, and networking platforms to engage with fellow students, faculty, and alumni. Additionally, this newsletter will serve as a career development hub, offering insights into internship opportunities, job listings, industry trends, and professional growth resources tailored to the ever-evolving field of industrial engineering and management.

Furthermore, we will highlight academic and extracurricular pursuits including activities of student clubs, technical societies, hackathons, and competitions, encouraging active participation in both. Whether you're looking for opportunities to enhance your skills, collaborate on groundbreaking projects, or stay updated with the latest research and industry advancements, this newsletter is your go-to source.

Stay connected, stay inspired, and join us as we celebrate the achievements, innovations, and opportunities that shape the future of industrial engineering!

ACHIEVEMENTS

MANOGYNA

Attending the IUCEE Annual Student Forum (IASF) 2025 was a transformative experience, feeling proud to represent my institution and receiving the Best Student Chapter Award. The event featured insightful workshops on Industry 4.0 technologies, strengthening industry-institute collaboration, and promoting Social-Emotional Learning (SEL).

The team also participated in the IoT Competition organized by Innovians Technologies at Technex'25, IIT Varanasi, on March 2, 2025. Their project, "Smart Home Automation Using RFID and Solar PV," was selected after winning the zonal round held at RVCE's EEE department. Technex'25 was an inspiring event, showcasing groundbreaking innovations making it an unforgettable experience.

NINGRAJU M. | SRIRAM HEGDE

Our team Equilibrium secured 1st place in Case Alchemy, the ultimate chemical engineering business case competition hosted by AlCHeMISTa, BITS-Pilani Goa. Competing against top teams, we tackled real-world industrial challenges with innovative problem-solving, strategic thinking, and technical expertise. Our solution's depth, practicality, and impact earned us the championship title and a certificate of excellence. This achievement is a testament to our team's dedication, collaboration, and ability to bridge the gap between engineering and business. We are proud to have represented our skills on such a prestigious platform and look forward to applying our expertise to future challenges.

DHEERAJ ARADHYA M

In a moment of great honor and recognition, Dheeraj Aradhya N, a NCC cadet, was commended by the Deputy Director General (DDG) of NCC for commitment, discipline, and service.

The recognition highlights the cadet's active participation in various NCC initiatives, training programs, and national-level activities, embodying the core values of discipline, perseverance, and patriotism.

Such achievements serve as an inspiration to fellow cadets, reinforcing the importance of dedication and service in NCC. This commendation is not just an individual milestone but a proud moment for the entire unit, showcasing the high standards of excellence upheld by its members.

ABHISHEK | ESHWAR R | BHOOMIKA GOPAL H

When Abhishek and his team noticed hesitancy among blood donors at a college camp, they saw an opportunity for change. Through design thinking principles, they sought to understand user concerns and create a better experience.

With the guidance of mentors Bhaskar Sir and Rajeswara Rao Sir, their idea took shape, leading them to the IASF Hyderabad stage. Despite challenges, the journey was immensely rewarding. Committed to healthcare innovation, they aim to transform lives and processes for the better.

SRIVIDYA | YUKTA | RISHIKESH

Srividya, Yukta, Rishikesh, and Shrirang Pai (ETE) participated in the college-level Hult Prize Challenge, organized by Ecell RVCE, showcasing their entrepreneurial spirit and innovation. Their business idea focused on a bio-coating from bacteria to extend the shelf life of fruits and vegetables in a sustainable and eco-friendly way.

Aiming to reduce food wastage and offer a natural alternative to chemical preservatives, their idea stood out for its practicality and impact.

DISHA AGARWAL

Our women's football team, the first-ever in RVCE's history, triumphed in the CMRIT tournament, marking a milestone achievement. We secured the championship, showcasing our passion and resilience. This victory not only set a precedent for future teams but also strengthened women's football at RVCE. Our journey was fueled by countless hours of training, unwavering determination, and a shared vision of success. This win is not just a trophy but a symbol of empowerment, inspiring future generations of women athletes at RVCE to break barriers and chase their dreams.

HEMAVATHI A

Demonstrating exceptional skill and precision, Hemavathi A, a 3rd-year student from the Industrial Engineering and Management (IEM) department, secured 2nd place in the Indian Women Category (30m) at the VTU State-Level Archery Championship. The event was held at SKSVMACET, Lakshmeshwar, on 22 July 2024, where she showcased her unwavering focus and dedication. Competing against skilled archers from various institutions, she displayed outstanding technique and resilience, proving her caliber in the highly competitive event. Her remarkable achievement brings pride to the IEM department and the institution as a whole.

PAPER PUBLICATIONS

GOHITHA MAHESHWARI J | INCHARA N ARADHYA | SHANKARAMMA

The paper "Digitalization of Lean Tools and Techniques: Enhancing Efficiency and Quality in Modern Industries" by Gohitha Maheshwari J, Inchara N Aradhya, and Shankaramma explores how Industry 4.0 technologies like IoT and big data enhance traditional lean methods. By automating tasks and providing real-time monitoring, digitalization improves efficiency and reduces human error in manufacturing, leading to higher productivity and quality.

The study highlights how integrating digital tools with lean techniques streamlines processes and reduces waste. The authors discuss various lean methodologies, such as 5S and Just-in-Time (JIT), and how digitalization enhances their effectiveness.

SIDDHANTH N KAGGANTY | TULASI RAM K NAIK | INCHARA N ARADHYA | NISHAANTH S

The paper "Stochastic Profit Optimization in Agile Supply Chains Using Monte Carlo Simulations and Markov Decision Processes," presented at an IEEE conference, addresses profit maximization in agile supply chains under uncertainty. Authored by Siddhanth N Kagganty, Tulasi Ram K Naik, Inchara N Aradhya, Nishaanth S, Nivya Muchikel, and Y Sailaja from R.V. College of Engineering, Bengaluru, the study proposes a model that integrates Monte Carlo simulations and Markov Decision Processes to optimize decision-making in uncertain supply chain environments.

This approach allows for the evaluation of various scenarios, aiding in the development of strategies that enhance profitability and resilience in supply chains.

SHIKSHA PANDEY | ANVITHA R | SATVIK PALIWAL | SHAURYA KESARWANI

We are thrilled to be the runner-up at the IASF Design Thinking Competition in Hyderabad on 8th January 2025! Our project, Caffeine Trap, focused on reducing caffeine consumption and promoting a balanced diet. The competition challenged us to think creatively and refine our problem-solving skills. Competing with incredible teams, we learned the value of collaboration, adaptability, and user-centric design. A huge thank you to our mentors, teammates, and organizers for this unforgettable opportunity!Grateful for this experience, we look forward to applying these insights in future projects!

Sohilsab and Ujjwal Bhattacharya of VII sem IEM represented our college at the TATA innoVent event during Jan 2025. Their project title was "AI and Blockchain for Next-Gen Quality Management (Gunavatta)".

INDUSTRY VISITS

FANUC India

The students of 3rd and 7th semesters visited the FANUC industry located near electronic city. FANUC is a Japanese group of companies which provides automation products and services such as robotics and CNC wireless systems. This visit was organised by the faculty of Industrial Engineering and Management Department in order to give the students a better outlook of what types of high tech machinery are currently being used in many industries across the world. The students were able to freely communicate with the employees at FANUC, thus giving them an opportunity to enhance their technical knowledge. Students were also given an opportunity to interact with robotic simulation software to understand the principles of robotic motion, path planning, and control. This also aided them to develop awareness about the impact of industry 4.0 used in modern manufacturing. There were also many other smaller companies/suppliers who had set up exhibits of their products thus giving students a chance to establish contacts by interacting with the curators. This gives the students an opportunity to further their knowledge in any fields that might interest them, thus giving them insights of the real world. This visit was extremely beneficial as it helped the students develop the necessary skills in order to excel in the evolving field of automation and robotics. It also fosters creativity giving high exposure to students, making sure they are enlightened adequately that can keep them on sight.

Carl Zeiss India Bangalore Pvt Ltd

An industrial visit to Carl Zeiss, located in Bommasandra, Bengaluru on January 24, was organized by ISQ and Department of Industrial Engineering and Management as part of Quality 4.0 Conference, to provide practical exposure and knowledge-sharing opportunities with industry experts in the fields of quality, precision, and product measurement. ZEISS is an internationally leading technology enterprise operating in the optics and optoelectronics industries. The experts present at the facility provided in-depth insights into the assembly of Coordinate Measuring Machines (CMM) and the IQS Assembly, explaining the purpose of various machines and their applications in measurement and precision to ensure the production of high-quality products. This visit gave the students an opportunity to observe the integration of advanced digital measurement tools such as Coordinate Measuring Machines (CMM).

Optical measurement devices, and digital calipers in quality control. The company employees provided an overview of the company's global presence, with locations in Minneapolis (USA), Oberkochen (Germany), Bengaluru (India), and Shanghai (China). Working of many instruments, some of which included touching probe technology and high tech machinery such as Prismo Ultra Machine and ATOS Machine, were all demonstrated by the experts.

The industrial visit to Carl Zeiss aided as an invaluable learning experience, offering practical exposure to the operations, quality control, and precision measurement techniques employed in the company.

SANSERA ENGINEERING LIMITED

An industrial visit to Sansera Engineering Limited, Bidadi, was organized by ISQ and department of Industrial Engineering and Management as part of Quality 4.0 Conference on January 24th, 2025 to provide the students with practical exposure to manufacturing processes, quality control techniques, and industry operations. Sansera Engineering Limited is a leading precision component manufacturing company catering to the automotive and aerospace sectors. The visit aimed to enhance students' understanding of modern industrial practices, automation, and quality assurance techniques employed in high-end manufacturing facilities.

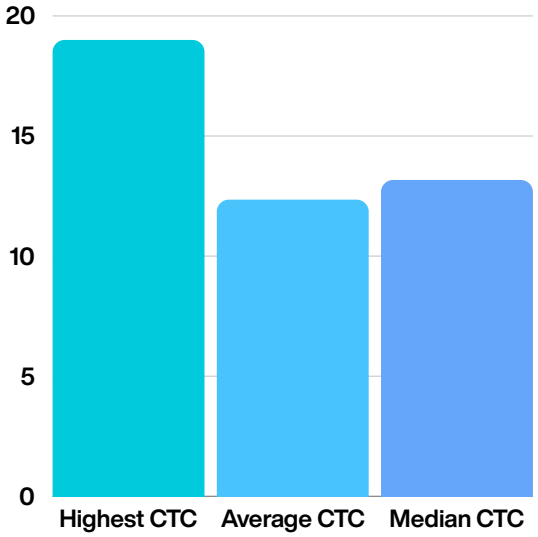

The students were able to understand the manufacturing processes involved in producing precision-engineered components and also gained insights about the applications of automation and Industry 4.0 practices in modern manufacturing. They could also observe quality control measures and lean manufacturing techniques implemented in the industry. Industry professionals provided valuable insights into the challenges and advancements in precision manufacturing. Discussions included topics such as supply chain management, cost optimization, and emerging trends in manufacturing technology. Experts emphasized the growing importance of automation, artificial intelligence, and sustainability in modern industries. Students had the opportunity to ask questions about career paths, necessary technical skills, and the role of mechanical engineers in advanced manufacturing.

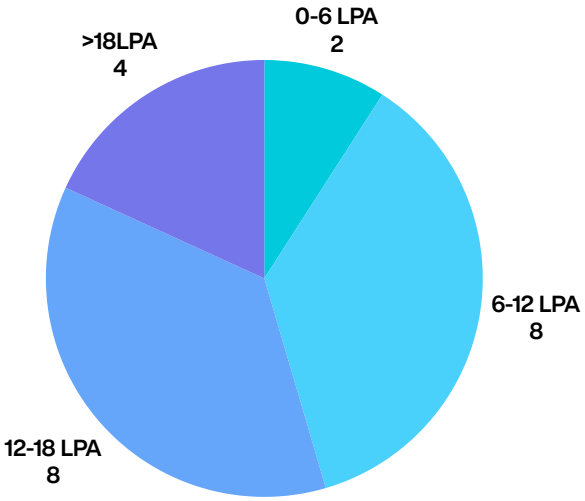

The visit was highly informative and provided students with a deeper understanding of the industrial environment. It reinforced the importance of automation, quality control, and lean manufacturing in modern industries

FACULTY ACHIEVEMENTS

Dr. Rajeswara Rao K V S and Dr. N S Narahari chaired a session at the Symposium on Digital Transformation through Quality 4.0 organised by Indian Society for Quality at RV College of Engineering during 23rd-24th January 2025.

Dr. Vivekanand S Gogi judged an event "Exuberance" conducted by E cell on 17th January 2025

Dr Ramaa A. received the IUCEE honorary membership award at ICTIEE -2025 held at VNRVJIET, Hyderabad during 8 to 10 January 2025 for her outstanding contributions at Teaching Learning Center.

Dr Ramaa A, was the session chair at ICTIEE -2025 conducted by IUCEE in collaboration with VNRVJIET, Hyderabad during 8-10th January 2025

Dr. K N Subramanya was the Chief Guest at the valedictory function of ICTIEE-2025 conducted by IUCEE in collaboration with VNRVJIET, Hyderabad during 8-10th January 2025

Prof Bhaskar M G mentored two batches which won "Design Thinking" competition at IASF organised by IUCEE in collaboration with VNRVJIET, Hyderabad during 8-10th January 2025.

Prof. Bhaskar M G organized a quizzing competition for students and faculty on January 2025 at the newly built state of the art Library at RVCE campus.

Workshops / Seminars Conference / Events Organized:

Sl. No.	Details of workshop / seminar / conference / events	Date of the Event	No. of Students	No. of Faculty	Industry	Organized by
1.	Two days symposium on "Digital transformation through Quality 4.0" (Staff Co-ordinator: Dr. Shobha N S, EC Member - ISQ)	23rd – 24th January 2025	30	10	70	ISQ, Bangalore Chapter & RVCE
2.	Navigating the journey of building a non-conventional startup in India Mr.Kaushik Mudda-CEO –Ethernal Machines (Staff Co-ordinator: Dr. Chitra BT, Asst. Prof. Dept. of IEM)	31 st January 2025	85	12	00	ECE & IEM RVCE

Conference Publications by Faculty:

Sl. No.	Faculty Name	Title	Conference	National / International
1.	Ms. Nimmala Sravanthi, Ms. Diya K Mutha, Ms. B N Vaishnavi, Ms. H K Shreya, Dr. Vikram N Bahadurdesai, Dr. Ramaa A	System Architecture for Water Quality Monitoring and Water Quality Index Assessment of Bommanahalli Lakes"	Two days Symposium on Digital Transformation through Quality 4.0" organized jointly by Indian Society for Quality and RV College of Engineering	National
2.	Dr. Ramaa A, Dr Subramanya K N	Quality 4.0 in Higher Education Institutions : A framework for digital transformation (Won the Best paper Award)	Two days Symposium on Digital Transformation through Quality 4.0" organized jointly by Indian Society for Quality and RV College of Engineering, 23rd - 24th January 2025	National

Patent details

Sl. No.	Title	Author	Patent Filed on	Status
1.	"FLAT PLATE SOLAR COLLECTOR WITH WAVY SHAPED RISER TUBES"	Lakshmikant Shivanayak, Gowreesh Subramanya S, Sreenivasalu Reddy N, Vijaya Kumar M N, Channaveerayya, Kailash	Design patent filed on 08/08/2023	Granted
2.	Laser Marking Machine	Dr. Bharatish A, Muhammad Anas, Dr. Vijaya Kumar M N,Vineeth Rao	444771-001 Filed on 20-01-2025	Applied
3	A Multi-Layered Mask with Hydrophobic Nanofibers as functional layer with a smart valve for protection against the Aerosol transmission of COVID-19	Dr. Shireesha G, Prof.Sudha R Karbari Dr. Uttara Kumari M Dr. Subramanya K N	202041019902 559558 04/02/2025	Granted

Workshops / Seminars Conference / Events Attended:

Sl. No.	Faculty Name	Conference / Workshop / Seminar	Venue	Date attended
1.	Dr. Vijayakumar M N Dr. Vikram N B, Dr Ramaa A Prof. Bhaskar M G	"Two days Symposium on Digital Transformation through Quality 4.0" organized jointly by Indian Society for Quality and RV College of Engineering	RVCE	23rd-24th January 2025
2.	Dr. Vivekanand S Gogi	Industry Driven 5 Day FDP on "Cutting Edge Trends in Manufacturing Practices"	Department of Mechanical Engineering, K S School of Engineering And Management, Bengaluru	20th to 24th January 2025
3.	Dr C K Nagendra Guptha	5 days, Lean Consultant Training Program conducted by National Productivity Council - Bangalore Division, Sponsored by Ministry of MSME, Government of India, under the scheme "MSME Competitive (Lean) Scheme - 2022"	Ramaiah Institute of Technology, Bangalore	20th to 24th January 2025
