Head of Department
IEM, RVCE

Dr. Ramaa A
Associate Dean - P&T,
Associate Professor,
IDEA Secretary, Dept. of IEM, RVCE

Welcome to the IEM Department Newsletter!

Stay informed and connected with the latest updates on departmental events, research breakthroughs, student achievements, and faculty highlights. From academic milestones to innovations in teaching and learning, we bring you stories that reflect the vibrant life of the Industrial Engineering and Management community.

This newsletter also showcases extracurricular activities, including hackathons, technical fests, cultural events, and student club initiatives. We aim to foster collaboration, creativity, and leadership among students while providing a platform to explore interests beyond the classroom.

We hope this newsletter leaves you feeling informed, connected, and proud.

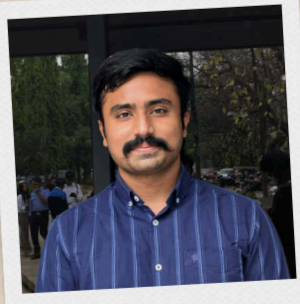

Warmly,
The Editorial Team

FROM STOPWATCHES TO AI: Unstoppable Evolution of the Industrial Engineer

If you close your eyes and picture an Industrial Engineer, what do you see? For many, it's a figure from a black-and-white photo, clutching a stopwatch and clipboard, timing a worker on an assembly line. While that image is rooted in truth, it's a fossil compared to the reality of today's IE. The journey of this dynamic discipline is a story of relentless adaptation, a profession that has repeatedly reinvented its scope to meet the demands of the era, evolving from optimizing manual labor to designing the intelligent, sustainable systems of our future.

At the dawn of 20th century, the contextual demand was pure, unadulterated efficiency. With the rise of mass production, pioneers like Frederick Taylor and the Gilbreth's used stopwatches and motion studies to wage a war on waste. This was the era of Scientific Management, where the IE was an "efficiency expert" focused on the individual worker and the single machine. The scope was narrow, tactical, and confined to the factory floor. The goal was simple: get a human to work faster and with less fatigue.

The World War II acted as a forced incubator for innovation. The problem was no longer just a single assembly line; it was the entire, globe-spanning logistics of warfare. How do you optimize convoy routes? How do you manage complex inventory under fire? In response, Industrial Engineering embraced Operations Research (OR), a suite of quantitative methods like linear programming and simulation. The stopwatch was joined by the computer. The IE's scope exploded from the shop floor to the entire production system, transforming them into systems modelers and strategic planners who could see the big picture.

By the late 20th century, a new challenge emerged from the East: quality. Japanese manufacturers demonstrated that efficiency without quality was a dead end. The context shifted from "how fast?" to "how well?" Industrial Engineers led the Quality Revolution, integrating philosophies like Total Quality Management (TQM) and Six Sigma. Simultaneously, the human element was formally recognized through Ergonomics and Human Factors. The IE was no longer just a taskmaster; but a change agent, and a designer of systems that empowered people to build excellence.

The digital explosion of the 1990s and 2000s ushered in the era of Enterprise Integration. The personal computer and the internet created a new landscape: oceans of data. The IE's toolkit expanded to include Enterprise Resource Planning (ERP) systems and sophisticated Supply Chain Management software. Their scope was no longer just a factory or a warehouse, but the entire, interconnected global enterprise. They became the crucial bridge between physical operations and the digital flows that governed them, the architects of seamless business processes.

Today, the context is defined by great transformation, driven by Smart Systems and Sustainability. Industrial Engineers are now immersed in the Internet of Things (IoT), Artificial Intelligence (AI), and digital twins. They use predictive analytics not just to report what happened, but to prescribe what should happen next. Furthermore, faced with the climate crisis, the IE's mandate has expanded to include the circular economy, designing for sustainability, and optimizing for carbon footprint. The modern IE is a data scientist, an automation strategist, and a steward of the planet.

The narrative of Industrial Engineering is not one of a profession searching for relevance, but one of a core discipline proving its indispensability. Its foundational principle - systems thinking - is its superpower. It is the relentless, pragmatic optimizer, constantly absorbing new tools and confronting new challenges. From the time-and-motion of the past to the algorithms of the future, the Industrial Engineer remains the essential architect of a world that works better. The stopwatch is now a satellite, but the mission to optimize is a sustainable one.

Dr. Rajeswara Rao KVS
Head of Department
IEM, RVCE

STUDENT ACHIEVEMENTS

Second-year, 3rd-semester students presented their project **"Electrostatic Foam Suppression Module"** authored by **Shreni C Shetty (IEM), R Shradha (IEM), P V Sai Amuktha (CSE), and Mahathi Adiraju (ASE)** under the mentorship of Dr. Shwetha K P (Physics Dept.). Their paper has been published in **IJRASET.**

They also showcased their work at Jain (Deemed-to-be University), School of Sciences, where they won the **Best Paper – First Prize.**

Men's Basketball Team emerged Champions at the **VTU Bengaluru South Division Basketball Tournament**, held at JSSATE, Bengaluru.

A special mention to **Amogh Raghavendra Naik** (7th Sem) for being an integral part of the winning team.

PROJECTS & CONSULTANCY

Impact Damage Assessment of 3D-Woven Composites Using Fiber Bragg Grating (FBG) Sensors for Aerospace Applications

Faculty Involved : Dr. Ramesh S Sharma, Dr. Vijayakumar M N & Dr. Somesh Nandi
Funding Agency : RSST-Seed Grant Under FIRF for Prototype Development (TRL 4)
Sanctioned Amount : 4,00,000/-

AI based Automated Threat Detection and Incident Response System

Faculty Involved : Dr Ramakanth kumar, Dr Minal, Dr Pavithra, Dr Ramaa and Dr Shilpa
Funding Agency : Secureinteli Technologies Pvt Ltd
Sanctioned Amount : 20,00,000/-

SEMINARS - CONFERENCES - WORKSHOPS

One day FDP "Educate the Educator" on Generative AI

Attended by : Shobha N S, Vikram N B, Nandini B
Venue : CCH,RVCE
Date : 13th September 2025

Three Day Faculty Development Program on "Indian Knowledge System"

Attended by : Dr. Vivekanand S Gogi, Shruthi M N
Venue : ISE Seminar Hall,rvce
Date : 23rd to 25th Sept 2025

SCALE 2025, Silver Jubilee Edition

Attended by : DR K N Subramanya, Dr Ramaa A
Venue : The Capitol Hotel
Date : 3rd September 2025

TIA SUMMIT,2025

Attended by : Dr. Vikram N Bahadurdesai
Venue : TAJ WEST END
Date : 15th & 16th September 2025

AWARDS/ACHIEVEMENTS

Dr. Vikram N. Bahadurdesai

Dr. Vikram N. Bahadurdesai, Assistant Professor, Department of IEM, was honored with the Best Teacher Award 2025 on the occasion of Teachers' Day, celebrated on 4th September 2025. The award was presented by the RVCE ISTE Chapter in recognition of his dedication to teaching and academic excellence.

STUDY AND WORK AT DENMARK OUTREACH PROGRAM

On September 12, 2025, students from RVCE and RV University attended a special outreach program on "Study and Work at Denmark." The session offered a valuable guide to the country's top universities, vibrant career prospects and available scholarship opportunities. After a lively Q&A, students left better equipped to explore academic and professional pathways in Denmark. This event highlights our commitment to fostering global opportunities for our students.

PATENTS

We have filed a Complete patent application for the invention titled: **Real-Time Robotic Ecosystem for Multi-Class Segregation and Monitoring of Electronic Waste** at the Indian Patent Office.

Application No. : 202541099530

Filing date : 15/10/2025

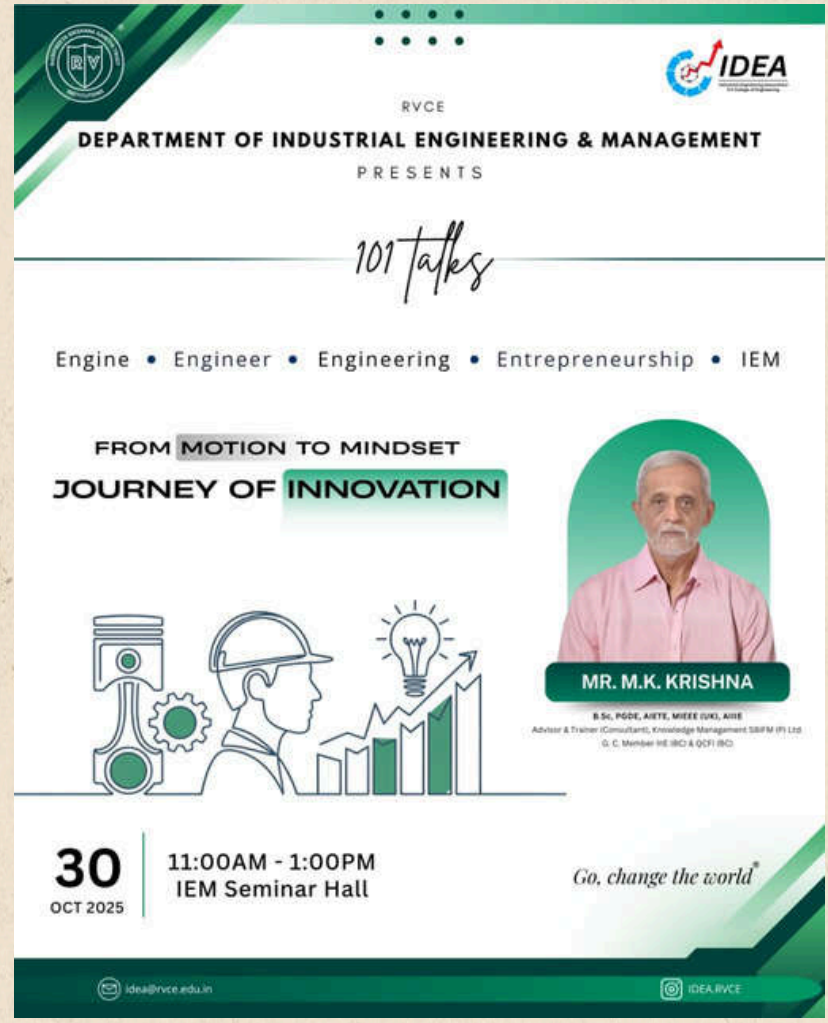

Applicant : R.V College of Engineering

Inventors :
1. Ramakanth Kumar P
2. Hemavathy R
3. Dr. K N Subramanya
4. H R Aneesh Tejas
5. Hitesh S P

101 TALKS

From Motion to Mindset - Journey of Innovation

• Dr. M. K. Krishna •

The Department of Industrial Engineering and Management hosted an inspiring session by Dr. M. K. Krishna, who was warmly welcomed by students and faculty. He began by reflecting on the discipline, achievements, and legacy of Sir M. Visvesvaraya, encouraging students to draw inspiration from his dedication to nation-building.

Dr. Krishna emphasized the value of active participation, volunteering, and hands-on learning, urging students to build strong technical and practical skills to stay industry-ready. He highlighted the growing opportunities in Industrial Engineering and Management (IEM) and encouraged students to take pride in their field.

He concluded with a powerful message: “Jobs are available in plenty, but not at your doorstep. Skills are empty.” The session was motivating, insightful, and a strong reminder of the importance of discipline, skill-building, and involvement.

INTERNATIONAL CERTIFICATE COURSE AT FH DORTMUND

Six students from the Department of Industrial Engineering and Management — **Mihika, Disha, Chinmaya, Harshul, Devadeekshith, and Malavika,** have successfully completed the International Certificate Course in Smart Manufacturing 2025. The program was held at **FH Dortmund University** in Germany, from August 21st to September 14th.

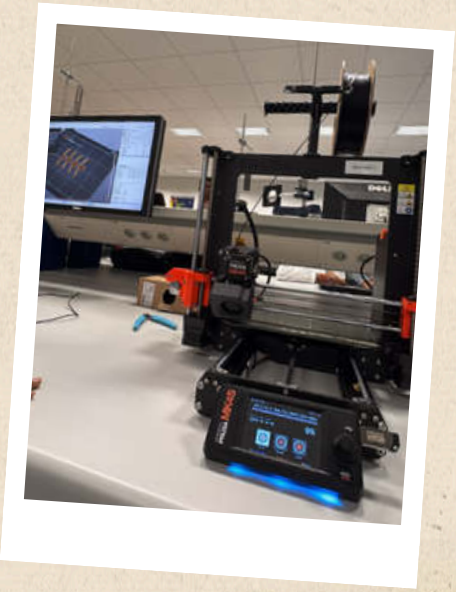

Dr. Vikram N

The course provided participants with deep insights into the latest global industrial practices through several intensive modules, including:

- Lean Production
- Lightweight Design
- Innovation Management & Entrepreneurship
- High Performance Machine Tools
- Additive Manufacturing (3D Printing)

The students extend their sincere gratitude to **Dr. Vikram N. Bahadurdesai** for his guidance and support throughout this international program.

The department congratulates the students on this significant accomplishment, which exemplifies the practical, global exposure central to our curriculum.

NEW CHAPTER IN INDO-GERMAN COLLABORATION

RVCE Strengthens Indo-German Ties with HOF University Partnership

On September 22, 2025, RVCE proudly formalized a new academic partnership by signing a Memorandum of Understanding (MoU) with the **HOF University of Applied Sciences, Germany**. This collaboration marks a significant milestone, making HOF University our sixth esteemed German partner institution.

The partnership is poised to integrate seamlessly with RVCE's established Indo-German Collaborative Programs, which already include successful engagements with THWS, THR, and HTW Dresden. The visiting delegation from HOF University expressed strong interest in contributing to these initiatives.

During their visit, the delegates engaged with our campus community, touring the state-of-the-art MG Lab and WIRIN Lab and interacting with RVCE students.

We were honored to host the distinguished delegation, which included:

- **Prof. Dr. Dr. h.c. Jürgen Lehmann**, President
- **Prof. Dr. Anke Müller**, Dean of Engineering
- **Mr. Björn Richter**, Head of Admissions
- **Ms. Susanne Krause**, Dean, International Office
- **Mr. Moses Joseph**, Liaison Manager, India Representation Office
- **Ms. Alisha Purti**, Deputy Liaison Manager, India Representation Office

This strategic alliance was made possible by the visionary leadership and unwavering support of the Principal and the RSST Management. We look forward to a future of shared knowledge and innovation.

MAJOR EVENTS

Industry visit to Terranova Eco Management Pvt Ltd as a part of RVCE FH Dortmund, Germany student exchange program on 8th September 2025

Dr. Vikram N. Badurdesai received a Certificate of Appreciation from the Ministry of Education, AICTE, and the MoE's Innovation Cell. He served as a Jury Member for the Smart India Hackathon (SIH) 2025 - Internal Edition, held on 23rd–24th September 2025.

Prof. N S Narahari, was honoured with **National Builder Award 2025** by Rotary 3191 at Bhavani kalyana mantapam, Gandhibhazar on September 22nd 2025.

Prof. N S Narahari, addressed the newly admitted batch of students at SIT Tumkur during the induction program on the topic of **Career pathways in Industrial Engineering** on September 20th 2025.

Dr K N Subramanya, Dr Ramaa visited Tejas Networks, Electronics City for interaction, factory visit, collaboration and relationship building on 10th September 2025

Rajeswara Rao K V S obtained NPTEL online certification for completing the course on: Ergonomics Workplace Analysis during September 2025. Awarded- Elite Topper.

59 students from the 7th semester RVCE (ME and IEM) successfully completed the Ready Engineer Program by Tata Technologies, gaining hands-on skills in CAD, design thinking, and industry practices. Their strong performance and enthusiasm reflect the department's focus on practical, industry-oriented learning.

TATA TECHNOLOGIES
READY Engineer™

RVCE organized an orientation session on 29 October 2025 for V Semester Mechanical and IEM students as part of the TATA Technologies Ready Engineers initiative. The session aimed to familiarize students with industry-relevant skills, advanced engineering tools, and opportunities offered through the Ready Engineers program.
