## Academic year 2025-2026 (Even Sem)

DEPARTMENT OF
**INDUSTRIAL ENGINEERING AND MANAGEMENT**

| **Date** | **MAY 2026** | **Maximum Marks** | **50** |
|---|---|---|---|
| **Course Code** | **HS361TA** | **Duration** | **90 Min** |
| **Sem** | **VI Semester** | **Test-2** | |
| **Entrepreneurship and Intellectual Property Rights** | | | |

**PART – A**

| S No | Questions | M | BT | CO |
|---|---|---|---|---|
| 1 | What is the primary objective of registering an Industrial Design? | 02 | L2 | 5 |
| 2 | Copy Right protects expression but not the ideas. Justify? | 02 | L2 | 5 |
| 3 | Define Performers Rights. | 02 | L1 | 5 |
| 4 | Define 'Organic Growth' in the context of business expansion. | 02 | L2 | 1 |
| 5 | What is a Break-Even Point in the context of business operations? | 02 | L2 | 3 |

**PART – B**

| S No | Questions | M | BT | CO |
|---|---|---|---|---|
| 1. | A company plans to launch an electric scooter in a semi-urban market where fuel prices are rising, but charging infrastructure is limited. Explain how the company should assess market feasibility and demand before launching the product. | 10 | L3 | 2 |
| 2. | A startup is launching an AI-based online tutoring platform connecting freelance tutors with students across India. Explain what key elements should be included in the executive summary of its business plan. | 10 | L4 | 3 |
| 3. | A food startup has developed a unique recipe and process for manufacturing a long-lasting organic juice. The company wants to prevent competitors from copying it. Explain how the firm can protect its trade secrets in India and why such protection is significant. | 10 | L3 | 5 |
| 4. | An educator creates a comprehensive online course including recorded lectures, PDFs, animations, and quizzes, and uploads it on a learning platform. Later, another platform copies the videos and distributes them without permission. Explain the nature, scope, and rights violated in this situation. | 10 | L3 | 5 |
| 5. | A startup proposes an AI-based mobile app that detects plant diseases using images. Explain how the startup should evaluate technical feasibility through prototype development and proof of concept before full-scale launch. | 10 | L3 | 4 |

BT-Blooms Taxonomy, CO-Course Outcomes, M-Marks

| Marks Distribution | Particulars | | CO1 | CO2 | CO3 | CO4 | CO5 | L1 | L2 | L3 | L4 | L5 | L6 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Max | Quiz | 06 | 04 | | | | 04 | 06 | | | | |
| | Marks | Test | 10 | 10 | 20 | 10 | | | 30 | 10 | 10 | | |

RV College of Engineering®

DEPARTMENT OF
# INDUSTRIAL ENGINEERING & MANAGEMENT

| | | |
|---|---|---|
| **Date : 15th Dec 2025** | **CIE - II** | **Max. Marks : 10 + 50** |
| **Semester : V** | **UG** | **Duration : 30 + 90 Min** |
| **Course Title: ENTREPRENEURSHIP & INTELLECTUAL PROPERTY RIGHTS** | | **Course Code : HS351TA** |

**Part A**

| Sl. No | Questions | M | BT | CO |
|---|---|---|---|---|
| 1. | Distinguish between Proof of Concept (PoC) and Prototype with respect to risk mitigation. | 2 | 1 | 3 |
| 2. | Why is technical feasibility meaningless without market feasibility? Justify. | 2 | 1 | 3 |
| 3. | How does reverse engineering weaken trade secret protection? | 2 | 2 | 3 |
| 4. | Why is novelty mandatory but aesthetic appeal critical in industrial design protection? | 2 | 3 | 3 |
| 5. | Define Copyright. | 2 | 2 | 3 |

**Part B**

| Sl. No | Questions | M | BT | CO |
|---|---|---|---|---|
| 1. | Explain the elements of a business plan. Describe each component with suitable examples. | 10 | 2 | 2 |
| 2. | Discuss the complete Entrepreneurial Opportunity Evaluation Process covering:<br>• Identification of market opportunities and trends<br>• Technical feasibility (Prototype and Proof of Concept)<br>• Financial feasibility (Cost estimation, revenue projection, and break-even analysis)<br>• Role of cross-disciplinary collaboration in technological innovation | 10 | 3 | 3 |
| 3. | Explain the acts which do not constitute Infringement under the Copyright Law. | 10 | 2 | 3 |
| 4. | Explain in detail the complete procedure for obtaining Industrial Design protection in India. Further, critically evaluate:<br>• Grounds and procedure for revocation of registered designs<br>• Types of design infringement<br>• Civil and criminal remedies available<br>Illustrate your answer with at least one real case study. | 10 | 3 | 2 |
| 5. | A software company develops a unique algorithm for data security and keeps it confidential. A former employee illegally discloses this information to a competitor.<br>1. Identify the type of intellectual property right involved.<br>2. Explain the legal remedies available under Indian law.<br>3. Discuss the importance of trade secret protection with reference to this case. | 10 | 3 | 3 |

RV College of Engineering®

Bengaluru - 560059, Karnataka, India

DEPARTMENT OF
# INDUSTRIAL ENGINEERING & MANAGEMENT

| | | |
|---|---|---|
| **Date : 6th Apr 2025** | **CIE – II** | **Max. Marks : 10 + 50** |
| **Semester : VI** | **UG** | **Duration : 30 + 90 Min** |
| **Course Title: Entrepreneurship & Intellectual Property Rights** | | **Course Code : HS361TA** |

Note:
1. Answer all the Questions.

| Sl. No | Questions | M | BT | CO |
|---|---|---|---|---|
| | **Part – A** | | | |
| 1. | Define Eco-Labelling. | 2 | 2 | 4 |
| 2. | Differentiate between trademark and passing off. (Any two points) | 2 | 2 | 5 |
| 3. | What is a Collective Trademark? | 2 | 2 | 4 |
| 4. | What is a Break-even point in the context of business operations? | 2 | 2 | 3 |
| 5. | Why is a financial plan important in a business plan? | 2 | 2 | 3 |
| | **Part – B** | | | |
| 1. | Discuss any two important trademark infringement cases, highlighting their impact on trademark law. | 10 | 3 | 3 |
| 2. | Explain the difference between registrable and non-registrable trademarks. Discuss the criteria that make a trademark registrable and provide examples of marks that cannot be registered. | 10 | 3 | 4 |
| 3a. | The Soil Association, a UK-based organic certification organization, owned a registered eco-label that certified products meeting strict organic farming standards. The Association of British Growers (ABG) used a mark similar to the Soil Association's eco-label on their products without permission. Whether ABG's unauthorized use of the Soil Association's eco-label constituted trademark infringement and whether it misled consumers into believing the products were certified organic by the Soil Association. Discuss. | 05 | 3 | 5 |
| 3b. | ITC Ltd., an Indian conglomerate, owned the trademark "Munch" for its chocolate products. Nestle India Ltd. started marketing a chocolate bar also named "Munch." ITC alleged that Nestle's use of the mark was deceptively similar and infringed its trademark rights.<br>• Whether Nestlé's use of the mark "Munch" infringed ITC's registered trademark by creating deceptive similarity.<br>• Whether customers were likely to be confused or misled by the similarity of the marks.<br>• Is Nestlé's use amounted to unfair competition or passing off. | 05 | 4 | 5 |

| | | | | |
|---|---|---|---|---|
| 4. | Discuss the following aspects related to new product development and innovation:<br>a) How can identifying market opportunities and trends influence the ideation process?<br>b) Explain the role of integration of engineering principles and cross-disciplinary collaboration in technological innovation.<br>c) Describe the methods to assess market feasibility and demand analysis for a new product.<br>d) Discuss how technical feasibility is evaluated through prototype development and proof of concept.<br>e) Outline the key components of financial feasibility analysis including cost estimation and revenue projection. | 10 | 2 | 3 |
| 5. | Describe the SWOC analysis and explain Porter's generic competitive strategies with examples. | 10 | 3 | 3 |

## Academic year 2024-2025 (ODD Sem)

DEPARTMENT OF
## INDUSTRIAL ENGINEERING & MANAGEMENT

| | | | |
|---|---|---|---|
| **Date** | **07/01/2025** | **Maximum Marks** | **10 + 50** |
| **Course Code** | **HS351TA** | **Duration** | **120 Min** |
| **Sem** | **V** | **CIE -II** | |
| **ENTREPRENEURSHIP AND INTELLECTUAL PROPERTY RIGHTS** | | | |

Note:
1. Answer all the Questions.

| Sl. No | Questions | M | BT | CO |
|---|---|---|---|---|
| | **Part – A** | | | |
| 1 | _____ component is key in assessing market feasibility | 1 | 1 | 2 |
| 2 | What does break-even analysis determine? | 1 | 1 | 3 |
| 3 | Which strategy in Porter's generic strategies focuses on offering unique products? | 1 | 1 | 3 |
| 4 | What does a proof of concept primarily demonstrate? | 1 | 1 | 2 |
| 5 | Why is prototyping important in the ideation process? | 2 | 1 | 2 |
| 6 | In order to register Industrial Design, Design should be new and _____ | 1 | 1 | 4 |
| 7 | Can a colour by itself be subject matter of registration of industrial design? If yes, justify your statement. | 2 | 2 | 4 |
| 8 | Upon expiry of registration of a design under Designs Act 2000 it becomes _____ property | 1 | 1 | 4 |
| | **Part –B** | | | |
| 1 | A medium-sized technology company in India develops an innovative algorithm for optimizing supply chain logistics. To maintain its competitive edge, the company decides not to patent the algorithm but to treat it as a trade secret. Over time, a former employee joins a competitor and allegedly discloses key aspects of the algorithm. The company must navigate the legal landscape to protect its trade secrets.<br>**Questions:**<br>i. What legal tools and mechanisms are available in India to protect trade secrets?<br>ii. Analyze the company's decision to treat the algorithm as a trade secret instead of patenting it. What are the advantages and risks of this approach?<br>What preventive measures could the company have implemented to minimize the risk of trade secret leakage? | 10 | 3 | 4 |

| | | | | |
|---|---|---|---|---|
| 2 | A furniture design firm creates a unique chair design that combines aesthetics with ergonomic principles. The design becomes a market hit, but a competitor begins manufacturing and selling a chair with an almost identical appearance. The firm initiates legal proceedings to obtain design protection and stop the competitor's activities.<br>Questions:<br>i. What features of the chair design qualify it for industrial design protection? | 10 | 3 | 4 |

DEPARTMENT OF
# INDUSTRIAL ENGINEERING & MANAGEMENT

| | | |
|---|---|---|
| **Date : 15/12/2025** | **CIE – II-A** | **Max. Marks : 10 + 50** |
| **Semester : V** | **UG** | **Duration : 30 + 90 Min** |
| **Course Title: Operations Management** | | **Course Code : IM352IA** |

Note:
1. Answer all the Questions.

| Sl. No | Questions | M | BT | CO |
|---|---|---|---|---|
| | **Part – A** | | | |
| 1. | In time series models, regular fluctuations occurring within a year due to weather or festivals are called _____ variations. | 1 | 1 | 1 |
| 2. | The difference between the actual value and the forecasted value is known as the _____. | 1 | 1 | 2 |
| 3. | Qualitative forecasting methods rely heavily on _____ judgment. | 1 | 1 | 1 |
| 4. | A hotel predicts weekend occupancy using past booking patterns. This uses a _____ time series model. | 1 | 2 | 1 |
| 5. | A company uses a senior manager's opinion to forecast sales of a new product. This reflects the _____ forecasting method. | 1 | 1 | 1 |
| 6. | A production line experiencing a delay at one critical machine identifies it as the _____ resource. | 1 | 2 | 4 |
| 7. | A production manager selects the job with the shortest processing time to reduce average waiting time. This applies the _____ rule. | 1 | 2 | 3 |
| 8. | A plant with multiple machines generates several two-machine equivalent sequences to approximate the optimal schedule. This procedure follows the _____. | 1 | 2 | 3 |
| 9. | A manufacturer with two machines creates an optimal job sequence by choosing the smallest processing time among both machines. This applies _____ rule. | 1 | 2 | 3 |
| 10. | For two jobs processed on multiple machines, the job with smaller processing time on the first machine is scheduled _____ in the Johnson-like rule for job shops. | 1 | 2 | 3 |
| | **Part – B** | | | |
| 1 | Explain the importance of measuring forecast error in Operations Management. Discuss the managerial implications of each measure with suitable examples. | 08 | 2 | 3 |
| 2 | With suitable example, differentiate between forward scheduling and backward scheduling | 08 | 2 | 4 |

<table>
<tr><td>3</td><td>A lathe manufacturer had noted the sales invoices from January to August and noticed the sales during each month as 10, 11, 10, 11, 14, 15, 14 & 15 units respectively. What would be his estimate of sales for September?<br>(i) If he has followed 4 month weighted moving average (with weights 0.4, 0.3, 0.2 & 0.1).<br>(ii) If he has followed SES with $\alpha = 0.2$ and his estimated sales for January is 11.</td><td>12</td><td>4</td><td>3</td></tr>
<tr><td>4</td><td>Consider the following single machine scheduling problem.
<table>
<tr><th>Job, $j$</th><th>Processing time, $t_j$</th><th>Due date, $d_j$</th></tr>
<tr><td>1</td><td>12</td><td>17</td></tr>
<tr><td>2</td><td>10</td><td>14</td></tr>
<tr><td>3</td><td>10</td><td>12</td></tr>
<tr><td>4</td><td>9</td><td>20</td></tr>
<tr><td>5</td><td>14</td><td>18</td></tr>
<tr><td>6</td><td>17</td><td>27</td></tr>
</table>
Determine the sequence which will minimize the maximum lateness ($L_{max}$). Also, determine the $L_{max}$ with respect to the optimal sequence.</td><td>10</td><td>4</td><td>4</td></tr>
<tr><td>5</td><td>Use graphical method to minimize the time needed to process the following jobs on the machines shown (i.e. for each machine, find the job which should be scheduled first). Also, calculate the total time elapsed to complete both jobs.
<table>
<tr><td rowspan="2">Job 1</td><td>Sequence</td><td>A</td><td>B</td><td>C</td><td>D</td><td>E</td></tr>
<tr><td>Time (Hrs).</td><td>3</td><td>4</td><td>2</td><td>6</td><td>2</td></tr>
<tr><td rowspan="2">Job 2</td><td>Sequence</td><td>B</td><td>C</td><td>A</td><td>D</td><td>E</td></tr>
<tr><td>Time (Hrs)</td><td>5</td><td>4</td><td>3</td><td>2</td><td>6</td></tr>
</table></td><td>12</td><td>4</td><td>4</td></tr>

| **Sem** | **V** | **CIE – II** | |
| **OPERATIONS MANAGEMENT** | | | |

Note:

1. Answer all the Questions.

| Sl. No | Questions | M | BT | CO |
|---|---|---|---|---|
| | **Part – A** | | | |
| 1 | In services, the process structure is primarily influenced by the level of _____ and customization. | 1 | 1 | 2 |
| 2 | In manufacturing, a _____ process is ideal for high-volume, standardized production. | 1 | 2 | 2 |
| 3 | The first step in a systematic approach to long-term capacity decisions is _____ future demand. | 1 | 2 | 2 |
| 4 | A systematic approach to capacity planning involves forecasting, identifying alternatives, and evaluating _____. | 1 | 1 | 2 |
| 5 | The _____ component of a forecast captures recurring patterns over specific periods, such as seasons or months. | 1 | 2 | 3 |
| 6 | The smoothing constant in exponential smoothing ranges between 0 and _____. | 1 | 1 | 3 |
| 7 | ____ provides a detailed plan of what needs to be produced and when, serving as an input for MRP. | 1 | 1 | 3 |
| 8 | The ____ file contains information about the quantities of materials required to make a product. | 1 | 2 | 3 |
| 9 | _____ integrates all business processes, including finance, HR, and supply chain, into a unified system. | 1 | 2 | 3 |
| 10 | _____ ensures that operational capabilities are in line with the company's strategic goals. | 1 | 2 | 3 |
| | **Part –B** | | | |
| 1 | Explain the major process strategy decisions and their implications for operations. | 10 | 2 | 2 |

| | | | | |
|---|---|---|---|---|
| 2 | Richard Garber is the head designer for Matthews and Novak Design Company. Garber has been called in to design the layout for a newly constructed office building. From statistical samplings over the past three months, Garber developed the following closeness matrix for daily trips between the department's offices.<br>**a.** If other factors are equal, which two offices should be located closest together?<br>**b.** Figure shows an alternative layout for the department. What is the total weighted-distance score for this plan based on rectilinear distance and assuming that offices A and B are three units of distance apart?<br>**CLOSENESS MATRIX**<br>Trips Between Departments<br>Department: A — B 25 — C 90 — D — E 105 — F 185<br>B — — — — E 125 — F 125<br>C — — — — D — — E 25 — F —<br>D — — — — E — — F 105<br>E — — — — F —<br>F —<br>**C F A**<br>**B E D** | 10 | 3 | 2 |
| 3 | The monthly demand for units manufactured by the Acme Rocket Company has been as follows:<br>May 100, June 80, July 110, August 115, September 105, October 110, November 125, December 120<br>**i.** Use the exponential smoothing method to forecast the number of units for June to January. The initial forecast for May was 105 units; $\alpha = 0.2$.<br>**ii.** Calculate the absolute percentage error for each month from June through December and the MAD and MAPE of forecast error as of the end of December.<br>**iii.** Calculate the tracking signal as of the end of December. What can you say about the performance of your forecasting method? | 10 | 3 | 3 |

| | | | | |
|---|---|---|---|---|
| 4 | Refer to the bill of materials for product A. If there is no existing inventory and no scheduled receipts, how many units of items G, E, and D must be purchased to produce five units of end item A?<br>  <br> | 10 | 4 | 3 |
| 5 | Explain how the concept of dependent demand in material requirements planning is fundamental to resource planning. | 10 | 2 | 3 |

| **Date : 16th Dec 2025** | **CIE - II** | **Max. Marks : 10 + 50** |
| **Semester : V** | **UG** | **Duration : 30 + 90 Min** |
| **Course Title: FINANCIAL ACCOUNTING & COSTING** | | **Course Code : IM254TA** |

Note: Answer all the Questions.

| Sl. No | Questions | M | BT | CO |
|---|---|---|---|---|
| | **PART - A** | | | |
| 1.1 | What is meant by Overheads in Costing? | 2 | 1 | 2 |
| 1.2 | Differentiate between Fixed Costs and Variable Costs. | 2 | 3 | 2 |
| 1.3 | Identify two sectors for which activity-based costing is suitable. | 2 | 3 | 4 |
| 1.4 | Comment on how cost accumulation happens in Process Costing with an example. | 2 | 3 | 4 |
| 1.5 | Job costing is for _____, _____ jobs, while batch costing is for *a group of* _____ *products* treated as one batch. | 2 | 2 | 3 |
| | **PART - B** | | | |
| 2.a | Enumerate the objectives of Cost Accounting. | 05 | 2 | 3 |
| 2.b | Discuss the various elements of Costing. | 05 | 2 | 3 |
| 3 | Prepare Trial Balance for the following Balances as on 31st March 2023 | 10 | 3 | 2 |

| **Balances** | **₹** |
|---|---|
| Cost of Goods Sold | 5,20,000 |
| Opening Stock | 50,000 |
| Closing Stock | 50,000 |
| Salary and Wages | 50,000 |
| Sales | 8,00,000 |
| Plant & Machinery | 2,00,000 |
| Drawing | 50,000 |
| Investment | 4,30,000 |
| Creditors | 1,00,000 |
| Capital | 4,00,000 |

| | | | | |
|---|---|---|---|---|
| 4. | Prepare Profit and Loss account from the following particulars for the year ended March 31, 2023:<br>Gross Profit ₹ 4,69,000<br>Subletting ₹ 10,000<br>Commission Received ₹ 40,000<br>Rent, tax, and Insurance ₹ 10,000<br>Discount Received ₹ 22,000<br>Export Duty ₹ 15,000<br>Rent Received ₹ 23,000<br>Audit Fees ₹ 5,000<br>Bank Charges₹ 8,000<br>Packing Charges(Show Room)₹ 12,000<br>Dividend Received ₹ 15,000<br>Depreciation ₹ 24,000<br>Administration Expenses ₹ 35,000<br>Selling Expenses ₹ 25,000<br>Printing and Stationery ₹ 15,000<br>Distribution Expenses ₹ 28,000<br>Office Expenses ₹ 32,000<br>Trade Expenses ₹ 50,000<br>General Expenses ₹ 25,000<br>Carriage outward ₹ 15,000<br>Legal Expenses ₹ 5,000<br>Bad Debts ₹ 10,000 | 10 | 4 | 3 |
| 5 | Write short notes on any three types of costing methods used in organizations. | 10 | 2 | 3 |
| 6 | In a manufacturing unit, raw material passes through four processes, I, II, III, and IV and the output of each process is the input for the subsequent process. The losses in the four processes are respectively 25%, 20%, 20% and 16 2/3 % respectively for I, II, III and IV processes of the input. If the end product at the end of the IV process is 40,000 kg, what is the quantity of raw material required to be fed at the beginning of Process I and the cost of the same at Rs. 5 per kg? | 10 | 3 | 3 |

|---|---|---|---|
| **Date** | **7th January 2025** | **Maximum Marks** | **50** |
| **Course Code** | **IM353IA** | **Duration** | **90 Min** |
| **Sem** | **V** | **CIE – II** | |
| **QUALITY ASSURANCE** | | | |

Note:
1. Answer all the Questions.

**PART – A** **Max Marks: 10**

| Sl. No | Questions | M | BT | CO |
|---|---|---|---|---|
| 1. | Differentiate between Attribute control chart and Variable control chart. | 2 | L2 | CO1 |
| 2. | What does an R-chart measure, and why is it important in statistical process control? | 2 | L1 | CO2 |
| 3. | What is the key difference between a p-chart and a np-chart? | 2 | L2 | CO3 |
| 4. | Expand the acronyms: AQL, UTPD | 2 | L2 | CO3 |
| 5. | Write two applications of acceptance sampling. | 2 | L2 | CO2 |

**PART – B**

| Sl. No | Questions | M | BT | CO |
|---|---|---|---|---|
| 1. | A TiW layer is deposited on a substrate using a sputtering tool. The following table contains layer thickness measurements (in Angstroms) on 10 subgroups of four substrates. Set up $\bar{X}$ and $s$ charts on this process and compute trial control limits. | 10 | 3 | CO3 |
| 2. | Write a note on Standardized control chart. What is the process capability? Explain any one of the techniques of process capability analysis. | 10 | 2 | CO1 |

| Subgroup | $x_1$ | $x_2$ | $x_3$ | $x_4$ |
|---|---|---|---|---|
| 1 | 459 | 449 | 435 | 450 |
| 2 | 443 | 440 | 442 | 442 |
| 3 | 457 | 444 | 449 | 444 |
| 4 | 469 | 463 | 453 | 438 |
| 5 | 443 | 457 | 445 | 454 |
| 6 | 444 | 456 | 456 | 457 |

# INDUSTRIAL ENGINEERING & MANAGEMENT

| | | |
|---|---|---|
| **Date : 17/12/2025** | **CIE – II** | **Max. Marks : 10 + 50** |
| **Semester : V** | **UG** | **Duration : 30 + 90 Min** |
| **Course Title: Enterprise Information Systems** | | **Course Code : IM355TBB** |

Note:
1. Answer all questions

| Sl. No | Questions | M | BT | CO |
|---|---|---|---|---|
| | **Part – A** | | | |
| 1. | Define Robotic Process Automation (RPA) and state its primary focus. | 2 | 1 | CO1 |
| 2. | State the fundamental reason why a company must engage in Business Process Reengineering (BPR) before implementing any major automation initiative. | 2 | 2 | CO2 |
| 3. | Define the term Data Mart and state how it differs in **scope** from a full Data Warehouse. | 2 | 1 | CO3 |
| 4. | Name the two foundational processes that are typically executed by Data Mining tools to discover new knowledge within a BI system. | 2 | 2 | CO3 |
| 5. | A decision-maker uses a BI tool to analyze sales by clicking on a region, then a city, and finally a specific store. Name this OLAP technique and briefly state its purpose. | 2 | 2 | CO3 |
| | **Part – B** | | | |
| 1 | List and explain various methods of business process automation. | 10 | 2 | CO2 |
| 2 | Define Robotic Process Automation (RPA). Explain how it works. List the uses and benefits. | 10 | 2 | CO2 |
| 3 | Explain the core difference between Business Intelligence (BI) and Data Warehousing. Describe why BI is considered “the technology and practice of applying information to make decisions”. | 10 | 2 | CO1 |
| 4 | Describe the four progressive types of Data Analytics used in an EIS. For each type, state the central question it is designed to answer. | 10 | 3 | CO3 |
| 5 | Apply the concept of Online Analytical Processing (OLAP) by explaining its primary function. Illustrate how a retail manager would use an OLAP technique like Drilling Down to analyze a regional sales report. | 10 | 4 | CO3 |

Note:
1. Answer all the Questions.

| Sl. No | Questions | M | BT | CO |
|---|---|---|---|---|
| | **Part A** | | | |
| 1. | Mention the situations that make the replacement of items necessary? | 02 | 2 | 1 |
| 2. | What are the three strategies of replacement of items which follow sudden failure mechanisms? | 02 | 2 | 3 |
| 3. | State two differences between preventive maintenance and breakdown maintenance. | 02 | 2 | 2 |
| 4. | Give one advantage and one disadvantage of individual replacement policies. | 02 | 2 | 2 |
| 5. | State the main objectives of using the EOQ model? | 02 | 1 | 3 |
| | **Part B** | | | |
| 1 | A firm is considering the replacement of a machine, whose cost price is Rs 12,200, and its scrap value is Rs 200. From experience the running (maintenance and operating) costs are found to be as follows:<br>Year: 1 2 3 4 5 6 7 8<br>Running Cost (Rs): 200 500 800 1200 1800 2500 3200 4000<br>When should the machine be replaced? | 10 | 3 | 1 |
| 2 | The data on the running costs per year and resale price of equipment A, whose purchase price is Rs 2,00,000 are as follows:<br>Year: 1 2 3 4 5 6 7<br>Running cost (Rs): 30,000 38,000 46,000 58,000 72,000 90,000 1,10,000<br>Resale value (Rs): 1,00,000 50,000 25,000 12,000 8,000 8,000 8,000<br>i. What is the optimum period of replacement?<br>ii. When equipment A is two years old, equipment B, which is a new model for the same usage, is available. The optimum period for replacement is 4 years with an average cost of Rs 72,000. Should equipment A be changed with equipment B? If so, when? | 10 | 3 | 2 |

## Academic year 2024-2025 (ODD Sem)

<table>
<tr><td>3</td><td>A company is considering the purchase of a new machine at Rs 15,000. The economic life of the machine is expected to be 8 years. The salvage value of the machine at the end of the life will be Rs 3,000. The annual running cost is estimated to be Rs 7,000.<br>i. Assuming an interest rate of 5 per cent, determine the present worth of future costs of the proposed machine.<br>ii. Compare the new machine with the presently-owned machine that has an annual operating cost of Rs 5,000 and cost of repair Rs 1,500 in the second year, with an annual increase of Rs 500 in the subsequent years of its life.</td><td>10</td><td>3</td><td>3</td></tr>
<tr><td>4</td><td>The following failure rates have been observed for a certain type of bulbs.
<table>
<tr><td>End of Week:</td><td>1</td><td>2</td><td>3</td><td>4</td><td>5</td><td>6</td><td>7</td><td>8</td></tr>

| Max Marks | **60** | **16.12.2025 \| 13:20 - 15:20** | **Max Duration** | **120 Min** |

**Instructions to Candidates:**

All the questions are compulsory. No additional booklet will be provided.

| Q. No. | QUESTIONS | M | BT | CO |
|---|---|---|---|---|
| 1.1 | What are the outcomes of hydrogen risk assessment? | 02 | 01 | 01 |
| 1.2 | List the steps involved in the quantitative hydrogen risk assessment. | 02 | 01 | 04 |
| 1.3 | Define Codes of Practice. | 02 | 01 | 03 |
| 1.4 | What is PAS? | 02 | 01 | 02 |
| 1.5 | List the parameters associated with hydrogen for which the codes and standards are defined. Hint: The approval for these parameters vary between countries. | 02 | 01 | 02 |
| Part B | | | | |
| 2 | Explain in detail, how hydrogen gas is stored as compressed gas including its advantages and disadvantages. | 10 | 02 | 04 |
| 3 | What are the salient features of storing hydrogen as cryogenic liquid? How is it done and what are the associated benefits and hurdles? | 10 | 02 | 04 |
| 4 | Is storing hydrogen as a metal hydride a boon or a bane (annoyance)? Justify with substantial details including the working principle, advantages and disadvantages. | 10 | 03 | 03 |
| 5 | How are liquid organic hydrogen carriers beneficial in case of storage and transport of hydrogen? Provide a detailed narration. | 10 | 02 | 03 |
| 6 | Give an explanatory note on the codes and standards (national and international) associated with the handling and safety of hydrogen gas. | 10 | 03 | 01 |

Course Outcomes

| At the end of the course the student will be able to, | |
|---|---|
| 1 | Understand the importance of hydrogen and its use as an energy carrier |
| 2 | Explain the production, storage and handling of hydrogen |
| 3 | Analyze the need for hydrogen as an alternate fuel and the associated challenges |
| 4 | Appraise the importance of safety, regulations and codes |
