DEPARTMENT OF
INDUSTRIAL ENGINEERING & MANAGEMENT

Date : 22/05/2026	**CIE – 2**	**Max. Marks : 10 + 50**
Semester : VI	**UG**	**Duration : 30 + 90 Min**
Course Title: Principles of Management& Economics		**Course Code : HS261TA**

Note:
1. Answer all the Questions.

Sl. No	Questions	M	BT	CO
	Part – A			
1.	In the BCG matrix, what does a "Star" represent? Why is it important for a company?	02	2	CO2
2.	Differentiate Strategic and Operational plans on the basis of time horizons.	02	2	CO2
3.	Give two examples of corporate level strategy	02	2	CO2
4.	When price of a product falls from ₹20 to ₹16, quantity demanded rises from 100 units to 140 units. Find Price Elasticity of Demand.	02	3	CO3
5.	If the total cost of the basket in the base period (say January 2008) is $600, and in the current period (say February 2008) it is $616, calculate the CPI.	02	3	CO3
	Part – B			
1.	The rapid growth of electric vehicles (EVs) in India has increased the demand for skilled EV technicians and battery maintenance experts. However, the limited availability of trained workers resulted in higher wages, labor shortages, and delays in service operations. To overcome this challenge, companies and the government introduced training and skill development programs to increase the supply of skilled labor. Analyze the impact of demand and supply forces on: a) Wages of EV technicians b) Employment opportunities c) Labor shortages in the EV sector d) Skill development initiatives	10	4	CO4
2.	The café industry in Bengaluru has become highly competitive due to the increasing number of cafés offering similar products such as coffee and snacks. To attract customers, cafés differentiate themselves through ambience, branding, pricing, customer service, and promotional activities. "Urban Brew Café," which initially enjoyed high profits, has started losing customers after the entry of new competitors offering attractive pricing and unique customer experiences. As a result, the café faces challenges in maintaining profitability and customer loyalty in a monopolistically competitive market. Based on the above case, discuss the role of monopolistic competition in business performance with reference to: a) Product differentiation and its impact on profit b) Advertising strategies used to attract customers c) Pricing strategies adopted by cafés d) Techniques for business survival in a competitive market	10	4	CO4

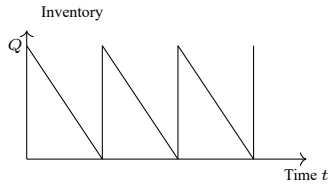

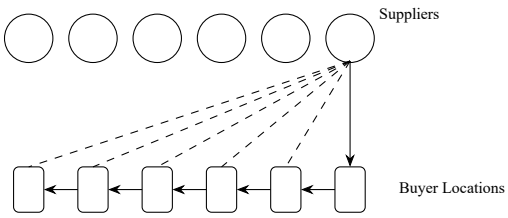

3.	a Illustrate the Oligopoly's version of the prisoner's dilemma with an example.	05	2	CO2
	b What is the expected economic impact of Budget 2026?	05	2	CO2
4.	India's electric vehicle (EV) industry is experiencing rapid growth due to government initiatives like FAME-II, rising fuel prices, and increasing environmental awareness. However, companies operating in this sector face challenges such as inadequate charging infrastructure, dependency on imported lithium-ion batteries, intense competition from domestic and global players, and rapidly changing technology. In this context, analyze how an Indian EV manufacturing company can use strategic planning to achieve sustainable growth, improve market share, and ensure long-term competitiveness in the evolving Indian automotive industry.	10	4	CO4
5.	Zeta Pharma, a Hyderabad-based pharmaceutical company supplying essential medicines across India, faced a sudden crisis in 2026 when geopolitical trade restrictions disrupted the import of a key raw material used in a life-saving drug. With only limited stock available, the company risked stopping production within weeks, affecting hospitals and patients nationwide. Since no standard procedure existed for such a disruption, top management had to take non-programmed managerial decisions under uncertainty. They evaluated options such as expensive emergency imports, prioritizing critical drug production, and collaborating with competitors or government agencies. The situation required quick judgment, risk analysis, and strategic thinking to ensure uninterrupted medicine supply. Give the analysis of the Risk analysis and strategic thinking to be adopted in the case.	10	4	CO4

RV College of Engineering®
Mysore Road, RV Vidyaniketan Post,
Bengaluru - 560059, Karnataka, India

DEPARTMENT OF
INDUSTRIAL ENGINEERING & MANAGEMENT

Date : 26.05.2026	**CIE – II**	**Max. Marks : 10 + 50**
Semester : VI	**UG**	**Duration : 30 + 90 Min**
Course Title: Supply Chain Management		**Course Code : IM362IA**

Note:
1. Answer all the Questions.
2. Use of Normal Distribution Tables permitted.

Sl. No	Questions	M	BT	CO
	Part – A			
1.	What is the inference drawn from this figure? 	2	2	CO3
2.	The primary role of cycle inventory is to allow different stages in the supply chain to purchase product in lot sizes that minimize the sum of the _____, _____, and _____ cost.	2	1	CO3
3.	A key to reducing lot size without _____ costs is to _____ the fixed cost associated with each lot.	2	1	CO2
4.	What is intermodal transportation?	2	1	CO2
5.	Identify the transportation design option that is illustrated in the sketch. List one application of this design. 	2	2	CO2
	Part - B			
1	With a help of suitable case example elucidate tailored transportation decision made based on size of customer.	10	2	CO2
2	Discuss trade-offs in transportation design with examples.	10	2	CO2
3	Demand for the Deskpro computer at Best Buy is 1,000 units per month. Best Buy incurs a fixed order placement, transportation, and receiving cost of $4,000 each time an order is placed. Each computer costs Best Buy $500 and the retailer has a holding cost of 20 percent. Evaluate the number of computers that the store manager should order in each replenishment lot, number of orders per year, annual inventory cost, and average flow time.	10	3	CO3

4	Weekly demand for HP printers at a Sam's Club store is normally distributed, with a mean of 250 and a standard deviation of 150. The store manager continuously monitors inventory and currently orders 1,000 printers each time the inventory drops to 600 printers. HP currently takes two weeks to fill an order. How much safety inventory does the store carry as a result of this policy? What fill rate does the store achieve? Assume that the supply lead time from HP is normally distributed, with a mean of 2 weeks and a standard deviation of 1.5 weeks. How much safety inventory should Sam's Club carry if it wants to provide a CSL of 95 percent?	10	3	CO3
5	Assume that weekly demand for phones at B&M Office Supplies is normally distributed, with a mean of 2,500 and a standard deviation of 500. The manufacturer takes two weeks to fill an order placed by the B&M manager. The store manager currently orders 10,000 phones when the inventory on hand drops to 6,000. Evaluate the safety inventory and the average inventory carried by B&M. Also evaluate the average time a phone spends at B&M. Weekly demand for Legos at a Wal-Mart store is normally distributed, with a mean of 2,500 boxes and a standard deviation of 500. The replenishment lead time is two weeks. Assuming a continuous review replenishment policy, evaluate the safety inventory that the store should carry to achieve a CSL of 90 percent.	05 05	4	CO3

Academic year 2025-2026(Even Sem)

DEPARTMENT OF
INDUSTRIAL ENGINEERING & MANAGEMENT

Course Code	**IM363IA**	**Duration**	**90 Min**
Sem	**VI Semester**	**Test-2**	
ERGONOMICS			

PART A

S No	Questions	M	BT	CO
1	How does repetitive motion contribute to musculoskeletal disorders?	02	L2	2
2	Define moment arm in the context of biomechanics.	02	L1	3
3	List any two types of controls used in human-machine systems.	02	L2	4
4	Differentiate between discrete controls and continuous controls.	02	L2	2
5	What are labels and icons in display design?	02	L2	2

PART B

S No	Questions	M	BT	CO
1	Design an ergonomic human-machine interface for a workplace of your choice by integrating suitable displays, controls, icons, labels, and navigation aids. Justify your design decisions based on ergonomic principles.	10	L4	1
2	Analyse the ergonomic risks associated with poorly designed displays and controls in workplaces. Discuss how improper interface design can contribute to work-related musculoskeletal disorders (WMSDs).	10	L3	3
3	Explain the different types of displays used in ergonomics and discuss the major tasks performed through displays in human-machine systems. Illustrate the role of monitoring displays and integrative displays with suitable examples.	10	L3	1
4	Describe the major causes of low back problems in workplaces. Explain the ergonomic risk factors that contribute to lower back injuries among workers.	10	L2	3
5	A worker in a warehouse repeatedly lifts heavy boxes from the floor to shoulder height. Using ergonomic principles and the NIOSH lifting guide, analyse the risks involved and suggest suitable ergonomic improvements.	10	L4	2

Human Resource Management & Analytics - IM364TA			

Part – A

S No	Questions	M	BT	CO
1.	Distinguish between *predictive validity* and *concurrent validity*.	01	L1	CO2
2.	Define *negligent hiring* in the context of HR selection.	01	L1	CO2
3.	What is meant by *validity* in employee testing?	01	L1	CO2
4.	What is an *in-basket exercise*?	01	L2	CO3
5.	Differentiate between orientation and onboarding.	01	L1	CO3
6.	What is on-the-job training?	01	L1	CO3
7.	Define appraisal interview.	01	L1	CO3
8.	Define graphic rating scale in performance appraisal	01	L2	CO3
9.	What is succession planning in talent management	01	L2	CO3
10.	A company identifies a gap between employee skills and job requirements. What is the first step in the training process?	01	L2	CO3

Part – B

S No	Questions	M	BT	CO
1.	List and describe eight types of employment tests used in employee selection. For each type, state: (i) what it measures, and (ii) the category of jobs or employees for which it is most suitable.	10	L2	CO2
2.	A multinational company is selecting candidates for a middle management role. Design a Management Assessment Centre for this role. Specify at least three simulations, the managerial competency each exercise measures, and how assessors should evaluate candidate performance in each exercise.	10	L3	CO2
3.	A bank introduced digital banking services, but employees lacked the technical skills to operate the new system effectively. Develop a suitable training program to help employees adapt to the technological changes.	10	L3	CO3
4.	A service organization plans to evaluate employee performance using feedback from supervisors, peers, subordinates, and customers. Recommend a suitable appraisal technique and explain how it can be implemented effectively.	10	L3	CO3
5.	Employees in a company often become defensive during appraisal interviews and fail to accept feedback positively. Develop guidelines for managers to conduct effective appraisal interviews that encourage employee improvement.	10	L3	CO3

INDUSTRIAL ENGINEERING & MANAGEMENT

Date : 25-05-2026	**CIE – II**	**Max. Marks : 10 + 50**
Semester : VI	**UG**	**Duration : 30 + 90 Min**
Course Title: Service Operations Management		**Course Code : IM365TDB**

Note:
1. Answer all the Questions.

Sl. No	Questions	M	BT	CO
	Part – A			
1.	Imagine you are going to watch an IPL cricket match at Namma Bengaluru's very own Chinnaswamy Cricket stadium, list 4 aspects that you associate regarding service experience.	2	1	1
2.	Assume you get in to an "IT enabled service" (ITES) industry in the next five years. Comment on how you intend to use Service as a competitive advantage.	2	4	3
3.	Assume you are being interviewed for your short but successful career in the field of "Service operations management". One of the questions from a young enthusiast is "How to develop a culture of service quality in an organization?" Comment any two aspects.	2	4	2
4.	Some of you have already started preparing for campus placements. In a year from now, many of your juniors would want your suggestions **(If placed)** and help in many matters of campus placements. To cater to this need and based on some of the requirement analysis that you have done, you wish to start a service and name it as "**Placement war room**" for engineering graduate students. Now answer the following questions. 1. Will it be online or offline and why? 2. What are the unmet needs of graduate students that your service will fulfil?	2	4	4
5.	If your "**Placement war room**" idea clicks and is appreciated by your initial target audience. Identify any 2-success metrics of your service? Also, comment on the possible perception expectation gap for your service.	2	4	3
	Part – B			
1	Discuss the role of technology in developing the customer Experience. Cite two examples of services where technology has been used effectively to enhance customer experience.	10	3	4
2	The nature of supply chains can be very messy and complex. Describe the key issues service operations managers should focus on with a key focus on managing through intermediaries.	10	3	4
3	Write short notes on a) Service level agreements (SLA) b) Difference between SLA and Operational Level Agreements (OLA)	5*2=10	2	3
4	Envisage/visualize an experience map for a customer visiting a typical dental clinic.	10	4	2

5	One of the key decisions for procurement function is choosing/selecting a supply partner and particularly for those who handle critical elements of supply chain. Discuss the criteria for supplier selection excluding Cost and Quality.	10	3	4

Semester : VI	**UG**	**Duration : 30 + 90 Min**
Course Title: Design of Experiments		**Course Code : IM365TDD**

Instructions to Students:
1. Answer all questions
2. Use of statistical tables permitted

Sl. No	Questions	M	BT	CO
	Part – A			
1.	Define "Sparsity of Effects Principle."	2	1	CO1
2.	If you have a 2^5 design, how many total treatment combinations are required for a single replicate?	1	1	CO1
3.	Compare the 2^2 design and 3^2 designs in terms of modeling.	2	1	CO2
4.	What is "Confounding" in factorial experiments?	2	2	CO2
5.	Define "Aliasing" in fractional factorial designs.	1	2	CO2
6.	Evaluate the risk of using a Resolution III design for a process where two-factor interactions are known to be significant.	2	2	CO2
	Part – B			
1	An engineer is interested in the effects of cutting speed (A), tool geometry (B), and cutting angle (C) on the life (in hours) of a machine tool. Two levels of each factor are chosen, and three replicates of a 2^3 factorial design are run. The results are as follows:	20	2	CO4

A	B	C	Treatment Combination	Replicates		
				I	II	III
−	−	−	(1)	22	31	25
+	−	−	a	32	43	29
−	+	−	b	35	34	50
+	+	−	ab	55	47	46
−	−	+	c	44	45	38
+	−	+	ac	40	37	36
−	+	+	bc	60	50	54
+	+	+	abc	39	41	47

i. Estimate the factor effects. Which effects appear to be large?
ii. Use the analysis of variance to confirm your conclusions for part (i).

<table>
<tr><td>2</td><td>The effects of developer strength (A) and development time (B) on the density of photographic plate film are being studied. Three strengths and three times are used, and four replicates of a 3^2 factorial experiment are run. The data from this experiment follow. Analyze the data using the standard methods for factorial experiments.
<table>
<tr><td colspan="2" rowspan="2"></td><td colspan="12">Development Time (minutes)</td></tr>
<tr><td colspan="4">10</td><td colspan="4">14</td><td colspan="4">18</td></tr>

ELEMENTS OF FINANCIAL MANAGEMENT (Institutional Elective)			

Note:
1. Answer all the Questions.
2. Use of Interest factor tables permitted.

PART – A

S No	Questions	M	BT	CO
1	Distinguish between the terms, Risk and Return in Financial Management.	2	2	2
2	What is meant by "Yield to Maturity" (YTM) of a bond.	2	1	2
3	Mention the three key inputs required to perform the valuation of an Asset.	2	2	2
4	What is meant by Required Rate of Return in the context of valuation of securities.	2	2	2
5	Distinguish between the terms Market Risk and Unique Risk.	2	2	2

PART – B

S No	Questions	M	BT	CO
1.a	Explain why a bond sells at a premium or discount.	5	4	2
b	A 5-year bond, coupon rate 8%, par value ₹1,000, required return 10%. Find bond price.	5	3	2
2.a	A bond has a par value ₹1,000, coupon rate 12%, maturity 5 years, current price ₹950. Compute the Yield to Maturity (YTM).	5	3	2
b	A company is expected to pay a dividend of ₹5 next year. Required rate of return is 12%. Expected price after one year is ₹55. Calculate the current value of the share.	5	3	2
3.a	A share is priced at ₹80. Dividend expected next year is ₹6. Growth rate is 4%. Find the required rate of return.	5	4	2
b	Analyse how diversification in investment portfolio reduces risk.	10	3	2
4.	An asset has returns of 10%, 15%, and 20% with probabilities 0.2, 0.5, and 0.3. Find expected return and also the variance of return.	10	3	2
5.	Enumerate the steps involved in Capital Budgeting Process.	10	2	3

Principles of Management and Economics - HS261TA		

Note:
1. Answer all the Questions.

Sl. No	Questions	M	BT	CO
	Part – A			
1.	Differentiate between strategic goals and operational goals.	02	2	2
2.	In the BCG matrix, what does a "Cash Cow" represent?	02	2	2
3.	List any two types of corporate strategies and provide examples.	02	1	2
4.	How does an organic structure differ from a mechanistic structure?	02	2	2
5.	If the price elasticity of demand for a product is -0.5 and the price elasticity of supply is +2.5, what do these values imply about consumer and producer responses to price changes?	02	2	4
	Part – B			
1.	Explain the strategic management process. Discuss each stage briefly and explain how this process helps organizations achieve their long-term objectives.	10	3	2
2.	A new entrant in the online grocery market wants to survive among large players like Amazon Fresh and BigBasket. a) Use Porter's Five Forces to analyze the challenges. b) Suggest a competitive strategy the company should adopt and why.	10	4	2
3.	A growing bakery business is expanding from one shop to five locations. The owner notices confusion among staff regarding their tasks, delays in decision-making, and poor coordination between branches. a) Explain the key elements of organizational structure. b) For each element, suggest practical changes the company can implement to resolve the issues the bakery. Explain how these changes will improve organizational effectiveness.	10	3	2
4.	Explain the concepts of demand and supply using appropriate diagrams. How is equilibrium price and quantity determined in a competitive market? What happens when there is a shift in either demand or supply?	10	2	4

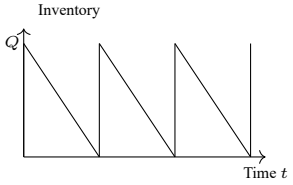

5.	Two segments of the food delivery market are being studied: • Segment A includes dozens of local restaurants offering similar menus but trying to stand out through branding, discounts, and customer experience. • Segment B includes just three major food delivery platforms that dominate logistics, pricing control, and customer data. **Questions:** a) Identify which segment represents **monopolistic competition** and which represents **oligopoly**, justifying your answer with characteristics of each market structure. b) Compare and contrast the pricing strategies and customer acquisition methods used in both segments. c) As a new entrepreneur entering the market, which segment would you prefer to compete in and why? Base your answer on market behavior, barriers to entry, and strategic flexibility.	10	4	4

4.	List the Macro-economic factors influencing network design decisions.	2	1	CO2
5.	Illustrate different flexibility configurations in network.	2	1	CO2
	Part –B			
1	Develop the framework for network design decisions. Analyze the various phases.	10	3	CO2
2	Explain the methodology of evaluating network design decisions using decision trees.	10	3	CO2
3	Demand for the Deskpro computer at Best Buy is 1,000 units per month. Best Buy incurs a fixed order placement, transportation, and receiving cost of $4,000 each time an order is placed. Each computer costs Best Buy $500 and the retailer has a holding cost of 20 percent. Evaluate the number of computers that the store manager should order in each replenishment lot, number of orders per year, annual inventory cost, and average flow time.	10	3	CO3
4	Write a detailed note on multi-echelon cycle inventory.	10	2	CO3
5 a.	Assume that weekly demand for phones at B&M Office Supplies is normally distributed, with a mean of 2,500 and a standard deviation of 500. The manufacturer takes two weeks to fill an order placed by the B&M manager. The store manager currently orders 10,000 phones when the inventory on hand drops to 6,000. Evaluate the safety inventory and the average inventory carried by B&M. Also evaluate the average time a phone spends at B&M.	05	4	CO3

5 b.	Weekly demand for Legos at a Wal-Mart store is normally distributed, with a mean of 2,500 boxes and a standard deviation of 500. The replenishment lead time is two weeks. Assuming a continuous review replenishment policy, evaluate the safety inventory that the store should carry to achieve a CSL of 90 percent.	05

DEPARTMENT OF
INDUSTRIAL ENGINEERING & MANAGEMENT

Date : 9th June 2025	**CIE – 2**	**Max. Marks : 10 + 50**
Semester : VI	**UG**	**Duration : 30 + 90 Min**
Course Title: ERGONOMICS		**Course Code : IM363IA**

Note:
1. Answer all the Questions.

Sl. No	Questions	M	BT	CO
	Part – A			
1.	Which type of control is most suited for precise positioning tasks?	01	L_2	CO1
2.	What is the principle of "legibility" in display design?	01	L_1	CO2
3.	What ergonomic principle recommends grouping related controls together?	01	L_2	CO2
4.	Give one example, on how you utilize the concept of minimizing information access cost to ATM screen design.	01	L_3	CO1
5.	State where a desktop monitor should be positioned for ergonomic efficiency based on anthropometric data.	01	L_2	CO2
6.	State how the redundancy gain principle is used in designing emergency alerts.	01	L.2	CO2
7.	What is the primary ergonomic concern in designing for children?	01	L_2	CO2
8.	Give one example of assistive technology.	01	L_1	CO1
9.	What is one reason to avoid "one-size-fits-all" designs?	01	L_2	CO2
10.	Name one cognitive difference relevant in the design for children.	01	L_1	CO1
	Part – B			
1.	Explain how you would apply the Principles of Display Design when designing a monitoring panel in an industrial plant.	10	L_3	CO2
2.	Compare and contrast discrete and continuous controls in terms of their ergonomic applicability with suitable examples.	10	L_3	CO2
3 a.	Briefly outline how the principles of Fitts's Law is applied to justify the optimal placement of frequently used touch controls on a tablet interface.	05	L_3	CO3
b.	A user navigates to a target 160 mm away and 40 mm wide. With a = 80 and b = 90, compute movement time.	05	L_3	CO2
4.	How can anthropometric data be used to improve the user interface of a digital product? Provide examples involving touchscreens, workstations, or ATMs.	10	L_3	CO2
5.	Discuss the special considerations to be taken into account when designing for children. Highlight how anthropometric data of children differs from that of adults.	10	L_4	CO4

Semester : VI	**UG**	**Duration : 30 + 90 Min**
Course Title: FACILITIES PLANNING AND DESIGN		**Course Code : IM365TDA**

Note: Answer all the Questions.

PART A

Q No.1	Questions	M	BT	CO
1.1	Given station times: • Station 1: 5 min • Station 2: 4 min • Station 3: 6 min Find the bottleneck.	01	2	1
1.2	Total task time = 20 minutes, Number of workstations = 4, Cycle time = 6 minutes Find line efficiency.	02	1	1
1.3	Calculate Throughput Time. Given: • Station A: 2 min • Station B: 3 min • Station C: 4 min What is the total throughput time for one product?	02	2	1
1.4	If a production unit has limited floor space and needs to allow a single operator to handle multiple machines easily, which layout (S-flow or U-flow) is better?	01	1	1
1.5	Define a unit load as per Tanchoco et al.	02	2	1
1.6	List any two basic methods of moving the unit load according to Apple.	01	1	1

Part –B

Sl. No	Questions	M	BT	CO
1	State and explain the different types of material flow with suitable examples.	10	2	1

<table>
<tr><td>2</td><td>A factory is designing a new assembly line for producing electric scooters. The production involves 5 sequential tasks with the following task times (in minutes):
<table><tr><th>Task</th><th>Time (min)</th></tr><tr><td>A</td><td>4</td></tr><tr><td>B</td><td>6</td></tr><tr><td>C</td><td>5</td></tr><tr><td>D</td><td>3</td></tr><tr><td>E</td><td>2</td></tr></table>The management is considering either a Straight Line Flow layout or a U-Flow layout. Tasks:
a) Calculate the total time required to complete one unit.
b) Identify the bottleneck in the process.
c) If the total cycle time is 6 minutes and there are 3 workstations, compute the line efficiency.
d) Which layout (S-Flow or U-Flow) would you recommend if space is limited and one operator needs to handle multiple stations? Justify your answer</td><td>10</td><td>3</td><td>3</td></tr>
<tr><td>3</td><td>What are the Factors for Consideration in Planning Material Flow</td><td>10</td><td>2</td><td>2</td></tr>
<tr><td>4</td><td>Enumerate and elaborate the steps in material handling system design.</td><td>10</td><td>1</td><td>2</td></tr>
<tr><td>5</td><td>Explain the guidelines for estimating the material handling costs in practice.</td><td>10</td><td>1</td><td>1</td></tr>
</table>

Course Title: Service Operations Management		**Course Code : IM365TDB**

Note:
1. Answer all the Questions.

Sl. No	Questions	M	BT	CO
	Part – A			
1.	Think of a time when you recently received poor service. If service operations are so important, identify reasons why poor service is delivered sometimes?	2	2	1
2.	Assume you get in to an "IT enabled service" (ITES) industry in the next five years. Comment on how you intend to use Service as a competitive advantage.	2	4	3
3.	What is the service concept of "Cyber nurseries".	2	2	2
4.	Comment on the importance of service process design.	2	3	4
5.	From your experience, give two examples where technology is used to enhance customer experience.	2	2	2
	Part – B			
1	Discuss the role of technology in developing the customer Experience. Cite two examples of services where technology has been used effectively to enhance customer experience.	10	3	4
2	The nature of supply chains can be very messy and complex. Describe the key issues service operations managers should focus on with a key focus on managing through intermediaries.	10	3	4
3	Write short notes on a) Service level agreements (SLA) b) Difference between SLA and Operational Level Agreements (OLA)	10	2	3
4	Visualize an experience map for a customer visiting a typical dental clinic.	10	4	2
5	One of the key decisions for procurement function is choosing/selecting a supply partner and particularly for those who handle critical elements of supply chain. Discuss the criteria for supplier selection excluding Cost and Quality.	10	4	4

Note:
1. Answer all the Questions.

Sl. No	Questions	M	BT	CO
	Part – A			
1.	Differentiate between content validity and criterion validity in test.	02	L1	CO2
2.	Define unstructured interview and structured interview.	02	L2	CO2
3.	Mention the ways to evaluate training effectiveness.	02	L2	CO3
4.	Define behaviorally anchored rating scale.	02	L1	CO3
5.	Explain reactive decision-making and predictive decision-making in HR.	02	L2	CO3
	Part – B			
1.	Elaborate on the major types of employment selection tests that organizations use during recruitment. For each category, describe its purpose, what it measures, and provide relevant job-related examples to illustrate its application in real-world hiring.	10	L2	CO2
2.	Describe the different types of interviews used in the selection process with examples and how does theses interview types help assess candidate suitability.	10	L3	CO2
3.	Imagine you are responsible for implementing a training program. Outline the systematic steps involved in designing and executing an effective training process. For each step, explain its role and importance in ensuring the training meets both organizational and employee development goals.	10	L3	CO3
4.	Identify frequent challenges or errors that reduce the effectiveness of performance appraisals. Suggest strategies or best practices that can be adopted to minimize these issues and improve the overall fairness, accuracy, and impact of the appraisal system.	10	L2	CO3
5.	Describe the framework of HR Analytics. Discuss the key components and explain how they contribute to strategic HR decision-making.	10	L2	CO3

S No	Questions	M	BT	CO
1	Among the various gas turbine engine derivatives, _____ engine has the lightest specific weight.	01	L1	1
2	Achieving thrust reversals is quite easy in case of _____ engines.	01	L2	2
3	_____ aids in decreasing the speed and increasing the torque of the propeller shaft connecting the propeller and the turbine of the engine.	01	L2	3
4	Fluid Friction is one of the major factors contributing towards the increase of _____ in an Ideal Brayton cycle.	01	SL2	2
5	_____ is an aerodynamic force acting perpendicular to the chord of a cambered airfoil.	01	L3	2
6	_____ is defined as the location on an airfoil where the distribution of forces results in zero moment.	01	L2	1
7	To get additional lift during take-off, the pilot needs to deploy _____ of an airplane.	01	L2	2
8	Define aerodynamic center of a wing.	01	L2	4
9	What is meant by by-pass ratio of a turbofan engine.	01	L2	4
10	List the various types of drag experienced by a airplane in flight.	01	L2	3
	PART B			
1	Depicting the various components of a pure turbojet engine on neat sketch, explain its working principle. Also, list the advantages and disadvantages of the turbojet engine.	10	L1	CO2
2	Illustrating a neat sketch of a gas turbine engine, explain the operation of Brayton cycle.	10	L3	CO3
3	Define stalling. With a neat sketch, explain the physical phenomenon of the occurrence of stall with respect to the airfoils angle of attack.	10	L2	CO2
4	An aircraft has an effective wing area of $78m^2$. It is in level flight at a speed of 750km/h at an altitude where the density is $0.467kg/m^3$. If the weight of the aircraft is 495kN. Find the coefficient of lift for the wing section. If the coefficient of drag is 10% of the C_L. Determine the thrust required for level flight.	10	L3	CO4
5	Draw a neat diagram of a typical wing planform geometry. Highlight all the parts of the wing and explain.	10	L3	CO3

Answer all questions in Part A & Part B, Answer Part A in first two pages in sequence only

Part A

S No	Questions	M	BT	CO
1	Multiple sequence analysis consists _____ or more number of sequences.	1	2	1
2	Needleman_Wunsch algorithm can be applied for _____ alignment.	1	2	1
3	A phylogenetic tree represents _____	1	2	2
4	Among the PAM1 and PAM250, which one has the more distant?	1	3	2
5	Differentiate between the opening and extension gap penalties.	2	2	3
6	What is null hypothesis?	2	4	3
7	Mention any 2 measures of statistical significance.	2	2	4

Part B

S No	Questions (Test)	M	BT	CO
1.	Illustrate on the various types of sequence alignments. Explain any one in brief.	10	2	3
2	How does the scoring matrix helps to derive the interpretation among sequence alignment?	10	3	3
3	Elucidate on the profiles and Hidden Morkov Models for bioinformatics data.	10	4	4
4	Differentiate between PAM and BLOSSUM and write its significance.	10	4	4
5	Write an overview of molecular phylogeny.	10	2	3

Course Title: Industrial Safety Engineering		**Course Code: CH266TEC**

S No	Questions	M	BT	CO
1	What is the certainty coefficient if cash outflow to a project is 100000 and certain cash flow is 50000?	02	03	02
2	Determine Severity Rate with two recordable injuries, if an employee breaks leg on a Monday, and loses the rest of that day plus three additional days of work, then the employee comes back to work the following Friday and is given restricted work tasks, and then loses another two days.	02	03	02
3	Expand RADR and OIR	02	02	02
4	Write process hazard worksheet table that is used in PHA analysis.	02	02	2
5	Write Fault tree event symbols for basic event and underdeveloped event.	02	02	2
	PART B			
1	What is Fault Tree? Construct the Fault and Event trees for the process consist of reactor system with heating and cooling arrangement to maintain constant reactor temperature.	10	03	03
2	What is Preliminary hazard analysis? Classify and explain preliminary hazard analysis table for FMEA, HAZOP and operator related hazards.	10	02	02
3	Draw a flowchart and explain the basic concept of Safety Domain Ontology.	10	01	03
4	A project is required to invest INR. 1,10,000 and is expected to generate cash flow after tax over its economic life time of 5 years of INR 20,000, INR30,000, INR35,000, INR 55,000 and INR 10,000. Risk free interest rate is 7 per cent and decision maker interested to add 3 per cent as risk premium for the project. Calculate NPV using RADR approach and suggest on the acceptability of the project.	05	03	03
5	The following are the possible net cash flows of Project X and Y and their associated probabilities. Both projects have a discount rate 10 per cent. Calculate the expected NPV for each project if initial investment in both cases is 5000. Calculate variance, standard deviation and coefficient of variation and comment which project is preferable?	15	03	04

PART A

S No	Questions	M	BT	CO
1.	List the actions that cannot be recorded in UiPath	02	2	1
2.	What is an UI element?	01	2	1
3.	To extract information from virtual environment _____ output method is used	01	1	1
4.	Define data scraping.	01	1	2
5.	What is relative scraping? How does it work?	02	2	1
6.	Outline different types of user interfaces in UiPath.	02	2	2
7.	_____ activity is used to extract data from the DataTable.	01	1	1

PART B

S No	Questions	M	BT	CO
1. a	Discuss different types of recorders in UiPath. Explain any two.	06	2	2
b	Describe copy activity of the recorder in UiPath.	04	3	2
2. a	List the various input methods supported in UiPath and discuss the key differences between them.	06	2	3
b	Identify the steps of data scraping wizard.	04	3	3
3. a	Describe in detail OCR output method provided in UiPath.	04	3	3
b	Explain various activities related to Data Scraping.	06	3	2
4. a	Elaborate on various types of selectors available in UiPath.	04	2	2
b	Analyse the usage of the UI Explorer with an appropriate example.	06	3	2
5. a	Name and explain the processes involved in Retrieving Information.	04	4	3
b	What are anchors? Describe its usage in PDF documents with a workflow.	06	4	4

Course Outcomes

CO1	Understand RPA principles, its features and applications
CO2	Demonstrate proficiency in handling variables and decision making inside a workflow and data manipulation techniques.
CO3	Gain insights into recording, email automation and exception handling and orchestrator
CO4	Analyze the trends in automation and choose business strategy to design a real world automation workflow.

DEPARTMENT OF
INDUSTRIAL ENGINEERING & MANAGEMENT

Date : 4th June 2025	**CIE– II**	**Max. Marks : 10 + 50**
Semester : VI	**UG**	**Duration : 30 + 90 Min**
Course Title: Elements of Financial Management (Institutional Elective)		**Course Code : IM266TEQ**

Note:
1. Answer all the Questions.
2. Avoid verbose answers and answer specifically and to the point.

Sl. No	Questions	M	BT	CO
	Part – A			
1.	List the three commonly used approaches employed for valuation of equities.	02	L3	CO2
2.	Distinguish between Market Risk and Unique Risk.	02	L2	CO2
3.	In the context of long- term financing, distinguish between Equity and Debt in terms of the ownership rights to the investor.	02	L2	CO4
4.	What does the term Yield to Maturity represent?	01	L2	CO2
5.	What does the term "Risk" in Finance primarily refer to?	01	L1	CO3
6.	Mention any one capital budgeting technique that considers the time value of money.	01	L1	CO3
7.	Name the capital budgeting technique that calculates profitability as a percentage of investments.	01	L1	CO3
	Part – B			
1 a.	A bond with a face value of ₹1,000 carries a coupon rate of 10% and matures in 5 years. If the required rate of return is 8%, calculate the value of the bond.	05	L3	2
b.	A bond with a face value of ₹1,000 sells for ₹950. It has a 10% annual coupon and matures in 5 years. Calculate the Yield to Maturity.	05	L3	2
2 a.	An investor is analysing a stock with the following possible returns and probabilities: Scenario / Return (%) / Probability Boom / 20 / 0.3 Normal / 10 / 0.5 Recession / -5 / 0.2 Calculate the Expected Return and also the Standard Deviation of the returns.	07	L3	2
b.	Relationship between risk and Return is one of the fundamental Principles in Financial decisions in organizations. Justify	03	L2	2
3.	Enumerate the steps involved in Capital Budgeting Process.	10	L2	3

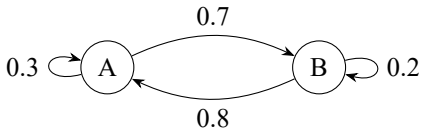

4 a.	There are two Projects for consideration. Apply Net Present Value method and determine the Project to be chosen. Project A: ₹20,000 investment, ₹6,000 for 5 years Project B: ₹20,000 investment, ₹10,000 for 2 years Rate = 10%	05	L4	3
b.	A project costs ₹150,000 with no residual value. It yields accounting profits of ₹10,000, ₹12,000, ₹14,000, ₹16,000, and ₹18,000 over 5 years. Calculate Average Rate of Return and interpret.	05	L4	3
5.	Explain any Five sources of long term finance available to business organizations.	10	L2	4

Bengaluru - 560059, Karnataka, India

Department of Mathematics

Date: 04/06/2025	**CIE - 2**	**Max. Marks: 100**
Semester: VI	**UG**	**Duration: 2 Hrs. (2pm-4pm)**
Course Title: Mathematical Modelling		**Course Code: MA266TEU**

SL. No	Quiz: Questions	M	BTL	CO
1	The Fibonacci Numbers 1, 1, 2, 3, 5, 8, 13, 21,…can be modelled in a difference equation of the form _____.	2	2	2
2	Solve $u_{t+1} = 8x_t$, $x_0 = \frac{1}{2}$.	2	1	1
3	With respect to a characteristic brown eyes, suppose the proportions of the dominants, hybrids and recessives in 9th generation are p_9, q_9 and r_9 respectively, then r_{10} = _____, and q_{10} = _____.	2	1	1
4	In the long run, the proportion of time that the given Markov chain will be in state A is _____ and state B is _____. 	2	3	2
5	Find the fixed probability vector of the stochastic matrix $A = \begin{bmatrix} 3/4 & 1/4 \\ 1/2 & 1/2 \end{bmatrix}$.	2	3	3
SL. No	**Test**	**M**	**BTL**	**CO**
1.	Develop a model through difference equations in genetics based on Hardy-Weinberg law.	10	2	2
2.	Discuss Cobweb model about the variation of price and quantity of a commodity produced by a farm.	10	2	2
3.	Prove that the Markov chain with transition probability matrix $\begin{bmatrix} 0 & 2/3 & 1/3 \\ 1/2 & 0 & 1/2 \\ 1/2 & 1/2 & 0 \end{bmatrix}$ is irreducible. Also find its stationary probability vector.	10	3	2
4. a	Suppose a person borrows a sum S_0 at compound interest i and wants to 'amortize' his debt and S_t be the amount due at the end of t years. Model this in the form of a difference equation and find the amortization factor.	6	3	3
4. b	A college professor drives or takes the college bus to reach the college. If he drives to work, then the next day he takes the bus with the probability 0.2. On the other hand if he takes the bus, then the next day he drives with probability 0.3. Find the transition matrix for the chain of mode of transport.	4	3	3

5	Consider a network containing five individuals viz. A, B, C, D and E. The system A can communicate to B and C; B can communicate to A and C; C can communicate to A, B and D; D can communicate to C and E; and E can communicate to B only. Assuming that if a person can communicate with n people, he will send a message to any one of them with probability $1/n$, rank the five people in accordance with their importance in the network in the long run.	10	4	3

**** ALL THE BEST ****

Department of Mathematics

Date: 04-06-2025	**CIE 2**	**Max. Marks: 10+50**
Semester: VI	**UG**	**Duration: 2 Hrs (2PM-4PM)**
Course Title: Mathematics of Quantum Computing		**Course Code: MA266TEV**

S No	Quiz	M	BT	CO
1.	How many queries does the Deutsch-Jozsa algorithm require to determine whether a function is constant or balanced? What is the co-domain of the function involved?	2	1	1
2.	In the Bernstein-Vazirani problem, we are given a function $f(x) = a \cdot x \; mod 2$. What does the algorithm help us find? How many Hadamard gates are utilized in it?	2	1	1
3.	The Phase gate S modifies which component of a qubit? What is the modification?	2	2	2
4.	In the Deutsch-Jozsa algorithm, why is quantum parallelism crucial?	2	3	3
5.	What mathematical technique is used in Simon's algorithm to extract the hidden string s?	1	2	3
6.	Which gate sequence can create the Bell state $\frac{1}{\sqrt{2}}(\|00\rangle + \|11\rangle)$?	1	2	2
Sl No	**Test**	**M**	**BT**	**CO**
1.	Use the Z-Y decomposition technique to factorize the unitary $U = \begin{bmatrix} \frac{1}{\sqrt{2}} & \frac{1}{\sqrt{2}} \\ \frac{1}{\sqrt{2}} & -\frac{1}{\sqrt{2}} \end{bmatrix}$ into a sequence of rotations around the Z and Y axes, including any overall phase factor.	10	2	1
2.	Describe the Deutsch Algorithm and its purpose. For a single-qubit oracle function $f : \{0,1\} \to \{0,1\}$, derive the final state after applying the Deutsch circuit, starting from $\|0\rangle\|1\rangle$, and explain how the measurement distinguishes between constant and balanced functions.	10	3	3

Note:
Answer all the Questions

Sl. No	Questions	M	BT	CO
	Part – A			
1.	List the characteristics of Intelligence Tests.	2	L1	CO1
2.	What is the main purpose of an aptitude test?	2	L2	CO2
3.	Define the concept of reciprocal determinism in Bandura's social-cognitive theory of personality.	2	L2	CO3
4.	How do people high in self-esteem differ from those low in self-esteem?	2	L2	CO4
5.	What is Frustration? Mention the important sources of Frustration.	2	L1	CO3
	Part – B			
1	A 12-year-old boy is performing poorly in school despite appearing attentive and hardworking. His teachers believe he might have a learning disability, but his parents think he is just not interested in academics. The school counselor decides to administer an intelligence test. What type of intelligence test would be most appropriate for the boy's case—verbal or non-verbal? Why?	10	L2	CO1
2	A software company wants to hire interns for a programming role. To ensure the best candidates are chosen, they design an assessment that includes a programming aptitude test. Explain how aptitude tests can be standardized to ensure fairness in employee selection.	10	L2	CO2
3	Seth constantly struggles between doing what he wants and what he believes is "right." He often feels guilty even after small personal indulgences and describes a persistent inner conflict that drains his energy. Explain what happens if there is an imbalance among the three structures of personality.	10	L3	CO2
4	A 21-year-old college student named Beck is facing difficulty in choosing a career path. He says he feels "lost" and cannot make decisions confidently. A clinical psychologist chooses to administer the Thematic Apperception Test (TAT). How can the TAT help uncover underlying aspects of Beck's personality that may be influencing his indecisiveness?	10	L2	CO2
5	James, a 35-year-old marketing executive, has been working overtime for months due to a major project deadline. He notices increased anxiety, irritability, and stomach problems. His family complains he's emotionally distant. Explain how potential sources of psychological stress might be affecting James' health.	10	L4	CO2

Universal Human Values – III			

Sl. No.	Quiz	M	BT	CO
1	The need for continuous happiness is fulfilled by _____ & _____.	02	1	1
2	Human being is the coexistence of _____ and _____.	02	1	1
3	Enlist any two higher activities of the self.	02	1	2
4	Name any two examples of physical order and bio order	02	2	2
5	Temporary happiness is to _____ Continuous happiness is to _____.	01	2	1

Sl. No.	Test	M	BT	CO
1	Write a detailed note on innateness, natural characteristics and inheritance of four orders in nature.	10	1	1
2	(i) Explain the sources of continuous happiness and temporary happiness with an example. (ii) Which are the three bases of selecting, tasting is satisfied in mother's cooked food?	5	2	2
		5	3	2
3	Explore the role of the human being as the knower, experiencer and doer in the domain of right understanding.	10	3	3
4	Elaborate the impact of right understanding on the conduct of human being.	10	3	3
5	Discuss how the higher activities of the self-guides the lower activities and brings the harmony at all levels.	10	2	2

Course outcomes:

CO 1	Understand the basic human aspiration with program of its fulfillment and meaning of resolution in the complete expanse of human living
CO 2	Understand human being in depth and see how self is central to human being
CO 3	Understand existence in depth and see how coexistence is central to existence
CO 4	Understand human conduct and the holistic way of living leading to human tradition

PRINCIPLES OF MANAGEMENT AND ECONOMICS			

Note:
1. Answer all the Questions.

Sl. No	Questions	M	BT	CO
	Part – A			
1	_____ plans are specifically designed to meet the needs of a unique situation.	01	1	1
2	Creating or changing the organization structure is called _____.	01	1	1
3	Identify the Quadrant of the BCG Matrix which represents high market share and high market growth.	01	1	1
4	_____ planning bridges the gap between strategic goals and operational tasks.	01	1	2
5	_____ refers to how standardized an organization's jobs are and the extent to which employee behaviour is guided by rules and procedures.	01	1	1
6	A rigid, tightly controlled structure, characterized by high specialization is a characteristic of _____ organization.	01	1	2
7	Draw the circular flow diagram with reference to microeconomics.	02	1	4
8	The rate of increase in prices over a given period of time is defined as _____.	01	1	4
9	The _____ measures the change in prices paid by consumers for goods and services.	01	1	5
	Part – B			
1	Many companies have a goal of becoming more environmentally sustainable. One of the most important steps they can take is controlling E-waste. You've been put in charge of creating a program to do this for your company to develop plans. Describe your plans in terms of being: (a) Strategic and operational. (b) Short term and long term.	10	2	2
2	Bring out the ways in which a firm could be organized for smooth functioning. How the Chain of command and Span of control does affect the efficient functioning of the firm.	10	2	2
3	An organization should be viewed as a unified, purposeful system composed of interrelated parts. Illustrate using food industry as an example.	10	4	1
4	Will the firms in an oligopoly act more like a monopoly or more like competitors? Briefly explain with suitable example.	10	3	4

5	A rapidly developing country has hired you to present a specific strategy for keeping their inflation and unemployment rates low while maintaining a healthy rate of GDP growth. Explain in detail the components of GDP that can be used to accomplish this.	10	3	4

Elements of Financial Management (Institutional Elective)			

Note:
1. Answer all the Questions.

Sl. No	Questions	M	BT	CO
	Part – B			
1a	A Rs.200/-par value bond carries a coupon rate of 12% and maturity period of 8 years. The interest rate is payable semi-annually. Compute the value of the bond if Required Rate of Return is 14%.	5	3	CO1
b	The expected dividend per share is Rs.12/-. The dividend is expected to grow at the rate of 7% per year. If the price of the share is Rs.145/- now, determine the Expected rate of Return.	5	3	CO1
2a	The current dividend for an equity share is Rs.6/-. If the constant compound growth rate is 6%, determine the dividend 10 years hence.	5	3	CO1
b	The price per bond of M/S. Akshara Industries is Rs.180/-. The par value of the share is Rs.200/-. The coupon rate of the bond is 14%. The maturity period for the bond is 6 years. Determine the Yield to Maturity for the investor.	5	3	CO1
3	The stock of Box Limited performs well relative to other stocks during recessionary periods. The stock of Cox Limited, on the other hand, does well during growth periods. Both the stocks are currently selling for ₹ 100 per share. You assess the rupee return (dividend plus price) of these stocks for the next year as follows:	10	4	CO1

	Economic Condition			
	High Growth	**Low Growth**	**Stagnation**	**Recession**
Probability	0.3	0.4	0.2	0.1
Return on Box's Stock	100	110	120	140
Return on Cox's Stock	150	130	90	60

Calculate the expected return and standard deviation of investing:
(i) ₹ 1,000 in the equity stock of Box Limited
(ii) ₹ 1,000 in the equity stock of Cox Limited

4a	Enumerate the steps involved the process of Capital Budgeting.	5	2	CO2

Academic year 2023-2024 (EVEN Sem)

b	A project which is being evaluated by a firm has a cost of capital of 12%. The initial outlay for the project is Rs.2 lakhs. The benefits accrued for the next four years are given below. Year | 1 | 2 | 3 | 4 Amount (Rs) | 50,000 | 80,000 | 80,000 | 1,00,000 Calculate the Benefit Cost Ratio and Net Benefit Cost Ratio for the project. Also based on the standard decision criteria, suggest the feasibility of investing in the project.	5	4	CO2
5	Long-term finance is critical for a company's growth and stability, providing the necessary capital to fund substantial investments and strategic initiatives. In the light of the above statement, provide a brief review of different types of sources.	10	2	CO3
