| **Course Title: STATISTICS FOR DATA ANALYTICS** | | **Course Code : IM241AT** |

Note:
1. Answer all the Questions.

| Sl. No | Questions | M | BT | CO |
|---|---|---|---|---|
| | **Part – A** | | | |
| 1. | The binomial distribution models the number of _____ in a fixed number of independent trials. | 1 | 2 | 2 |
| 2. | The area under the curve of a normal distribution represents the total probability and is always equal to _____. | 1 | 1 | 2 |
| 3. | If the number of calls received per hour at a call center is Poisson distributed with a mean of 4, what is the probability that exactly 2 calls are received in an hour? | 2 | 3 | 2 |
| 4. | Enumerate any two real-life situations where the continuous uniform distribution can be applied. | 2 | 2 | 2 |
| 5. | What is the memoryless property of exponential distribution? | 2 | 2 | 2 |
| 6. | For a normal distribution with $\mu = 70$, $\sigma = 8$, find $P(62 < X < 78)$. | 2 | 2 | 2 |
| | **Part – B** | | | |
| 1 | Past experience indicates that the ticket office at the Rex Theatre receives a mean rate of thirty calls per hour. Assuming that the number of calls have the Poisson distribution, find the probability that<br>a) during a ten-minute coffee-break, no calls will be received<br>b) during a twenty-minute coffee-break, at least two calls will be received<br>c) during a half-an-hour lunch break, at most 3 calls will be received | 10 | 3 | 2 |
| 2 | A factory producing washing machines sends 1,000 machines each month to one of their customers. The manufacturer's past records show that 5% of their machines are defective. The customer decides to pick a sample of 20 machines and subject them to tests.<br>a) What is the probability of the customer finding at most no defective in the sample?<br>b) The customer tolerates at most 1 defective in the sample for accepting the consignment of 1,000 machines. What is the probability of the customer accepting the whole consignment?<br>c) What is the mean number of defective machines in the sample? | 10 | 3 | 2 |

| | | | | |
|---|---|---|---|---|
| 3 | The random variable X has a binomial distribution with n = 10 and p = 0.01. Determine the following probabilities.<br>a) $P(X = 5)$<br>b) $P(X \leq 2)$<br>c) $P(X \geq 9)$<br>d) $P(3 \leq X < 5)$ | 10 | 3 | 2 |
| 4 | Inter arrival times in minutes between successive customers in a hotel is exponentially distributed with a mean of 2 minutes.<br>a) Compute the probability that inter arrival time between two customers is at most 2 minutes.<br>b) What is the probability that at least 2 customers arrive in one minute?<br>c) What is the probability of no customers arriving in a span of 3 minutes? | 10 | 3 | 2 |
| 5 | Suppose that a large conference room at a certain company can be reserved for no more than 4 hours. Both long and short meetings occur quite often. In fact, it can be assumed that the length X of a meeting is equally likely in the interval [1.5, 4].<br>a) What is the probability density function?<br>b) What is the probability that any given meeting lasts at least 3 hours?<br>c) Find the mean and variance of length X of the meetings. | 10 | 3 | 2 |

Note:
1. Answer all the Questions.

| Sl. No | Questions | M | BT | CO |
|---|---|---|---|---|
| | **Part – A** | | | |
| 1 | A market researcher wants to determine if a new advertisement has changed customer preference between two products. What hypothesis test should be conducted? | 2 | 1 | 4 |
| 2 | Differentiate between Type I and Type II Errors. | 2 | 1 | 4 |
| 3 | A factory manager believes that the average production rate has decreased due to new machinery. What type of hypothesis test would you use? | 2 | 2 | 4 |
| 4 | What is the significance level ($\alpha$) in hypothesis testing? | 2 | 2 | 4 |
| 5 | Differentiate between left tailed and right tailed test with an example. | 2 | 1 | 4 |
| | **Part – B** | | | |
| 1 | The mean water temperature downstream from a power plant cooling tower discharge pipe should be no more than 100°F. Past experience has indicated that the standard deviation of temperature is 2°F. The water temperature is measured on nine randomly chosen days, and the average temperature is found to be 98°F.<br>a) Should the water temperature be judged acceptable with 0.05?<br>b) What is the P-value for this test?<br>c) What is the probability of accepting the null hypothesis at 0.05 if the water has a true mean temperature of 104°F? | 10 | 4 | 4 |
| 2 | A stenographer claims that she can type at the rate of 120 words per minute. Can we reject her claim on the basis of 100 trials in which she demonstrates a mean of 116 words with a standard deviation of 15 words. Use 5% level of significance. | 10 | 3 | 4 |
| 3 | A machine is designed to produce insulating washers for electrical devices of average thickness of 0.025 cm. A random sample of 10 washers was found to have average thickness of 0.024 cm with standard deviation of 0.002 cm. Test the significance of the deviation. The value of t for 9 degrees of freedom at 5% level is 2.262. | 10 | 3 | 4 |
| 4 | Calculate Karl Pearson's Correlation Coefficient between the marks in Statistics for Data Analytics and Operations Research obtained by 10 students.<br>SDA: 10, 25, 13, 25, 22, 11, 12, 25, 21, 20<br>OR: 12, 22, 16, 15, 18, 18, 17, 23, 24, 17 | 10 | 3 | 3 |

<table>
<tr>
<td>5</td>
<td>A panel of judges P and Q graded seven debaters and independently awarded following marks.
<table>

| **Course Title: STATISTICS FOR DATA ANALYTICS** | | **Course Code : 21IM41** |

Note:
1. Use of statistical tables permitted.

| Sl. No | Questions | M | BT | CO |
|---|---|---|---|---|
| 1. | An engineer who is studying the tensile strength of a steel alloy intended for use in golf club shafts knows that tensile strength is approximately normally distributed. A random sample of 12 specimens has a mean tensile strength of 3250 psi.<br>(i) Test the hypothesis that mean strength is 3500 psi. Use 1% significance level. Standard deviation is known to be 60 psi.<br>(ii) What is the smallest level of significance at which you would be willing to reject the null hypothesis in part (i)?<br>(iii) Explain how you could answer the question in part (i) with a two-sided confidence interval on mean tensile strength.<br>(iv) How will the test be performed if the standard deviation is not known? | 10 | 3 | 3 |
| 2. | Inter arrival times in minutes between successive customers in a hotel is exponentially distributed with a mean of 2 minutes.<br>(i) Compute the probability that inter arrival time between two customers is at most 2 minutes.<br>(ii) What is the probability that at least 2 customers arrive in one minute?<br>(iii) What is the mean-time till every 3rd customer arrives?<br>(iv) What is the probability of no customers arriving in a span of 3 minutes? | 10 | 3 | 3 |
| 3. | (i) What are the hypothesis statements and the statistic to be used in a two-sided test of variance of a population? What are the assumptions to use this statistic and what is the rejection region for this test?<br>(ii) State the probability of a t-random variable with 25 degrees of freedom taking on any value between 2.06 and 3.45.<br>(iii) What is the value x such that a chi-square random variable with 15 degrees of freedom takes on at the most a value of x with 95% likelihood? | 10 | 2 | 4 |
| 4. | For the sample (5, 2, 3, 1, 0, 1, 3, 3) from a population,<br>(i) Construct a 90% confidence interval on population mean if the population standard deviation is known to be 2.<br>(ii) What should the sample size be in order to keep the width of the confidence interval to less than 2?<br>(iii) Construct a 95% confidence interval on population mean if the population variance is unknown. | 10 | 3 | 4 |

| | | | | |
|---|---|---|---|---|
| 5. | An electrical firm manufactures light bulbs that have a life, before burn-out, that is normally distributed with mean equal to 800 hours and a standard deviation of 40 hours. Find<br>(i) the probability that a bulb burns between 778 and 834 hours.<br>(ii) Probability that a bulb has a life of at least 1000 hours.<br>(iii) What percent of bulbs have their life within $\pm 2\sigma$ from their own mean life, where $\sigma$ is the standard deviation? | 10 | 3 | 4 |

| 1 | Explain the AIDAS model in detail. Discuss how each stage plays a critical role in conversion optimization, using examples to illustrate how businesses can enhance customer journeys through this model. | 10 | 2 | 3 |
| 2 | A travel agency has created a landing page for a limited-time offer on holiday packages. Despite a high number of clicks on the ads leading to the landing page, the conversion rate is disappointingly low. Evaluate the possible reasons for the low conversion rate on the landing page. Suggest optimizations for key elements such as headlines, call-to-action buttons, and visuals that could enhance the effectiveness of the landing page and increase the conversion rate. | 10 | 3 | 3 |
| 3 | How do online applications serve as effective tools for mobile marketing? What are the key features that businesses should incorporate into their apps to ensure they are maximizing marketing potential? | 10 | 2 | 3 |
| 4 | A luxury cosmetics brand is planning to launch a flash sale exclusively through mobile devices. How would you design a mobile marketing campaign that not only drives awareness of the sale but also maximizes conversion rates during the limited time? | 10 | 3 | 4 |
| 5 | Discuss the relationship between design principles and website copy. How can visual design elements and well-crafted content work together to enhance user experience and achieve website objectives? Include examples of effective design and copy integration. | 10 | 2 | 4 |

|---|---|---|
| **Date: June 2025** | **Improvement CIE** | **Max. Marks: 30** |
| **Semester: IV** | **UG** | **Duration: 60 Min** |
| **Course Title: Universal Human Values** | | **Course Code: HS248AT** |

| S No | Questions | M | BT | CO |
|---|---|---|---|---|
| | **Quiz** | | | |
| 1 | The participation of the human being in ensuring the role of physical facility in nurture, protection and providing means for the body is called its _____. (a) Utility value (b) Artistic value (c) Activity (d) Energy | 1 | 2 | 1 |
| 2 | When something is active or has activity, it is called as _____. (a) space (b) unit (c) energy (d) value | 1 | 3 | 2 |
| 3 | The following are the characteristics of space except _____. (a) Unlimited (b) No activity (c) Energy in equilibrium (d) Self-organized | 1 | 1 | 1 |
| 4 | The natural characteristic of material order is _____. (a) Composition (b) Decomposition (c) Composition/Decomposition (d) Nurture/worsen | 1 | 1 | 1 |
| 5 | Conformance of material order is named as _____. (a) constitution conformance (b) Seed conformance (c) Breed conformance (d) sanskaar conformance | 1 | 3 | 3 |
| | **Test** | | | |
| 1 | Explain the classification of units into Four Orders and the harmony among them with the help of a schematic diagram. | 6 | 2 | 1 |
| 2 | What do you mean by ‘conformance’? Explain the conformance in the four orders. | 6 | 4 | 2 |
| 3 | Explain how there is recyclability and self-regulation in nature. | 6 | 3 | 3 |
| 4 | Elaborate the terms ‘units’ and ‘space’ and mention their characteristics. | 7 | 4 | 4 |

# INDUSTRIAL ENGINEERING & MANAGEMENT

| | | |
|---|---|---|
| **Date : 28 August 2024** | **Improvement CIE – Quiz and Test** | **Max. Marks : 25** |
| **Semester : IV** | **UG** | **Duration : 60 Min** |
| **Course Title: UNIVERSAL HUMAN VALUES** | | **Course Code : HS248AT** |

Note:
1. Answer all the Questions.

| Sl. No | Questions | M | BT | CO |
|---|---|---|---|---|
| **Part – A** | | | | **(5 Marks)** |
| 1 | What is the fundamental principle of harmony in nature and existence?<br>a) Competition<br>b) Coexistence<br>c) Dominance<br>d) Isolation | 1 | 1 | 3 |
| 2 | What is the role of human beings in maintaining harmony in nature?<br>a) Exploiting natural resources<br>b) Preserving and nurturing nature<br>c) Dominating other species<br>d) Isolating from the environment | 1 | 2 | 2 |
| 3 | Which of the following best describes the Physical Order?<br>a) Includes only human-made objects<br>b) Comprises natural elements like soil, water, air, and minerals<br>c) Refers exclusively to living beings<br>d) Focuses on mental and spiritual aspects | 1 | 1 | 2 |
| 4 | What distinguishes the Human Order from the other three orders?<br>a) Physical strength<br>b) Intelligence and moral values<br>c) Ability to photosynthesize<br>d) Instinctual behaviour only | 1 | 1 | 4 |
| 5 | In the context of coexistence, what is the meaning of ‘prosperity’?<br>a) Material wealth accumulation<br>b) Holistic well-being and happiness<br>c) Physical strength and power<br>d) Technological superiority | 1 | 1 | 3 |
| **Part – B** | | | | |
| 1 | Existence is co-existence of mutually interacting units in all-pervasive space. Explain. | 5 | 2 | 3 |
| 2 | What is the natural characteristics (swabhava) of human order? Explain. | 5 | 1 | 2 |
| 3 | What are the four orders of nature? Briefly explain them. | 5 | 2 | 4 |
| 4 | How can we say that ‘nature is Self-Organized and in space Self-Organization Is Available.’ | 5 | 2 | 4 |

| | | | | |
|---|---|---|---|---|
| 5 | Explain the difference and similarities between Pranic order and animal order. What is the relation between the two orders? | 5 | 1 | 2 |
