RV COLLEGE OF ENGINEERING®

(An Autonomous Institution affiliated to VTU)

V Semester B.E. Regular / Supplementary Examination February / March 2026

Common to BT / AIML / CD / CS / CY / IS

PRINCIPLES OF MANAGEMENT AND ECONOMICS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2 is compulsory. Answer any one full question from 3 and 4, 5 and 6, 7 and 8, 9 and 10.

PART-A

			M	BT	CO
1	1.1	List and briefly describe any two functions of management under POSDCORB.	02	1	1
	1.2	Mention any two levels of management with suitable examples.	02	1	2
	1.3	What is the purpose of organizing?	02	2	2
	1.4	Differentiate between line authority and staff authority.	02	2	2
	1.5	Ravi works in a company with high job security and a good salary. However, he feels stuck and wants opportunities to be creative and to grow. Which need is currently motivating Ravi?	02	3	1
	1.6	A CEO leads a company through major change by motivating employees with a long-term vision and encouraging innovation. Which leadership style is this and why?	02	3	2
	1.7	Distinguish between real flow and money flow.	02	2	4
	1.8	What is a public good?	02	3	2
	1.9	State the four components of GDP using the expenditure method.	02	2	4
	1.10	Why do economists build the model?	02	2	4

PART-B

2	a	A manufacturing company is not meeting its production targets. Explain how different levels of management can help solve the problem.	08	3	1
	b	Define and explain the importance of the principle of 'Unity of Command' and 'Esprit de Corps' given by Henry Fayol.	08	1	4
3	a	*TechNova Solutions* is a mid-sized software development company experiencing rapid growth due to increased demand for its AI-based enterprise products. The CEO notices several emerging challenges: • Teams often duplicate similar work. • Employees are unclear about whom to report to during cross-functional projects. • Decision-making is slow because most approvals must go through senior management. • Managers complain about being overloaded with direct reports. • Some departments follow well-defined procedures, while others operate informally, causing inconsistencies. Analyze TechNova's current organizational issues and propose a redesigned organizational structure.	08	4	2

	b	A new coaching institute plans to launch skill-development programs. The management wants clarity in long-term and short-term direction. Apply the concepts of strategic, tactical, and operational goals to this institute and create one example of each.	08	3	2
		OR			
4	a	A start-up faces declining customer interest due to new technology introduced by competitors. Propose a strategic management plan for the start-up and justify each step.	08	3	2
	b	CityCare Hospital is a medium-sized healthcare institution with multiple departments such as Emergency, ICU, General Medicine, Radiology, and Administration. Recently, the hospital has faced several operational issues: • Nurses in the Emergency Department receive instructions from both the Chief Medical Officer and visiting specialist doctors, causing confusion. • Radiology technicians are unsure whether to follow directives from the Head of Radiology or from doctors in other departments who demand immediate reports. • Some junior doctors bypass their department heads and directly approach the hospital director for approvals. • Conflicts arise when two managers give contradictory instructions to the same staff member. • Employees feel stressed because they are not clear about who has final authority in decision-making. Using the concept of chain of command, analyze the problems CityCare Hospital is facing.	08	4	2
5	a	Critically evaluate Maslow's theory of motivation.	08	3	3
	b	Illustrate the five leadership styles in Blake and Mouton's Managerial Grid.	08	2	4
		OR			
6	a	Explain McGregor's Theory X and Theory Y assumptions in detail.	08	1	3
	b	Explain Blake and Mouton's Managerial Grid Theory of leadership.	08	1	2
7	a	Explain with suitable examples how a mixed economy combines features of market and command economies. Give suitable examples.	08	3	4
	b	Explain circular flow of economics with a neat sketch.	08	2	4
		OR			
8	a	What do you understand by elasticity of demand? Explain its various importance and applications.	08	2	4
	b	What are the characteristic features of an oligopolistic industry? How does it differ from monopolistic competition?	08	2	4
9	a	Explain Keynesian model of Macroeconomics and how it is different from classic model in macroeconomics.	08	2	1
	b	Critically assess the role of parliamentary discussion in budget approval.	08	3	1
		OR			
10	a	Explain the functioning and importance of the Keynesian cross model.	08	2	4
	b	A major oil-importing economy faces a sudden increase in global crude oil prices by 40%. Firms' production costs increase sharply. Analyse the impact on output and price level using the AS–AD model. Suggest one policy the government can adopt.	08	3	4

VI Semester B. E. Regular Examinations August-2025

PRINCIPLES OF MANAGEMENT AND ECONOMICS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2 is compulsory. Answer any one full question from 3 and 4, 5 and 6, 7 and 8, 9 and 10.

PART-A

			M	BT	CO
1	1.1	At google, many projects are addressed by small, focused employee teams that quickly form and complete work. This approach exemplifies $a(n)$ _____ organization structure.	01	1	1
	1.2	The initial aim of the Hawthorne Studies was to examine the effect of various lighting levels on _____.	01	1	1
	1.3	A technology company aiming to grow its market share over the next five years will develop a _____ plant that includes goals such as launching products in new international markets, investing in cutting-edge R&D, and increasing digital marketing efforts to boost brand visibility.	01	1	2
	1.4	A consumer electronics company adopts a strategy by emphasizing product innovation and sleek design, allowing it to differentiate itself from competitors. This is an example of a _____ strategy.	01	1	2
	1.5	_____ needs are mainly physiological / biological and unlearned.	01	1	3
	1.6	_____ needs can be met by challenging jobs, creative tasks, advancement opportunities, and achievement in work.	01	1	3
	1.7	John Maynard Keynes, one of the greatest economists of the twentieth century, pointed out that economics is not just a subject area but also a _____.	01	1	4
	1.8	The _____ is the percentage change in the quantity demanded of a good or service divided by the percentage change in the price.	01	1	4
	1.9	_____ is a fundamental economic indicator that measures the total market value of all final goods and services produced within a country over a specific time period, typically a year or a quarter.	01	1	5
	1.10	A travel agent who loses their job because consumers now book trips online using travel websites and apps experiences _____ unemployment.	01	1	5
	1.11	Identify the three common characteristics that define an organization.	02	1	1
	1.12	What does SMART stand for in goal setting, and give one example of a quantitative objective?	02	1	2
	1.13	What are the three core needs identified in Alderfer's ERG Theory?	02	1	3
	1.14	How does product differentiate enable firms in a monopolistic competition market structure to influence prices? Give an example to support your answer.	02	1	4
	1.15	A coffee shop increases the price of a cup of coffee from \$3 *to* \$3.30. As a result, the number of cups sold per day drops from 200 to 180. Calculate the price elasticity of demand for coffee at this shop. Based on your answer, is the demand elastic, inelastic, or unit elastic?	02	2	5

PART-B

2	a	Discuss Henry Mintzberg's model of managerial roles. Evaluate the relevance of this model in the context of contemporary management practices.	08	4	1

	b	Evaluate the Systems Approach to Management and its relevance in modern organizational settings. Strengthen your arguments with an example.	08	4	1
3	a	Discuss the key differences between strategies and tactical planning. Illustrate with an example how can a company might implement both strategic and tactical planning to achieve its objectives.	08	3	2
	b	Define the BCG Matrix and explain its purpose in strategic planning. Discuss how the BCG Matrix assists organizations in investment decisions.	08	3	2
		OR			
4	a	Define any three types of departmentalization. Analyze the advantages and disadvantages of each type.	08	2	2
	b	Analyze centralization and decentralization in the context of organizational structure, providing real-world examples to illustrate your points.	08	3	2
5	a	What are the categories of motivation according to the thermists? Explain.	08	2	3
	b	Analyze how Maslow's Hierarchy of needs can enhance management practices in organizations, with real-life example.	08	4	3
		OR			
6	a	Contrast McGregor's Theory X and Theory Y, highlighting their assumptions about human nature, and their implications for management practice and organizational behavior.	08	3	3
	b	Critically assess Hersey and Blanchard's approach to situational leadership.	08	3	3
7	a	Distinguish between microeconomics and macroeconomics and explain how both perspectives are useful in understanding the economy.	08	3	4
	b	Illustrate and explain the role of the circular flow diagram in understanding the economic system.	08	3	4
		OR			
8	a	Define and distinguish between price elasticity of demand and supply. What do these measures reveal about market behavior?	08	3	4
	b	How do oligopolistic markets differ from other market structures? Explain with reference to characteristics, formation, and firm behavior.	08	2	4
9	a	Define a price index and explain how it is used to measure inflation. Illustrate your answer with examples.	08	3	5
	b	Outline the major exchange rate mechanisms used by various countries and briefly explain their features.	08	2	5
		OR			
10	a	How does the Keynesian Cross Model work? Detail its main components, and the role played by the multiplier.	08	2	5
	b	Explain the key stages involved in the national budgeting process in India. How does this process ensure transparency and accountability in public finance? Discuss.	08	2	5

V Semester B.E. Regular Examinations Feb/Mar – 2025

Common to AIML / CSE / ISE / ECE / EEE / EI / ET

PRINCIPLES OF MANAGEMENT AND ECONOMICS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2 is compulsory. Answer any one full question from 3 and 4, 5 and 6, 7 and 8, 9 and 10.

		PART-A	M	BT	CO
1	1.1	Which step in *POSDCORB* involves delegating tasks and giving structured instructions?	01	2	2
	1.2	_____ is the primary scientist associated with the foundation of Administrative Theory.	01	1	1
	1.3	Differentiate between macroeconomics and microeconomics.	02	2	4
	1.4	_____ quadrant of the BCG Matrix represents high market share and high market growth.	01	1	3
	1.5	Define inflation.	01	2	5
	1.6	Define formalization.	02	1	2
	1.7	_____ have provided the foundation for our current theories of motivation, leadership, group behaviour and development, and numerous other behavioural approaches.	01	1	1
	1.8	Adam Smith called price mechanism as _____.	01	1	1
	1.9	The market state that satisfy all the essential features of a perfect competitive market except identity of product is known as _____.	01	2	2
	1.10	According to Fayol's 14 principles of management, 'esprit de corps' refers to _____ and _____.	02	1	3
	1.11	Mention the 4 different measures of *GDP*.	02	3	4
	1.12	Define economic planning.	02	2	4
	1.13	In *AS–AD* model the *AD* curve represents the relationship between the _____ in the economy and the _____.	02	2	3
	1.14	_____ is father of Economics.	01	1	1

PART-B

2	a	Illustrate different management function in detail.	08	2	2
	b	Briefly describe Fayol's 14 principles of management in detail.	08	2	1
3	a	Define Planning. Illustrate the different types of plans in detail.	08	2	2
	b	Bring out the differences between Centralization and decentralization.	08	2	2
		OR			
4	a	Bring out the different types of Organizational strategies.	08	2	2
	b	Illustrate different quadrants of *BCG* Matrix.	08	3	3
5	a	Briefly describe *D.C.* McClelland Achievement Motivation Theory.	08	2	3
	b	Illustrate Douglas McGregor theory x and theory y in detail.	08	2	3
		OR			

6	a	Illustrate Robert Blake and Jane Mouton developed Leadership Grid theory.	08	3	3
	b	Differentiate between Transactional and Transformational Leadership.	08	3	3
7	a	Briefly describe circular flow model of economics with help of diagram.	08	2	4
	b	Illustrate different types of elasticity demand in detail.	08	3	5
OR					
8	a	Differentiate between inductive and deductive reasoning.	08	2	4
	b	Illustrate the features of Capitalistic Economy.	08	2	5
9	a	Taking an example explain Price Elasticity of Demand and Price Elasticity of Supply.	08	3	4
	b	Briefly describe why do Oligopolies exist in today's competitive world.	08	3	4
OR					
10	a	Illustrate key components of classical growth theory within the framework of macroeconomic models.	08	2	5
	b	Briefly describe *IS–LM* model along with equations.	08	2	5

(An Autonomous Institution affiliated to VTU)

V Semester B.E. Examinations – Model Question Paper (2022 Scheme)

DEPARTMENT OF INDUSTRIAL ENGINEERING AND MANAGEMENT

PRINCIPLES OF MANAGEMENT AND ECONOMICS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2 is compulsory. Answer any one full question from 3 and 4, 5 and 6, 7 and 8, 9 and 10.

		PART-A	M	BT	CO
1	1.1	The power to hold workers accountable for their actions and to make decisions about the use of organizational resources is known as _____.	01	2	4
	1.2	_____ was one of the first to recognize that organizations could be viewed from the perspective of individual and group behavior.	01	2	1
	1.3	Management Science came into existence in a _____ context.	01	2	2
	1.4	In the behavioral management approach what is the primary focus of the manager is _____.	01	2	2
	1.5	In a mechanistic organization, communication is mostly _____.	01	2	2
	1.6	_____ Structures include cross-hierarchical and cross-functional teams and a flat structure.	01	2	3
	1.7	Grouping activities on the basis of customer flow is _____ departmentalization.	01	2	4
	1.8	Procter & Gamble has separate departments for Tide, Pampers, Charmin, and Pringles. This is an example of departmentalization by _____.	01	2	4
	1.9	In Maslow's hierarchy of needs, _____ is the highest level of need?	01	3	4
	1.10	The offering of employee health insurance addresses which of Maslow's needs?	01	2	5
	1.11	Individuals become leaders based on their _____.	01	2	5
	1.12	The ability to influence people through granting or withholding benefits that are of interest to them is called _____.	01	2	3
	1.13	Mr. X is the only person in the company with expertise in the E-Commerce field. This source of power is called _____.	01	2	2
	1.14	The demand for a good increases when the price of a substitute _____ and also increases when the price of a complement _____.	01	2	2
	1.15	The price elasticity of demand is 5.0 if a 10 percent increase in the price results in a _____ decrease in the quantity demanded.	01	2	2
	1.16	Adam Smith called price mechanism as _____.	01	2	3
	1.17	An economy that interacts with other economies is known as _____.	01	2	4
	1.18	_____ growth is the percentage increase in the real GDP.	01	2	4
	1.19	The price elasticity of demand measures the _____ in quantity demanded due to a change in price.	01	3	4

	1.20	A shift in the supply curve to the right indicates an _____ in supply.	01	2	5

PART-B

2	a	Discuss Hawthorne effect in today's workplace. How can managers apply these concepts to improve work performance?	08	3	1
	b	Elaborate on the contributions of Henry Fayol to Management theory and justify the relevance of this theory for today's organizations.	08	2	1
3	a	Though decentralization is a welcome idea for efficient administration of any organization, but it comes with its own drawbacks. Discuss.	08	3	2
	b	In today's business environment, more than any preceding era, the only constant is change. Successful organizations effectively manage change, continuously adapting their bureaucracies, strategies, systems, products, and cultures to survive the shocks and prosper from the forces that decimate the competition. With this context explain in detail the Strategic Management process.	08	3	2
		OR			
4	a	The Taj West End Hotel has divisions such as reception, outdoor catering, conference hall maintenance and sales. With a schematic representation, illustrate the type of organization structure with advantages and disadvantages.	08	2	2
	b	Describe the situations where the decision making can be Decentralized. Explain any two cases in detail.	08	2	2
5	a	Theory X follows lower order needs and Theory Y follows higher order needs. Elucidate using Maslow's hierarchy of needs theory.	08	3	3
	b	Discuss the findings of Ohio state studies in reference to this following quotation by Mahatma Gandhi "I suppose leadership at one time meant muscles; but today it means getting along with people".	08	3	3
		OR			
6	a	Explain the three key linkages in expectancy theory and their role in motivation, which affect a worker's level of performance with an example?	08	2	3
	b	Exhibit the relationship between task behavior and relationship behavior using Blake & Mouton's managerial grid.	08	3	3
7	a	Discuss the role of firms in the circular flow model. How do they interact with households? How does the financial sector contribute to the circular flow of income and expenditure?	08	2	4
	b	Explain the relationship between elasticity and pricing strategies. How do firms use the concept of price elasticity to determine pricing policies in both competitive and monopolistic markets?	08	3	4
		OR			
8	a	Describe the income approach to measuring GDP. What are the different types of income included in this approach. Also discuss the role of exports and imports in GDP calculations. How do they impact the overall GDP of a country?	08	3	4
	b	Describe the Keynesian cross model. Explain how it demonstrates the relationship between aggregate demand and national income. Discuss the concept of equilibrium output in this model and how government spending can influence equilibrium.	08	2	4
9	a	Would you expect supply to play a more significant role in determining the price of a basic necessity like food or a luxury like perfume? Explain.	08	3	5
	b	Illustrate the concept of a shortage and a surplus in a market. What are the implications of each for prices and quantities exchanged?	08	2	5

		OR			
10	a	Compare and contrast elastic, inelastic, and unitary price elasticity's of demand and supply. Provide examples for each.	08	3	5
	b	Will the firms in an oligopoly act more like a monopoly or more like competitors? Briefly explain.	08	2	5

V Semester B. E. Regular Examinations April/May-2024

COMMON TO AS/BT/CH/CV/IEM/ME

PRINCIPLES OF MANAGEMENT AND ECONOMICS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2 is compulsory. Answer any one full question from 3 and 4, 5 and 6, 7 and 8, and 9 and 10.

PART-A

			M	BT	CO
1	1.1	Why efficiency and effectiveness are important to management?	02	1	1
	1.2	How do systems theory and the contingency approach make managers better at what they do?	02	2	2
	1.3	Define organizational structure and organizational design.	02	1	1
	1.4	State two important reasons for an appropriate span of management.	02	2	3
	1.5	How do reward packages, such as pensions and share option schemes, help motivate the workforce?	02	2	3
	1.6	Mention the contemporary concerns affecting leadership.	02	2	4
	1.7	List any two uses of Microeconomics.	02	1	4
	1.8	What do you understand by the term Monopolistic competition?	02	1	3
	1.9	Mention any two equivalent ways of measuring GDP using the circular flow model.	02	2	4
	1.10	What are the different ways of classifying unemployment according to economists?	02	1	2

PART-B

2	a	Researchers at Harvard Business School found that the most important managerial behaviors involve two fundamental things: enabling people to move forward in their work and treating them decently as human beings. In the context of the above statement, explain in detail Mintzberg's managerial roles.	08	2	2
	b	Henry Fayol described the practice of Management as a distinct function. Explain fundamental principles of management that could be applied to various organizational situations.	08	2	2
3	a	Imagine a tech start-up that has recently launched three products: ground-breaking AI software (high growth, low market share), a mobile app for productivity (moderate growth, moderate market share), and a legacy software product (low growth, high market share). Apply the BCG matrix to advise the start-up on how to allocate resources strategically.	08	2	2
	b	Tata Group of India has business in chemicals, communications and IT, consumer products, energy, engineering, materials, and services. With a schematic representation, explain the type of organizational structure with its advantages and disadvantages.	08	2	2

		OR			
4	a	With more than 2.1 million employees worldwide working in various departments, functional areas, and stores, Walmart Stores Inc., uses strategic management to help coordinate and focus employees' efforts on what's important as determined by its goals. In this context, explain in detail the strategic management process involved.	08	4	2
	b	A manufacturing firm produces standardized products in a sable market environment. It employs a hierarchical structure with clearly defined roles and strict procedures. However, the company is facing challenges adapting to changing consumer preferences and technological advancements. Analyze this scenario in terms of mechanistic and organic structures.	08	4	2
5	a	At the workplace, the workers put inputs into the job, such as education, experience, effort, energy, and expect to get some outcomes such as salary, reward, promotion, verbal recognition, and interesting and challenging work each in equal amounts. Explain in detail the importance of Adam's Equity theory in the given scenario.	08	5	3
	b	Steve Jobs achieved unwavering loyalty and commitment from Apple's technical staff in the early 1980s by articulating a vision of personal computers that would dramatically change the way people lived. Explain the leadership traits the above situation is relevant to where leader has to develop according to the readiness of the follower.	08	4	5
		OR			
6	a	"The corporate world is filled with stories of leaders who failed to achieve greatness because they failed to understand the context they were working in." Explain how the Fiedler Model would support the given statement.	08	3	4
	b	The manger wants two of his employees to switch their vacations from the summer to the spring so that the job needs will be filled suitably during the summer. Explain how Vroom's expectancy model is applied in the given situation.	08	3	4
7	a	Companies often build models of their new products, which are more rough and unfinished than the final product will be but can still demonstrate how the new product will work. Explain how economists apply the scientific method in the given scenario.	08	2	4
	b	Explain the main issue in the modern debate between the New Keynesians and the New Classical economists. If wages and prices are sticky in the short run – then what can we expect and what role does government play, according to the Keynesians?	08	2	3
		OR			
8	a	A rapidly developing country has hired you to present a specific strategy for keeping their inflation and unemployment rates low while maintaining a healthy GDP growth rate. Explain in detail the components of GDP that can be used to accomplish this.	08	2	2
	b	A country decides to liberalize its capital account and open up to international capital flows. Apply the IS-LM model to examine the effects of increased capital mobility on domestic interest rates, investment, and exchange rates.	08	2	2

9	a	A new version of a popular smartphone is released with advanced features, making older models less desirable. Analyze how this technological obsolescence affects the equilibrium price and quantity of the older smartphone models in the market.	08	3	3
	b	In a market dominated by a few large firms, one firm consistently sets the price for its products, and others follow suit. Analyze the rationale behind this price leadership strategy in an oligopolistic market. What factors might determine which firm takes on the role of price leader?	08	3	3
		OR			
10	a	Discuss how the price elasticity of supply for labour varies across different types of jobs, such as highly-skilled professions versus low-skilled manual labour. What factors determine the responsiveness of workers to changes in wages?	08	3	2
	b	A clothing retailer has built a strong brand reputation for its high-quality garments and unique designs. Analyze how brand loyalty influences the retailer's market power and pricing decisions in a monopolistically competitive market.	08	3	2

RV COLLEGE OF ENGINEERING®

(An Autonomous Institution affiliated to VTU)

V Semester B. E. Examinations April-2024

COMMON TO EI / CH / IEM / ME / AS / CV

INTRODUCTION TO MANAGEMENT AND ECONOMICS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6.

PART-A

			M	CO	BT
1	1.1	List any two important skills required by manager.	02	1	2
	1.2	Mention the relevance of systems approach.	02	1	2
	1.3	Differentiate between Authority and Responsibility.	02	1	2
	1.4	What is formalization?	02	1	1
	1.5	What are the three components of expectancy theory?	02	2	2
	1.6	Mention the importance of managerial grid.	02	3	2
	1.7	Mention any two reasons for economic problems.	02	4	2
	1.8	Distinguish between positive economics and normative economics.	02	4	2
	1.9	Define recession and expansion.	02	4	1
	1.10	What is Keynesian economics?	02	4	2

PART-B

2	a	Is Taylor's theory of scientific management still useful in today's business? Explain with the help of case example.	08	1	2
	b	Highlight the important features of systems approach with the help of suitable examples.	08	1	2
3	a	Differentiate between organic and mechanistic organization structure with suitable examples.	08	1	2
	b	Assume that after your final year, you are going to pursue your higher studies abroad. Chalk out systematic plan how you will start your preparation for the same.	08	2	3
		OR			
4	a	Identify the various factors that influence the amount of centralization.	08	2	3
	b	List and explain six key elements involved in an organizational design.	08	2	3

5	a	Apply theory X and theory Y to your student life. What characteristics student will possess if the above mentioned theories applied to him?	08	2	3
	b	Design a questionnaire to understand leadership qualities of a student studying in an engineering institution. Questionnaire should consist of atleast eight questions apart from personal information.	08	3	2
		OR			
6	a	Identify one example each for transactional leader and transformational leader from real life examples. Justify your answer with identifying traits present in them.	08	3	3
	b	Design a questionnaire to understand motivational level of an employee working in a software industry. Questionnaire should consist of atleast eight questions apart from personal information.	08	3	3
7	a	Identify the various components included and excluded from measuring our Gross Domestic Product.	08	4	2
	b	Identify the various factors which will help to shift in the supply curves to left or right with the help suitable graphs.	08	4	3
8	a	Examine the differences between Keynesian model and classical model of macroeconomics.	08	4	3
	b	With suitable examples, explain the key features of Mundell-Fleming Model.	08	4	2

V Semester B. E. Examinations June – 2023 (Makeup)

COMMON TO EI / CH / IEM / ME / AS / CV

INTRODUCTION TO MANAGEMENT AND ECONOMICS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6

PART – A

1	1.1	Differentiate between the two management terms efficiency and effectiveness.	02
	1.2	How do systems theory and contingency approach make managers better at what they do?	02
	1.3	Differentiate between goals and plans.	02
	1.4	Contrast mechanistic and organic structures	02
	1.5	Explain the three key elements of motivation.	02
	1.6	Define leader and leadership.	02
	1.7	Differentiate between exchange rate and effective exchange rate.	02
	1.8	What is Consumer Price Index (CPI)? How is it calculated?	02
	1.9	Mention / list any two roles of government in a capitalist society system used for economic management of a country.	02
	1.10	In the labour market, what causes a shift for labour in demand curve and supply curve for labor?	02

PART – B

2	a	Explain the salient features of scientific management and general administrative theory.	10
	b	"An organization should be viewed as an unified, purposeful system composed of interrelated parts". Elucidate with appropriate examples.	06
3	a	With a flow chart, explain in detail, the eight steps in the decision making process.	08
	b	Explain any four types of goals that an organization might have.	08
		OR	
4	a	Explain with flowcharts the five common forms of departmentalization.	08

	b	Pfizer, is a global pharmaceutical company, looking for ways to help the employees to be more efficient and effective. An internal study conducted at Pfizer, revealed that approximately $20-40\%$ of time the employees were spending in doing support work rather than doing actual work. Hence, Pfizer by use of "magic button" (online form) outsourced the support work. By this approach Pfizer saved $66500\ hours$. i) What structural implications – good and bad this approach have? ii) Explain in terms of different organizational design structures.	08
5	a	Contrast McGregor's Theory X and Theory Y with Herberg's two-factor theory.	08
	b	Explain the situational leadership theory giving its salient features.	08
		OR	
6	a	How do equity theory and expectancy theory explain employee motivation? Discuss.	08
	b	$3M\ CEO$ George Buckley continues leadership excellence based on six leadership attributes, the ability to chart the course, energize and inspire others, demonstrate ethics, integrity and compliance, deliver results, raise the bar & innovate resourcefully. Mr. Buckley believes that leaders should build respect and trust to those who work for the company. Discuss how attributes might be developed.	08
7	a	Highlight the major themes concerning decision making and markets with respect to micro economics.	08
	b	With the help of a neat diagram, illustrate the function and scales of economic entities in a typical economy.	08
8	a	Define GDP. Give a comprehensive explanation of the circular flow model.	08
	b	With the help of a neat sketch, explain the concept of investment-savings, liquidity money $(IS-LM)$ model used in macroeconomics.	08

INTRODUCTION TO MANAGEMENT AND ECONOMICS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6.

PART-A

1	1.1	A manager applies various theories of Management in his/her unique personalised way. What nature of management does this statement indicate?	01
	1.2	The festive season was about to come. Mrs. Rubi, Head of Production department, called for a meeting of all the subordinates and communicated the objectives. Now she is establishing authority-responsibility relationship between superior and subordinates to avoid any delay. Identify the function of management in the above case.	01
	1.3	Sridhar's father is working as a section in-charge in a government office. Identify the level of management at which he is working?	01
	1.4	In the Wealth of Nations, Adam Smith described the breakdown of jobs into narrow and repetitive tasks and called this as _____.	01
	1.5	In a classroom discussion, Kalesh argued that planning is a function to be performed only at top-level management. But Suresh is of the opinion that planning is required at all levels of management. a) Do you support the argument of Kalesh or Suresh? b) Justify your answer.	02
	1.6	Why a mission statement is so important in the strategic management process?	02
	1.7	Supermarket is an organization in which only the managers are the leaders. Identify the type of organisation.	01
	1.8	Uranus Limited is a company dealing in metal products. The work is mainly divided into functions including production, purchase, marketing, accounts and personnel. Identify the type of organizational structure followed by the organization.	01
	1.9	Chao has a lot of internal drive. His overall goal in life is to "be all that he can be" in all aspects of his life. Which level of Maslow's hierarchy of needs is reflected in Chao's attitude?	01
	1.10	Melissa is a good role model for her team mates. She wants to make sure her team does well and wins the conference championship. Her desire to attain this goal is described as _____ motivation.	01

	1.11	Which leadership style tends to centralize authority and make unilateral decisions?	01
	1.12	Classify the following into intermediate products and final products: a) Furniture purchased by a school. b) Chalk, duster, etc, purchased by a school.	02
	1.13	Give two examples each for micro and macroeconomics.	02
	1.14	When there is high inflation in the economy, how will it affect the supply of money in the economy?	01
	1.15	What is the role of a Central Bank in the following exchange rate? a) Fixed exchange b) Floating exchange	02

PART-B

2	a	Aapka Vidyalaya' believes in the holistic development of students and encourages team building through a mix of curricular, co-curricular and sports activities. On its Founder's Day, a stage performance had to be put up. A committee of ten prefects was constituted to plan different aspects of the function. They all decided to use recycled paper for decoration. There was a spirit of unity and harmony and all the members supported each other. With mutual trust and a sense of belonging, the programme was systematically planned and executed. Kartik, one of the prefects, realised that the group had unknowingly applied one of the principles of management while planning and executing the programme. He was so inspired by the success of this function that he asked his father to apply the same principle in his business. His father replied he was already using this principle. i) Identify the principle of management applied for the success of the programme. ii) State any two features of management highlighted in the above paragraph. iii) Identify any two values which 'Aapka Vidylaya' communicated to society.	08
	b	Sanchit, after completing his entrepreneurship course from Sweden returned to India and started a coffee shop 'Aroma Coffee Can' in a famous mall in New Delhi. The specialty of the coffee shop was the special aroma of coffee and a wide variety of flavours to choose from. Somehow, the business was neither profitable nor popular. Sanchit was keen to find out the reason. He appointed Sameera an *MBA* from a reputed college, as a Manager to find out the causes for the same. Sameera took feedback from the clients and found out that though they loved the special unique aroma of coffee but were not happy with the long waiting time being taken to process the order. She analysed and found out that there were many unnecessary obstructions in between which could be eliminated. She fixed a standard time for processing the order. She also realized that there were some flavours whose demand was not enough. So, she also decided to stop the sale of such flavours. As a result within a short period Sameera was able to attract the customers. Identify and explain any two techniques of scientific management used by Sameera to solve the problem.	08

3	a	Agile Ltd.' is a well known automobile manufacturing company in India. The company plans to increase the sale of its sedan cars by 20% in the next quarter. In order to achieve the desired target, the marketing team of the company considers the impact of policy of the government towards diesel vehicles and the level of competition in this segment of cars. They explore the various available options like offering more discount to dealers and customers, providing more customer friendly finance options, lucky draws on test drives, increasing advertising, offering more of free accessories on the purchase of the car, etc. A thorough analysis of the various available options is done keeping in view the relative viability of each option. The company decides to pursue the option of offering more discount to dealers and customers in order to boost the sale of sedan cars. In order to implement the plan, they determine the various discount packages and communicate the same to their product dealers. To make the prospective consumers aware about the new available benefits, advertisements are made through various sources of print and electronic media. The market analysis of the company keep a close watch on the revenue from the sedan cars to study the effect of new initiatives by the company to promote its sales. In context of the above case: i) Name the function of management described in the above paragraph. ii) Identify and explain the various steps involved in process, the function of management as identified in part (a) by quoting lines from the paragraph.	08
	b	Conceptually, strategy of a firm consists of two inseparable parts: business strategy and corporate strategy. i) Distinguish between business strategy and corporate strategy. ii) Identify the key elements considered to develop and formulate such master strategy.	08
		OR	
4	a	Steelo Ltd. decided to set-up its steel manufacturing factory in the backward area of Orissa where very less job opportunities were available. People of that area welcomed this effort of Steelo Ltd. To attract people to work in its factory, it also decided to provide many other facilities like a school, hospital, market etc. in the factory premises. Steelo Ltd. started earning huge profits. Another competing company asked its production manager Aslam to investigate the reasons of earning huge profits by Steelo Ltd. Aslam found that in both the companies, there was systematic coordination among the various activities to achieve the organizational goals. Every employee knew who was responsible and accountable to whom. The only difference was that in his organization, communication took place only through the scalar chain whereas Steelo Ltd. was allowing the flow of communication in all the directions as per the requirement which led to faster spread of information as well as quick feedback.	

		i) Identify the type of organization which permits Steelo Ltd. the flow of communication in all the directions. ii) State another advantage of the type of organization identified in part (i) above. iii) State any two values which Steelo Ltd. wanted to communicate to society.	08
	b	Atul joins as a Regional Sales head in the export division of a $FMCG$ (fast moving consumer goods) company. In a departmental meeting, he asks one of his subordinates, Manik, to take charge of the company's new office in Dubai. He allocates the work to him and grants the necessary authority. However, within a month by seeking regular feedback on the extent of work accomplished from Manik, Atul realizes that Manik is not doing the work as per his expectations. So he takes away the authority delegated to him and re delegates the work to Prakrit. Due to the time wasted in this switch over, the work at the Dubai office suffers tremendously and the company is not able to meet its desired goals. In context of the above case: i) Why is Manik supposed to give regular feedback about work to Atul? ii) Can the authority granted to a subordinate be taken back and re delegated to another person? iii) Can Manik be held responsible for not meeting the work related expectations of Atul? Give a suitable reason in support of your answer. iv) Differentiate between authority, responsibility and accountability on the basis of origin and flow.	08
5	a	Amit Verma joined ABC Technologies in January after having worked at HKY Computers where he had worked as a Software developer. Amit felt that ABC offered better career prospects, as it was growing much faster than HKY which was a relatively smaller company. Amit joined as a Senior Software Developer at ABC Technologies with a good pay hike. He joined Archita Mehta's five-member team. While she was efficient at what she did and extremely intelligent, she had neither the time nor the leaning to groom her team members. Time and again, Amit found himself thinking of Ram Kapoor, his old boss, and of how he had been such a positive influence. Archita, on the other hand, even without actively doing anything, had managed to significantly lower his motivation levels. i) What could be the reasons for Amit was feeling disillusioned? Answer the questions using Maslow's hierarchy of needs? ii) What should Amit do to overcome his tension? What can a team leader do to ensure high levels of motivation among his/her team members?	08
	b	Teachers are often viewed as leaders in academic context along with bosses/manager in professional, politicians/elected officials in civic, and parents in personal contexts. For each of these leaders and contexts. i) Explain in brief the important leadership styles that each should possess.	

		ii) Discuss some of the influences in each context that may affect the leader and his or her leadership traits.	08
		OR	
6	a	Employees weigh what they put into a job situation (input) against what they get from it (outcome) and then compare their input-outcome ratio with the input-outcome ratio of others. If they perceive equity, they feel that their situation is fair, and that justice prevails. If the ratios are unequal, inequity exists and they will view themselves as either under-rewarded or over-rewarded. Explain in detail the importance of Adam's Equity theory in the given scenario.	08
	b	Steve is a CEO of a major healthcare organization. He is typically calm, cool, and collected and likes to take the time to evaluate all of his options before making a decision. When Steve went to work on Monday, he was faced with survivors being brought in from three different traumas (a plane crash, a high-rise fire, and a multi-vehicle accident). He was forced to become more authoritative and to quickly delegate tasks to some of his more senior staff, such as setting up a mobile trauma unit in one of the parking lots. Explain in detail the relationship between task behavior and relationship behavior using Blake & Mouton's managerial grid in the given situation.	08
7	a	A sanitizer manufacturing company wants to become a market leader. For this purpose the manager follows an activity with certain logical steps. The first step suggested by him is to increase profits by at least 30% in the next quarter. Explain how economists apply the scientific method in the given scenario.	08
	b	The Fast Food companies like the McDonald and Burger King who sells the burger in the market are the most common type of example of monopolistic competition. The two companies mentioned above sell an almost similar type of products but are not the substitute of each other. Now which product a particular consumer likes the most and of which company totally depends on him. Apart from the burger, other products are also sold by these companies like French fries, soft drinks, etc. All these products of the mentioned companies are of similar nature but there is no congruency between the products sold by the two as each one has a slightly different shape and taste. i) How a manufacturer does balance the Demand and Supply for his product in the market. ii) Bring out the meaning of Elasticity, Monopoly, Monopolistic and Oligopoly in the parlance of market driven economy.	08
8	a	A rapidly developing country has hired you to present a specific strategy for keeping their inflation and unemployment rates low while maintaining a healthy rate of GDP growth. Explain in detail the components of GDP that can be used to accomplish this.	08
	b	Assume that the government of a big open economy decides to increase its public spending that influence domestic income and interest rate given that we face perfect capital mobility under the flexible exchange rate regime. Explain in what way the Mundell Fleming model has an impact on this.	08

FOUNDATIONS OF MANAGEMENT AND ECONOMICS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

Answer any FIVE full questions out of TEN. Each carries 20 marks.

		PART-A	M	BT	CO
1	1.1	List the functions of management.	01	–	–
	1.2	What is the meaning of the term 'Quantitative approach'?	01	–	–
	1.3	Name the types of goals and plans.	01	–	–
	1.4	Write the meaning of the corporate strategy.	01	–	–
	1.5	What is the meaning of the term work specification?	02	–	–
	1.6	Meaning of the chain and command is _____.	01	–	–
	1.7	List the early theories of motivation.	01	–	–
	1.8	Write the steps of Maslow's theory.	01	–	–
	1.9	Name the behavioral theories.	01	–	–
	1.10	Explain the term Herzberg's two factor theory.	01	–	–
	1.11	What is the meaning of managerial grid?	01	–	–
	1.12	Measuring of contingency theory of leadership is _____.	01	–	–
	1.13	Importance of economics is _____.	01	–	–
	1.14	Equilibrium in markets for goods and services _____.	01	–	–
	1.15	Price elasticity means _____.	01	–	–
	1.16	Differentiate between micro and macroeconomics.	01	–	–
	1.17	Define supply and demand.	01	–	–
	1.18	Illustrate the neo-classical synthesis.	01	–	–
	1.19	Define growth theory.	01	–	–

PART-B

2	a	Explain the management functions, roles and skills.	08	–	–
	b	Differentiate between scientific management and administrative theory.	06	–	–
	c	With one case study, explain contemporary approach.	06	–	–
3	a	Rajiv family's small business which employs 25 semi-skilled workers. During the first week on the job, his dad called him in and said, 'Rajiv, I had a chance to observe you working with the men and women for the past two days and although I hate to, I feel I must say something. You are just too nice to people. I know that this human behavior stuff has been taught to you at the institute, but it just does not work here. I remember when we discussed the Hawthorne studies when I was in the institute, everybody there got excited, but believe me, there is more to managing people than just being nice to them.' Answer the following question. (i) Explain briefly the Hawthorne studies that were explained by Rajiv to his father. (ii) Do you think Rajiv's father understood and interpreted the Hawthorne studies correctly? – Comment (iii) If you were Rajiv, how would you explain to your father the new perspective that is needed for a business to be successful?	10	–	–

	b	Principles of Taylor and Fayol are mutually complementary. One believed that the management should share the gains with the workers, while the other suggested that employee's compensation should depend on the earning capacity of the company and should give them a reasonable standard of living. (i) Identify and explain the principles of Taylor and Fayol referred to in the above statements. (ii) Excluding the principles identified in (i) explain briefly the other principles of Fayol to the contribution of management.	10	–	–
4	a	With a case study, explain the types of goals and plans.	10	–	–
	b	Explain corporate and competitive strategies.	10	–	–
5	a	Explain the overview of designing organizational structure.	10	–	–
	b	Explain the following terms. i. Chain of command ii. Span of control iii. Formalization iv. Mechanistics and organic structure.	10	–	–
6	a	With a flowchart, explain the hierarchy of needs of theory.	10	–	–
	b	With one case study, explain Herzberg's two factor theory.	10	–	–
7	a	Explain the following terms. i. Blake and Mouton's managerial grid ii. Contingency theories of leadership.	10	–	–
	b	Differentiate between transactional and transformational leadership.	10	–	–
8	a	Explain the importance of economics, micro-economics and macro-economics.	10	–	–
	b	With a case study, explain the changes in income and prices affecting consumption choices.	10	–	–
9	a	In an analysis of the market for paint, an economist discovers the facts listed below. State whether each of these changes will affect supply or demand, and in what direction. (i) There have recently been some important cost-saving inventions in the technology for making paint. (ii) Paint is lasting longer, so that property owners need not repaint as often. (iii) Because of severe hailstorms, many people need to repaint now. (iv) The hailstorms damaged several factories that make paint, forcing them to close down for several months.	10	–	–
	b	Describe briefly the circular flow economy model diagram with neat sketch.	10	–	–
10	a	With a flowchart or block diagram, explain the components of GDP (Gross Domestic Product).	08	–	–
	b	Differentiate the Classical model, Keynesian Cross model.	06	–	–
	c	Explain with an example, the exchange rate determination.	06	–	–

	1.12	_____ proposes that if a higher-level need fails to be filled then a person may regress and seek to further fill lower-level needs instead.	01	–	–
	1.13	A decrease in demand causes the equilibrium price to _____.	01	–	–
	1.14	The law of demand states that the quantity of a good demanded varies _____ with its price.	01	–	–
	1.15	The income elasticity of demand is the percentage change in the quantity demanded divided by the percentage change in _____.	01	–	–
	1.16	The market for automobiles is an example of _____ oligopoly.	01	–	–
	1.17	The *LM* curve will shift down when the _____ demand declines.	01	–	–
	1.18	The total amount of income from economic activities across the country in a year is called _____.	01	–	–
	1.19	Gross national product will exceed gross domestic product if net factor payments from abroad are _____.	01	–	–
	1.20	Bob spends cash on rice, tuition fee, and flour etc. In this scenario which index is used to estimate the average of the entire expenses?	01	–	–

PART-B

2	a	Rajiv family's small business which employs 25 semi-skilled workers. During the first week on the job, his dad called him in and said, 'Rajiv, I had a chance to observe you working with the men and women for the past two days and although I hate to, I feel I must say something. You are just too nice to people. I know that this human behavior stuff has been taught to you at the institute, but it just does not work here. I remember when we discussed the Hawthorne studies when I was in the institute, everybody there got excited, but believe me, there is more to managing people than just being nice to them.' Answer the following question. (i) Explain briefly the Hawthorne studies that were explained by Rajiv to his father. (ii) Do you think Rajiv's father understood and interpreted the Hawthorne studies correctly? – Comment (iii) If you were Rajiv, how would you explain to your father the new perspective that is needed for a business to be successful?	08	–	–
	b	Principles of Taylor and Fayol are mutually complementary. One believed that the management should share the gains with the workers, while the other suggested that employee's compensation should depend on the earning capacity of the company and should give them a reasonable standard of living. (i) Identify and explain the principles of Fayol and Taylor referred to in the above statements. (ii) Excluding the principles identified in (i) explain briefly the other principles of Fayol to the contribution of management.	08	–	–
3	a	Pan Masala and Sons is a manufacturer of tobacco products. It decided to increase profits by at least 20% in the next quarter. It has many options: A. To increase the working hours of labourers without additional payment. B. To employ children from the local community. C. To sell its products outside the schools and colleges. It opted the (B) and (C) options to achieve the target. (i) Identify the function of management described in the above Para. (ii) State the steps of the process involved in the function of management identified in (i) quoting the lines from the above Para. (iii) State any two values neglected by the organization.	08	–	–
	b	Explain briefly the steps of Strategic Management Process with an example.	08	–	–
OR					

4	a	"Shan Spices Ltd." are the manufacturer of different food specific spices like Rajmaa Masala, Cholley Masala, Aaloo Parantha Masala etc. Mr. Raghav, the owner of the company has created different departments for purchase, production, marketing, finance and human resource. There are thirty employees working in the organization. Planning is of paramount importance to the company as Mr. Raghav believes that effective planning leads to achievement of organizational objectives. So in order to make employees focus on objectives, he issued instructions that during working hours only official matters will be discussed. He made certain rules and code of conduct for the employees to follow, according to which employees are not allowed to visit and talk to the employees of other departments except for official work. He emphasized on work performance which resulted in smooth functioning of the organization. (i) Identify and state the type of organization mentioned in the above Para. (ii) State one feature of the concept identified in part (a) as mentioned in the above Para. (iii) What was the purpose behind the formulation of rules for the employees that restricted their personal communication with the employees of other departments? (iv) State two values violated by Mr. Raghav.	08	–	–
	b	Identify whether the following examples are Organic or Mechanistic in Structure and explain briefly the salient features of it. (i) Consulting Firm (ii) Department of Motor Vehicles. (iii) Universities (iv) Facebook Corporation.	08	–	–
5	a	Atuliya has started his own consultancy firm under the name 'Happy Go Lucky' after working for five years in a company as a wedding planner. Considering the fact that he is into a labour intensive business and motivation is a complex process, Atulia wants to offer such rewards and benefits that will help to fulfill the various needs of the employees and will inspire them to give their best to the organisation. In the context of the above case: (i) Why is motivation considered to be a complex process? (ii) Name the various types of needs that exist in a hierarchy within every human being. Also, suggest any two suitable incentives for each of these that Atulia may offer to his employees.	08	–	–
	b	Human beings cannot be motivated only through monetary incentives. Non-monetary incentives are also necessary to motivate them. Explain any four such non-monetary incentives.	08	–	–
OR					

6	a	Umang Gupta is the Managing Director of Denver Ltd. The company had established a good name for itself and had been doing well. It was known for timely completion of orders. The Production Manager, Ms. Kanta was efficiently handling the processing of order and had a team of fourteen motivated employees working under her. Everything was going on well. Unfortunately she met with an accident. Umang knew that in the absence of Ms. Kanta, the company may not be able to meet the deadlines. He also knew that not meeting the deadlines may lead to customer dissatisfaction with the risk of loss of business and goodwill. So, he had a meeting with his employees in which accurate the speedy processing of orders was planned. Everybody agreed to work as team because the behaviour of Umang Gupta was positive towards the employees of the organisation. Hence everyone put in extra time and efforts and the targets were met on time. Not only this, Umang visited Ms. Kanta and advised her to take sufficient rest. (i) Identify the leadership style of Umang Gupta and draw a diagram depicting the style. (ii) State any two values highlighted by the behaviour of Umang Gupta. (iii) List some of the primary characteristics of leadership identified in (i).	08	–	–
	b	Describe briefly the various Types of Situational Leadership Styles as identified by Blanchard and Hersey. Explain with an example.	08	–	–
7	a	In an analysis of the market for paint, an economist discovers the facts listed below. State whether each of these changes will affect supply or demand, and in what direction. (i) There have recently been some important cost-saving inventions in the technology for making paint. (ii) Paint is lasting longer, so that property owners need not repaint as often. (iii) Because of severe hailstorms, many people need to repaint now. (iv) The hailstorms damaged several factories that make paint, forcing them to close down for several months.	08	–	–
	b	Describe briefly the circular flow economy model diagram with neat sketch.	08	–	–
8	a	Describe briefly the four different types of *GDP* and show how the *GDP* is calculated based on income.	08	–	–
	b	Explain briefly how the *AS–AD* model incorporates growth, unemployment, and inflation in economy.	08	–	–

DEPARTMENT OF INDUSTRIAL ENGINEERING AND MANAGEMENT

INTRODUCTION TO MANAGEMENT AND ECONOMICS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6.

		PART-A	M	BT	CO
1	1.1	The power to hold workers accountable for their actions and to make decisions about the use of organizational resources is known as _____.	01	–	–
	1.2	_____ was one of the first to recognize that organizations could be viewed from the perspective of individual and group behavior.	01	–	–
	1.3	Management Science came into existence in a _____ context.	01	–	–
	1.4	In the behavioral management approach what is the primary focus of the manager is _____.	01	–	–
	1.5	In a mechanistic organization, communication is mostly _____.	01	–	–
	1.6	_____ Structures include cross-hierarchical and cross-functional teams and a flat structure.	01	–	–
	1.7	Grouping activities on the basis of customer flow is _____ departmentalization.	01	–	–
	1.8	Procter & Gamble has separate departments for Tide, Pampers, Charmin, and Pringles. This is an example of departmentalization by _____.	01	–	–
	1.9	In Maslow's hierarchy of needs, _____ is the highest level of need?	01	–	–
	1.10	The offering of employee health insurance addresses which of Maslow's needs?	01	–	–
	1.11	Individuals become leaders based on their _____.	01	–	–
	1.12	The ability to influence people through granting or withholding benefits that are of interest to them is called _____.	01	–	–
	1.13	Mr. X is the only person in the company with expertise in the E-Commerce field. This source of power is called _____.	01	–	–
	1.14	The demand for a good increases when the price of a substitute _____ and also increases when the price of a complement _____.	01	–	–
	1.15	The price elasticity of demand is 5.0 if a 10 percent increase in the price results in a _____ decrease in the quantity demanded.	01	–	–
	1.16	Adam Smith called price mechanism as _____.	01	–	–
	1.17	An economy that interacts with other economies is known as _____.	01	–	–
	1.18	_____ growth is the percentage increase in the real GDP.	01	–	–
	1.19	Microeconomics and Macroeconomics are the study of _____ and _____ respectively.	02	–	–

PART-B

2	a	Discuss Hawthorne effect in today's workplace. How can managers apply these concepts to improve work performance?	08	–	–
	b	Elaborate on the contributions of Henry Fayol to Management theory and justify the relevance of this theory for today's organizations.	08	–	–
3	a	Though decentralization is a welcome idea for efficient administration of any organization, but it comes with it's own drawbacks. Discuss.	08	–	–
	b	In today's business environment, more than any preceding era, the only constant is change. Successful organizations effectively manage change, continuously adapting their bureaucracies, strategies, systems, products, and cultures to survive the shocks and prosper from the forces that decimate the competition. With this context explain in detail the Strategic Management process.	08	–	–
		OR			
4	a	The Taj West End Hotel has divisions such as reception, outdoor catering, conference hall maintenance and sales. With a schematic representation, illustrate the type of organization structure with advantages and disadvantages.	08	–	–
	b	Describe the situations where the decision making can be Decentralized. Explain any two cases in detail.	08	–	–
5	a	Theory X follows lower order needs and Theory Y follows higher order needs. Elucidate using Maslow's hierarchy of needs theory.	08	–	–
	b	Discuss the findings of Ohio state studies in reference to this following quotation by Mahatma Gandhi "I suppose leadership at one time meant muscles; but today it means getting along with people".	08	–	–
		OR			
6	a	Explain the three key linkages in expectancy theory and their role in motivation, which affect a worker's level of performance with an example?	08	–	–
	b	Exhibit the relationship between task behavior and relationship behavior using Blake & Mouton's managerial grid.	08	–	–
7	a	Would you expect supply to play a more significant role in determining the price of a basic necessity like food or a luxury like perfume? Explain.	08	–	–
	b	Will the firms in an oligopoly act more like a monopoly or more like competitors? Briefly explain.	08	–	–
8	a	With the help of a neat sketch explain the concept of IS–LM model used in macroeconomics.	08	–	–
	b	Whether the classical growth theory of macroeconomics is relevant in today's economic scenario.	08	–	–

V / VI Semester B. E. Fast track Examinations Oct-2020

FOUNDATIONS OF MANAGEMENT AND ECONOMICS

Time: 02 Hours ***Maximum Marks: 50***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6

PART-A

1	1.1	What is meant by efficiency and effectiveness in the context of management?	01
	1.2	Distinguish between systems theory and contingency approaches.	01
	1.3	What is meant by Organizational Structure?	01
	1.4	State two important reasons for an appropriate Span of Management.	01
	1.5	Mention the goals of Organizational Behavior.	01
	1.6	Mention the contemporary concerns affecting leadership.	01
	1.7	List any four problems in achieving efficiency in Production and Distribution.	01
	1.8	What is meant by the term Market Mechanism?	01
	1.9	Mention any two equivalent ways of measuring GDP using circular flow model.	01
	1.10	What are the different ways of classifying unemployment according to economists?	01

PART-B

2	Dell Inc. is a company that understands the importance of management skills. It started an intensive five-day offsite skills training program for their employees as a way to improve its operations. One of Dell's directors of learning and development thought this was the best way to develop skills who can build that strong relationship amongst the employees. In the above context, explain different Managerial Skills.	08
3	*CEO* of Cisco Systems likes to listen to voice mails forwarded to him from dissatisfied customers. He says "E-mail would be more efficient but I want to hear the emotions, I want to hear the frustration, I want to hear the caller's level of comfort with the strategy we're employing. I can't get that through e-mail". This manager understands the importance of customers. In this context, explain in detail the steps involved in the process of strategic management.	08
	OR	

4	Food marketer Smart Balance Inc. helps people stay trim and lean with its heart-healthy products. The company outsources almost every other organizational function including manufacturing, product distribution, Marketing and Sales. With a schematic representation, illustrate the suitable type of organizational structure with the advantages and disadvantages.	08
5	"Today's managerial challenge is to inspire, motivate and enable knowledge of the employees to solve day-to-day problems that cannot be anticipated". Explain in detail the importance of Maslow's Hierarchy of needs in the given scenario.	08
	OR	
6	"If the group situation was highly unfavorable but was led by a relationship-oriented leader, the group's performance could be improved by replacing that person with a task-oriented leader". Explain how Fiedler model would support the given statement.	08
7	Companies often build models of their new products, which are more rough and unfinished than the final product will be, but can still demonstrate how the new product will work. Explain how Economists apply the steps of scientific method in the given scenario.	08
8	Assume that the Government of a big open economy decides to increase its public spending that influence domestic income and interest rate given that we face perfect capital mobility under the flexible exchange rate regime. Explain in what way the Mundell Fleming model has an impact on this.	08

	1.8	Identify the shortcuts individuals use in making judgments about others.	02
	1.9	How the fundamental attribution error and self-serving bias can distort attributions?	01
	1.10	Define group think and social loafing.	02
	1.11	List the major dimensions of transformational leadership.	02

PART-B

2	a	Define Management. Propose various functions of Management as applied to a modern manufacturing organization. Highlight the specific requirements of a typical manufacturing organization from the functional management perspectives.	08
	b	Identify and categorize the Mintzberg's roles of managers regardless of type of organization and levels in the organization. Explain each role briefly.	08
		OR	
3	a	Henry Fayol described the practice of management as a distinct function. Explain fundamental rules of management that could be applied to all organizational situations.	10
	b	Several of our current management ideas and practices can be directly traced from contributions of quantitative approach. Is it true or not? Justify with a suitable example.	06

4	a	What is a goal? Explain the steps in Goal setting.	06
	b	Illustrate eight steps of decision making process with a suitable example of any organization.	10
		OR	
5	a	A hotel has departments such as front desk operations, sales, catering, housekeeping, laundry and maintenance. With a schematic representation, illustrate the type of organization structure with the advantages and disadvantages.	08
	b	What is the purpose of Job Enrichment and Job Enlargement?	08
6	a	Illustrate the components of attitude and its impact on a dissatisfied employee.	06
	b	One day the Boss comes in and he is nervous, edgy and argumentative. The next day he is calm and relaxed. Does this behavior suggest that personality traits are not consistent? Explain the situation with a suitable personality model.	10
		OR	
7	a	An employee does an unsatisfactory job on an assigned project. Explain the attribution process that this person's manager will use to form judgments about this employee's job performance.	10
	b	What is social learning? Explain with examples any two processes that determine the effectiveness of this type of learning.	06
8	a	Discuss the stages of Group Development.	08
	b	Explain the major types of teams found in the organizations. Distinguish between teams in formal and informal organizational settings.	08
		OR	
9	a	"Theory *X* follows lower order needs and Theory *Y* follows higher order needs". Elucidate using Maslow's hierarchy of needs theory.	08
	b	Explain the three key linkages in expectancy theory and their role in motivation, which affect a worker's level of performance with an example.	08
10	a	What are the distinctive aspects of Leadership as a process? Examine the important outcomes of Ohio state studies over University of Michigan studies. Bring out the differences in the outcome.	10
	b	Exhibit the relationship between task behavior and relationship behavior using Blake & Mouton's managerial grid. When each style is justified?	06
		OR	
11	a	Define controlling. Explain in detail the three steps in the control process. What is the role played by Feedback and Feed forward mechanisms in an organizational context?	08
	b	What do you mean by organizational performance? Describe the three frequently used organizational performance measures.	08

Supply Chain Management

VI Semester SEE Question Papers

Course codes: IM362IA, 18IM63

- Aug 2025 (IM362IA)
- Sep 2023 (18IM63)
- Aug 2022 (18IM63)

RV COLLEGE OF ENGINEERING®

(An Autonomous Institution Affiliated to VTU)

VI Semester B. E. Regular Examinations August-2025

Industrial Engineering and Management

SUPPLY CHAIN MANAGEMENT

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2 is compulsory. Answer any one full question from 3 and 4, 5 and 6, 7 and 8, 9 and 10.

PART-A

			M	BT	CO
1	1.1	_____ strategy define the set of customer needs a firm seeks to satisfy through its products and services.	01	1	1
	1.2	Id execution of a process is initiated in response to a customer order then that process is called _____ process.	01	1	1
	1.3	_____analysis evaluates the present value of any stream of future cash flows and allows management to compare two streams of cash flows in terms of their financial value.	01	1	2
	1.4	Write the objective function to minimize total supply chain cost for capacitated plant location model.	01	1	2
	1.5	If optimal lot size is 980 units, annual demand is 12000 units, then average flow time is _____ years.	01	2	3
	1.6	If desired cycle service level is given, the required safety inventory is computed using the formula _____.	01	1	3
	1.7	_____ is a SCM collaborative initiative that aims to improve the design of products through collaborations between manufacturers and suppliers.	01	1	4
	1.8	A mode with higher transportation costs can be justified if it results in significantly lower _____.	01	1	4
	1.9	Fluctuations in orders increases as they move up the supply chain from retailers to wholesalers to manufacturers to suppliers is called _____.	01	1	4
	1.10	In the context of 'Managerial Levers to Achieve Coordination', sharing point of sale data improves _____ accuracy.	01	1	4
	1.11	List the basic steps in achieving strategic fit.	02	1	1
	1.12	Graphically show the relationship between number of facilities and inventory costs, transportation costs, facilities cost.	02	1	2
	1.13	What are the managerial levers to reduce safety inventory without reducing product availability?	02	1	3
	1.14	Give an example to demonstrate Milk run concept.	02	2	4
	1.15	Illustrate the key participants involved in a Business-to-Consumer (B2C) e-commerce transaction with practical example.	02	2	4

PART-B

2	a	Discuss the cycle and push/pull views of a supply chain. Which of the two views is very useful when considering strategic and operational decisions?	10	3	1
	b	Justify this statement with an example: 'It is necessary to achieve a fit between competitive and functional strategies'.	06	4	1

3	a	With the help of block diagram, explain a framework for supply chain network design decisions.	10	2	2
	b	Draw the diagram of 'Manufacturer storage with direct shipping' type of design option for transportation. Identify it's any THREE performance characteristics connected to service.	06	2	2
		OR			
4	a	Critically analyze the impact of globalization on supply chain networks and discuss the key risks that arise in global supply chains.	10	4	2
	b	During network design, managers need a methodology that allows them to estimate the uncertainty in their forecast of demand and price and then incorporate this uncertainty in the decision-making process. In this context, explain such a methodology for evaluating network design decisions under uncertainty.	06	2	2
5	a	Daily demand for PCs at Dell is normally distributed, with a mean of 2500 and a standard deviation of 500. A key component in PC assembly is the hard drive. The hard drive supplier takes an average of 7 days to replenish inventory at Dell. Dell is targeting CSL of 90 percent (providing a fill rate close to 100 percent) for its hard drive inventory. Evaluate the safety inventory of hard drives that Dell must carry if the standard deviation of lead time is seven days. Further, Dell is working with the supplier to reduce the standard deviation to zero. Evaluate the reduction in safety inventory that Dell can expect as a result of this initiative. Compare above 2 cases of safety inventory evaluations and bring out the key insight about impact of lead time uncertainty on safety inventory.	10	4	3
	b	Identify managerial levers that reduce lot size and cycle inventory in supply chain without increasing cost.	06	2	3
		OR			
6	a	Elaborate the impact of demand and supply uncertainties on the safety inventory in an organization.	10	3	3
	b	Explain the role of Information Technology (IT) in effective inventory management.	06	2	3
7	a	Evaluate the strengths and weakness of different modes of transportation.	10	2	4
	b	Given the customer density and distance from warehouse how should a firm like W.W. Grainger should tailor its transportation network? Explain.	06	2	4
		OR			
8	a	What is the role of supply contracts? Elaborate on types of contracts and their impact on supplier performance and information distortion.	10	2	4
	b	What are some ways that a firm like Wal-Mart benefits from good sourcing decisions?	06	2	4
9	a	What do you mean by bullwhip effect? In the context of supply chain management, how do coordination mechanisms and the bullwhip effect impact performance outcomes? Discuss.	10	3	4

	b	Elaborate on the core processes of CRM and their importance in managing customer relationships.	06	2	4
		OR			
10	a	What do you understand by VMI? Compare it with continuous replenishment and explain how manufacturers benefit from VMI.	10	3	4
	b	How does collaboration through CPFR impact supply chain performance? Discuss.	06	2	4

VI Semester B. E. Examinations September-2023
Industrial Engineering and Management

SUPPLY CHAIN MANAGEMENT

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6.

PART A

1	1.1	Decisions regarding inventory policies to be followed are made during _____ phase of supply chain.	01
	1.2	_____ cycle occurs at the manufacturer/supplier interface and includes all processes to ensure that materials are available for manufacturing to occur according to schedule.	01
	1.3	Graphically show intracompany intrafunctional scope of strategic fit.	02
	1.4	_____ analysis evaluates the present value of any stream of future cash flows and allows managers to compare different cash flow streams in terms of their financial value.	01
	1.5	Highlight the classification of network design decisions.	02
	1.6	Average flow time is calculated using the expression _____.	01
	1.7	The discount factor used to obtain the present value of money in the next period where k represents the rate of return is _____.	01
	1.8	State the two reasons which leads quantity discounts to increase the supply chain surplus.	02
	1.9	The set of business processes required to purchase goods and services is called _____.	01
	1.10	What do you mean by vendor managed inventory system?	02
	1.11	Party that requires the movement of products between two points in the supply chain is called _____.	01
	1.12	Cooperative supply chain relationships developed to enhance the overall business performance of both parties is a definition of _____.	01
	1.13	Mention the salient features of second price or Vickrey auction.	01
	1.14	Citing an example clarify which are the parties involved in $B2C$ e-business.	02
	1.15	If the manager at ABC store manages inventory such that the store does not run out of inventory in 6 out of 10 replenishment cycles, then store achives a CSL of _____%.	01

PART B

2	a	Discuss the push/pull processes in the Dell supply chain and identify the push/pull boundary.	08
	b	Compare and contrast efficient and responsive supply chains with examples.	08
3	a	Suggest a suitable design of distribution network for commodity products. Discuss the key features of such a design.	06
	b	Steel Appliances(SA) manufactures high quality refrigerators and cooking ranges. SA has one assembly factory located near Bangalore from which the products are supplied to the entire country. Demand has grown rapidly and the CEO of SA has decided to set up another factory to serve its eastern markets. The supply chain manager is asked to find a suitable location for the new factory. Three plants located in Chennai, Pune and Noida will supply parts to the new factory, which will serve markets in Assam, Meghalaya, Manipur, Nagaland and Arunachal Pradesh. The coordinate location, the demand in each market, required supply from each plant and the cost for each supply source or market are given in the following table. Use gravity location model to locate the new plant, also calculate the total transportation cost.	10

$Sources/markets$	$Transportation\ cost\ Rs./Ton\ km$	$Quantity\ in\ Tons$	$Coordinates$	
			Xi	Yi
$Supply\ sources$				
$Chennai$	0.90	500	700	1200
$Pune$	0.95	300	250	600
$Noida$	0.85	700	225	825
$Markets$				
$Assam$	1.50	225	600	500
$Meghalaya$	1.50	150	1050	1200
$Manipur$	1.50	250	800	300
$Nagaland$	1.50	175	925	975
$Arunachal\ Pradesh$	1.50	300	1000	1080

OR

4	a	How has globalization made strategic fit even more important to a company's success?	05
	b	Motorola has gone from manufacturing all its cell phones in house to almost completely outsourcing the manufacturing. What are the pros and cons of the two approaches?	05
	c	Locate the following product on the implied uncertainty (demand) spectrum: Salt, Rice, tooth brush, small cars, $SUV, IPOD$, Mobile phone with blue-tooth technology, Text books, Coffee, credit card.	06
5	a	Explain the role of cycle and safety inventory in supply chain practices.	08
	b	Weekly demand for microwave ovens at Best Buy store is normally distributed with a mean of 2500 and a standard deviation of 500. It takes two weeks to supply a Best Buy order. Best Buy targeting a CSL of 90% and monitors its inventory continuously. How much safety inventory of microwave ovens should Best Buy carry?	08

		OR	
6	a	Consider the following marginal unit discount problem. $\begin{array}{\|c\|c\|}\hline \textbf{\textit{Order Quantity}} & \textbf{\textit{Unit price (in Rs.)}} \\ \hline 0-4000 & 15/- \\ \hline 4000-7000 & 14/- \\ \hline Over\ 7000 & 13/- \\ \hline \end{array}$ Order cost= $Rs.150/-$, Holding charges= 10%, Annual Demand= 6000 units. Evaluate the order quantity.	10
	b	Weekly demand for 12" frames at the Frame shop is normally distributed with a mean of 250 and a standard deviation of 150. The store manager continuously monitors inventory and currently orders 1,000 frames each time the inventory drops to 600 frames. The manufacturer currently takes two weeks to fill an order. How much safety inventory does the store carry?	06
7	a	Explain the factors affecting transportation decisions.	10
	b	What is tailored transportation? Explain its importance in distribution.	06
8	a	Describe supply chain co-ordination and the bull whip effect and their impact on supply chain performance.	10
	b	What factors lead to batching of orders within a supply chain? How does this affect co-ordination? What actions can minimize large batches and minimize co-ordination.	06

RV COLLEGE OF ENGINEERING®

(An Autonomous Institution affiliated to VTU)

VI Semester B. E. Examinations August-2022

Industrial Engineering and Management

SUPPLY CHAIN MANAGEMENT

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6.

PART A

1	1.1	Cisco's decisions regarding its choice of supply sources for components, contract, manufacturing, and location and capacity of its warehouses are all under the purview of SC _____ decisions.	01
	1.2	Draw the cost-responsiveness efficient frontier curve.	02
	1.3	_____ cycle occurs at the manufacturer/ supplier interface and includes all pressures to ensure that materials are available for manufacturing to occur according to schedule.	01
	1.4	The coordinate location of a manufacturer is (40, 60). The coordinate location of its customer is (20,10). The manufacturer is required to supply 200 compressors to this customer. The cost of transporting one compressor is Rs.100. Using the gravity location model, determine the distance between the manufacturer and supplier, and the total transportation cost.	02
	1.5	Identify any two macro-economic factors that affect or influence the network design decisions in a supply chain.	02
	1.6	List the risks that are to be considered during network design.	02
	1.7	If the manager at B& M manages inventory such that the store does not run out of inventory in 6 out 10 replenishment cycles, then stores achieves a CSL of _____%.	01
	1.8	What are the two factors which determine appropriate level of safety inventory?	02
	1.9	A _____ is a transportation method in which a truck either delivers product from a single supplier to multiple retailers or goes from multiple suppliers to a single retailer.	01
	1.10	Mention any two benefits of effective sourcing decisions.	02
	1.11	Identify the supply macro processes.	02
	1.12	List any four managerial levers to achieve coordination.	02

PART B

2	a	Sketch the framework for structuring the drivers of supply chain performance. Choose any one of the Indian organizations and discuss the structuring of its drivers.	08
	b	Sketch and explain the push/pull process view of the Dell supply chain.	08
3	a	Discuss in detail about the role, factors influencing with respect to facility location for a pharmaceutical Supply chain.	08
	b	Identify the uncertainties influencing supply chain network design.	08
		OR	
4	a	What is a decision tree? Elucidate the methodology involved in evaluating supply chain network design decisions using decision tree analysis.	08
	b	Discuss how you evaluate the performance of a distribution network along the two dimensions namely: customer needs and the cost.	08
5	a	Consider the following marginal unit discount problem. **Order Quantity** | **Unit price (in Rs.)** 0-4000 | 15/- 4000-7000 | 14/- Over 7000 | 13/- Order cost= Rs. 150/-, Holding charges=10%, Annual Demand=6000 units Evaluate the economic order quantity.	10
	b	Weekly demand for 12" frames at the Frame shop is normally distributed with a mean of 250 and a standard deviation of 150. The store manager continuously monitors inventory and currently orders 1,000 frames each time the inventory drops to 600 frames. The manufacturer currently takes two weeks to fill an order. How much safety inventory does the store carry?	06
		OR	
6	a	Explain the role of cycle and safety inventory in supply chain practices.	08
	b	Weekly demand for microwave ovens at Best Buy store is normally distributed with a mean of 2500 and a standard deviation of 500. It takes two weeks to supply a Best Buy order. Best Buy targeting a CSL of 90% and monitors its inventory continuously. The manufacturer currently takes two weeks to fill an order. How much safety inventory of microwave ovens should Best Buy carry?	08
7	a	Identify the trade-offs that managers should consider when making transportation decisions. Explain.	10
	b	Justify in the context of tailored transportation: "a firm can meet customer needs at a lower cost by using tailored transportation to provide the appropriate transportation choice based on customer characteristics."	06
8	a	Describe supply chain co-ordination and the bull whip effect and their impact on supply chain performance.	10
	b	What factors lead to batching of orders within a supply chain? How does this affect co-ordination? What actions can minimize large batches and minimize co-ordination.	06

ERGONOMICS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2 is compulsory. Answer any one full question from 3 and 4, 5 and 6, 7 and 8, 9 and 10.

PART-A

			M	BT	CO
1	1.1	Define Human Factors Engineering.	02	1	1
	1.2	State two goals of Human Factors Engineering.	02	1	1
	1.3	What is system thinking in the context of ergonomics?	02	2	1
	1.4	Mention any two uses of anthropometric data.	02	1	2
	1.5	What is the role of NIOSH in workplace ergonomics?	02	2	1
	1.6	List any two differences between discrete and continuous controls.	02	3	3
	1.7	What is meant by “Design for All”?	02	1	1
	1.8	Define selective attention with an example.	02	2	2
	1.9	Mention any two interaction styles in HCI.	02	1	1
	1.10	What is divided attention? Provide an example.	02	1	2

PART-B

2	a	Explain the process of Human Factors Engineering with a suitable example.	08	2	1
	b	Illustrate how understanding users and tasks enhances ergonomics design.	08	3	3
3	a	Explain the biomechanics of the human spine during lifting activities.	08	4	1
	b	Describe the principles for designing workstations for sitting and standing posture.	08	3	2
		OR			
4	a	Explain the principles of workspace layout using anthropometric principles.	08	3	1
	b	What are the common low back problems encountered in industrial lifting tasks?	08	2	3
5	a	Explain the types of controls and their ergonomic requirements.	08	2	2
	b	Describe the role of labels, icons, and integrative displays in control rooms.	08	2	2
		OR			
6	a	Discuss the fifteen principles of display design with examples.	08	2	1
	b	Discuss ergonomics design principles for auditory and visual displays.	08	3	2

7	a	Explain how cultural factors influence ergonomic design for diverse populations.	08	2	2
	b	Discuss the ergonomics design strategies for people with functional limitations.	08	3	2
		OR			
8	a	Explain the considerations for designing products for elderly users.	08	2	2
	b	Explain the scope and benefits of "Design for All" concept in the context of Ergonomic Design of products.	08	2	4
9	a	Discuss the effect of divided attention and time sharing in cognitive.	08	2	3
	b	Explain how selective attention and perception influence task performance.	08	2	3
		OR			
10	a	Discuss the fifteen principles of HCI design.	08	2	3
	b	Describe various interaction styles in HCI. Give suitable examples.	08	2	2

HUMAN RESOURCE MANAGEMENT & ANALYTICS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2 is compulsory. Answer any one full question from 3 and 4, 5 and 6, 7 and 8, 9 and 10.

PART-A

			M	BT	CO
1	1.1	Name any four duties of an effective HR Manager.	02	1	1
	1.2	Explain how job analysis supports effective recruitment and selection.	02	2	1
	1.3	List two types of employee interviews.	02	1	2
	1.4	What is an unstructured interview? Mention one disadvantage.	02	2	2
	1.5	What are the main objectives of employee training programs?	02	2	3
	1.6	Define performance management and state one benefit.	02	1	3
	1.7	What is an HR dashboard? How does it help HR decision - making?	02	2	4
	1.8	Why is aligning HR analytics with business objectives important?	02	2	4
	1.9	Define predictive analytics in HR.	02	1	4
	1.10	Mention any two tools used for HR predictive analytics.	02	1	4

PART-B

2	a	Describe the talent management process .How does it contribute to achieving strategic organizational goals?	08	2	1
	b	You have been assigned to develop a detailed job description for a newly created Customer Service Manager role in a rapidly growing e-commerce company. Discuss the various methods you would use to conduct job analysis for this position and justify why these methods are appropriate for this role and Industry.	08	4	1
3	a	Compare internal and external recruitment sources. Provide examples of each in different organizational contexts.	08	2	2
	b	A mid-sized IT services company is facing high employee turnover, especially among skilled software developers, and is experiencing significant skill shortages impacting project delivery timelines. Discuss how workforce planning and forecasting can help address these issues effectively. Suggest specific tools or techniques the company can use to forecast workforce needs and develop strategies to retain and attract talent.	08	4	2
		OR			
4	a	Evaluate the effectiveness of work samples and simulations as employee selection tools. For what types of jobs are these methods most useful?	08	3	2

	b	A growing telecommunications company is planning to replace its current unstructured interview process with structured interview approach for hiring Customer Service Representatives. Compare unstructured and structured interviews, highlighting the benefits of structured interviews in improving hiring outcomes. Additionally, outline the key steps you would take to design an effective structured interviews guide tailored specifically for Customer Service Representative roles in this company.	08	4	2
5	a	Discuss the stages involved in the employee training process and outline key considerations when designing an effective training program.	08	2	3
	b	A Fast-growing fintech startup is worried that its current onboarding process is not effectively supporting new employees, leading to low retention rates within the first year. Critically elevate this onboarding process, propose key metrics the company should track to measure onboarding success over time and recommend strategies to enhance employee retention and engagement through improved onboarding practices.	08	4	3
		OR			
6	a	Define performance management and differentiate it from performance appraisal. Discuss essential components of a performance management system that supports continuous development.	08	2	3
	b	A national retail chain has recently revamped its performance management system to include self-assessments, manager feedback, and peer evaluations. Evaluate the effectiveness of incorporating these multiple feedback source in driving employee development. Discuss potential challenges the organization might face when implementing this multi-rater system, and suggest ways to ensure it effectively supports ongoing talent development.	08	4	3
7	a	Explain the role of predictive analytics in HR. Illustrate how HR departments can use predictive analytics to forecast turnover, hiring needs, and employee performance.	08	3	4
	b	A growing manufacturing firm relies heavily on HR analytics that primarily analyze candidates' qualifications and work experience during recruitment. Critically assess the limitation of focusing only on these data points. Suggest other types of data or analytical methods that could provide deeper insights to improve hiring quality and reduce employee turnover. Explain how predictive analytics can be leveraged to enhance recruitment outcomes in this context.	08	4	4
		OR			
8	a	Describe statistical modeling and its application in HR research. How can HR professionals use statistical models to analyze trends and make decisions on employee performance or turnover?	08	3	4

	b	A global consumer goods company uses HR dashboards to track training participation and completion rates. However, senior management believes the dashboards fail to provide sufficient insights into how training impacts employee performance and business outcomes. Critically evaluate the current use of HR dashboards for monitoring training effectiveness. Identify common shortcoming of such dashboards and suggest ways to redesign them to deliver more comprehensive, actionable insights that link training efforts to organizational goals.	08	4	4
9	a	Define root cause analysis and explain its application in HR analytics. Provide an example of how it can uncover causes of high turnover or absenteeism.	08	3	4
	b	A multinational corporation has extensively datafied its HR processes, using extensive employee data to drive decisions and improve operational efficiency. While this has led to productivity gains, many employees feel reduced to mere data point, resulting in lower morale and engagement. Critically evaluate the impact of HR datafication on employee morale and engagement. Recommend strategies the organization can implement to balance the benefits of data-driven HR with a more human-centric, empathetic approach to managing its workforce.	08	4	4
		OR			
10	a	Explain various tools and techniques used in HR predictive analytics. Provide a real-world example where a specific tool improved recruitment or employee engagement.	08	3	4
	b	A mid-sized retail company is considering investing in predictive analytics tools to enhance its recruitment process but is concerned about the return on investment (ROI) and whether the costs will be justified. Critically evaluate the potential ROI of using predictive analytics in recruitment. Discuss how the company can measure the effectiveness of its predictive models in terms of cost savings, improved quality of hires, and reduction in employee turnover.	08	4	4

VI Semester B. E. Examinations September-2023

Industrial Engineering and Management

HUMAN RESOURCE MANAGEMENT AND DEVELOPMENT (ELECTIVE)

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B.In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6.

PART A

1	1.1	Distinguish between line authority and staff authority.	01
	1.2	What does equal employment opportunity co-ordinations specialization involve as an included activity?	01
	1.3	What is strategic human resource development?	01
	1.4	What is strategy map as a tool?	01
	1.5	What is meant by job analysis?	01
	1.6	Write a note on job enrichment.	01
	1.7	What is the central idea behind virtual job fairs?	01
	1.8	Mention the two goals of on-campus recruiting.	01
	1.9	What is the aspect that is demonstrated in the content validity of a recruitment test?	01
	1.10	What does 'intelligent tests' measure?	01
	1.11	Name any two of the "*BIG FIVE*" traits focused by Industrial psychologists.	01
	1.12	In one sentence, describe the concept of a Management Assessment Centers.	01
	1.13	Mention the main purpose of Employee Orientation.	01
	1.14	What is the utility of the On-the-Job training?	01
	1.15	What is Vestibule training?	01
	1.16	What is organizational development? (In one sentence).	01
	1.17	Why it is generally considered to take 360-degree feedback more for development purpose than for pay purpose? Justify.	01
	1.18	Clearly describe a Behavioral Anchored Rating Scale (*BARS*) as an appraisal tool.	01
	1.19	Give any one reason as to why employee engagement is important.	01
	1.20	What is the meaning of the term psychological contract?	01

PART B

2	a	Why is it important for companies today to make their human resources into a competitive advantage? Explain how *HR* can contribute to doing this. What are some examples of employers who do this?	08

	b	What is the difference between a strategy a version and a mission? Give an example of each. Which one of the three contributes to create competitive advantages? Why?	08
3	a	Why should managers think of staffing, training, appraising and paying employees as part of the talent management process? Briefly summarize.	08
	b	Do you think companies can really do without detailed job description? Why or why not? In a company with only 25 employees, is there less need for job description? Why or why not?	08
		OR	
4	a	What are the 5 main sources of job candidates? Mention any one pro and any one cons of each of the five sources.	08
	b	Why is it important to understand how to recruit a more diverse workforce? What are the five main things a recruiter needs to do to recruit and retain a more diverse workforce?	08
5	a	What is the difference between reliability and validity in the context of employee testing? Why is it important to verify reliability and validity before administring the test for prospective employees? In what respects reliability and validity are similar?	08
	b	What are the advantages that Google realized by using screening techniques called "crowd sourcing"? How does this process work? How does this technique fit into Google's fast growth strategy?	08
		OR	
6	a	Distinguish clearly between structured interviews versus unstructured interviews. Why are structured interviews generally considered to be superior?	08
	b	Briefly discuss and give examples of atleast 5 common interviewing mistakes. What recommendations would you give for avoiding these interviewing mistakes?	08
7	a	"A well thought out orientation program is essential for all new employees, whether they have experience or not". Explain the key ideas of an orientation program and why you agree or disagree with this statement.	08
	b	What are some typical on-the-job training techniques? What do you think are some of the main drawbacks of relying on informal on-the-job training for breaking new employees into their job?	08
8	a	Discuss the pros and cons of the following four performance appraisal methods (list any one pro and one con). i) Alternation ranking method ii) Paired comparison method iii) Forced comparison method iv) Critical incident method.	08
	b	Compare and contrast performance management and performance appraisal. How does the use of information technology tools support performance management? Discuss the utility of digital dashboards.	08

Industrial Engineering and Management

HUMAN RESOURCE MANAGEMENT & DEVELOPMENT (ELECTIVE)

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B.In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6.
3. Use of statistical tables permitted.

PART A

1	1.1	List out the three important duties the human resource manager would carry out.	02
	1.2	What is meant by Strategic Human Resource Management and list any two important tools used for it.	02
	1.3	How the Job Specifications for Trained versus Untrained Personnel would differ?	02
	1.4	What are Trend Analysis and Ratio Analysis in the context of recruitment and selection process?	02
	1.5	List any two ways that would make the Interview more useful.	02
	1.6	Distinguish unstructured interview and situational interview.	02
	1.7	List the five steps in the training process.	02
	1.8	How the computer based training would be more effective in training process? List any two points.	02
	1.9	List out any four aspects to be kept in mind when conducting the interview.	02
	1.10	List the 3-steps in performance appraisal process.	02

PART B

2	a	As a new member of the Board of Directors for a local bank, Jack Nelson was being introduced to all the employees in the home office. When he was introduced to Ruth Johnson, he was curious about her work and asked her what the machine she was using did. Johnson replied that she really did not know what the machine was called or what it did. She explained that she had only been working there for 2 *months*. However, she did know precisely how to operate the machine. According to her supervisor, she was an excellent employee. At one of the branch offices, the supervisor in charge spoke to Nelson confidentially, telling him that something was wrong, but she didn't know what. For one thing, she explained, employee turnover was too high, and no sooner had one employee been put on the job than another one resigned. With customers to see and loans to be made, she continued, she had little time to work with the new employees as they came and went.	

		All branch supervisors hired their own employees without communication with the home office or other branches. When an opening developed, the supervisor tried to find a suitable employee to replace the worker who had quit. After touring the 22 branches and finding similar problems in many of them, Nelson wondered what the home office should do or what action he should take. The banking firm generally was regarded as being a well-run institution that had grown from 27 to 191 employees during the past 8 *years*. The more he thought about the matter, the more puzzled Nelson became. He couldn't quite put his finger on the problem, and he didn't know whether to report his findings to the president. Questions: i) What do you think is causing some of the problems in the bank's home office and branches? ii) Do you think setting up an HR unit in the main office would help? iii) What specific functions should an HR unit carry out? What HR functions would then be carried out by supervisors and other line managers? What role should the Internet play in the new HR organization?	08
	b	Explain the concept of competitive and functional strategies by considering an example of one from service sector, one from manufacturing sector and one from *IT* sector.	08
3	a	What is Talent Management? Describe in detail the six steps in doing a job analysis.	08
	b	Considering an example for a 'Manager' post in a nationalized bank, write the job descriptions, including summaries and job functions, using the Internet and traditional methods.	08
		OR	
4	a	Describe briefly the main internal and any five outside sources of candidates in recruiting for a job.	08
	b	Considering an example of college campus recruitment, explain briefly the steps in recruitment and selection process.	08
5	a	Explain briefly the five steps in validating a test. Consider an example of your own and explain briefly the validation of such test.	08
	b	Describe the eight tests you could use for employee selection and how you would use them?	08
		OR	
6	a	Explain briefly the two examples of work sample/simulation tests.	06
	b	Describe briefly, the different steps to design and conduct an effective interview.	10

7	a	A well-thought-out orientation program is essential for all new employees, whether they have experience or not. Explain why you agree or disagree with this statement.	10
	b	Enumerate on any six management development programs in an organization.	06
8	a	List the techniques for appraising performance of employees.	10
	b	Compare and contrast the concept of performance management and performance appraisal.	06

Industrial Engineering and Management

HUMAN RESOURCE MANAGEMENT AND DEVELOPMENT (ELECTIVE)

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1 Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.

2 Answer FIVE full questions from Part B.

PART-A

1	1.1	List out the functions of HRM.	02
	1.2	Compare HRM with HRD in two to three sentences.	02
	1.3	List out any five benefits of Manpower Planning.	02
	1.4	Distinguish between Job Description and Job Specification in two sentences.	02
	1.5	Summarize 'Competency Mapping' in two sentences.	02
	1.6	Recognize any four approaches to Executive Development.	02
	1.7	Identify any five employee welfare measures.	02
	1.8	Identify any four components for all round development.	02
	1.9	Explain HR Audit in two sentences.	02
	1.10	Identify any five rewards given to employees in manufacturing industries.	02

PART-B

2	a	List and explain the objectives of Human Resource Management and Development.	08
	b	Distinguish between Human Resource Management and Human Resource Development. Give suitable examples.	08
		OR	
3	a	Explain Man Power Planning and relate it to Human Resource Inventory.	08
	b	Discuss the methods of manpower forecasting.	08
4	a	Classify the various sources and techniques of recruitment.	08
	b	Examine the various tests used for scientific selection and suggest a method for selecting a 'lab attender'.	08
		OR	

5	a	Identify the training needs for 'lab attenders' and choose a method to train them and justify good choice.	08
	b	Formulate a training program for 'Lab Attenders' and briefly estimate a budget for the same making suitable assumptions. State explicitly the assumptions you have made.	08
6	a	Identify and briefly bring out the advantages and limitations of any two methods of Performance Appraisal.	08
	b	Develop a suitable performance appraisal system for 'lab attenders'.	08
		OR	
7	a	Examine the '360° method of Appraisal' and evaluate its applications to a 'Front office Bank Clerk'.	08
	b	Investigate the emerging trends of the *PA* process and predict the same for appraising 'Bank Clerks' during the next decade.	08
8	a	Classify the types of Employee Welfare Measures and develop a program to motivate the lab attenders to your college.	08
	b	Distinguish between Statutory and Non-Statutory Welfare programs.	08
		OR	
9	a	Recognize the approaches to employee welfare and identify a suitable approach to cover the non-teaching staff of your institution.	08
	b	Explain how employee welfare measures could be administered.	08
10	a	Describe 'Human Resources Audit' and list out its advantages.	08
	b	Discuss the characteristics of International Human Resources Management.	08
		OR	
11	a	Identify the merits and demerits of flexible working.	08
	b	Examine the work life balance among *IT* professionals and give your comments.	08

	1.6	International copyright is governed by the _____.	01
	1.7	The _____ is granted in the case of substances which are not food items or drugs as such, but are capable of being used as food and drugs.	01
	1.8	On what basis, the total royalty on the book sold is computed under the copyright agreement?	01
	1.9	If a person uses someone's song as a background in his movie, then such an act could be an example for _____.	01
	1.10	A business arrangement where one party allows another party to use a business name and sell its products or services is known as _____.	01
	1.11	List any two characteristics of an Entrepreneur.	02
	1.12	Why are small businesses important to country's economy?	02
	1.13	What are the knowledge requirements of entrepreneur?	02
	1.14	List the motivations to be an entrepreneur.	02

PART-B

2	a	Everyone has the right to the protection of the moral and material interests resulting from scientific, literary or artistic production of which he is the author. Justify the protection mechanism in India.	08
	b	List out the inventions that are not patentable in India.	08

3	a	Briefly explain the characteristics of a good trademark.	08
	b	Briefly explain the collective and certification trademark.	08
		OR	
4	a	Briefly explain the chances of refusal of a trademark application.	08
	b	Briefly explain the procedure for the registration of a good trademark.	08
5	a	Discuss briefly the need for the protection of an industrial design.	08
	b	Assume you have come up with a new programing language and have developed software. Briefly explain the procedure you would adopt for the protection of it.	08
		OR	
6	a	Discuss the rights that could be exercised by the broadcasting agency.	08
	b	Briefly explain the constraints of the design that cannot be protected by Industrial Design rights.	08
7	a	Entrepreneurial talents are the backbone of Indian economy. Justify.	08
	b	Briefly explain how an entrepreneur perceives opportunity, plan, organize resource and succeed the goal set.	08
8	a	Discuss briefly a case wherein an entrepreneur was successful in the beginning of the firm, but later lost in the race.	08
	b	Briefly explain how an entrepreneur decides on the path for success.	08

RV COLLEGE OF ENGINEERING®

(An Autonomous Institution affiliated to VTU)

VI Semester B. E. Examinations August-2022

COMMON TO AS/CH/CV/EI/IM/ME

INTELLECTUAL PROPERTY RIGHTS AND ENTREPRENEURSHIP

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6

PART-A

1	1.1	A patent application is filed on 1 January 1999. The application is published 18 months later on 1 July 2000 and granted on 30 May 2021. The patent is valid until _____.	01
	1.2	In most countries, how long does copyright last for?	01
	1.3	The broadcasting organizations like TV, Radio have a term of copyright for _____.	01
	1.4	An application for restoration of a lapsed patent shall be made within _____ months from the date of cessation of the patent.	01
	1.5	_____ entrepreneur's refusal to adopt opportunities to make changes in production formulae even at the cost of severely reduced returns.	02
	1.6	Who owns copyright in an article written by a staff member for a newspaper?	02
	1.7	Collective mark is registered by _____.	01
	1.8	Symbol of Maharaja of Air India is _____.	01
	1.9	Imagine a cricketer sets up his own company to sell his own range of clothes. What type of intellectual property can he use to show that the clothes are made by his company?	01
	1.10	Does trademark assure quality of the product?	02
	1.11	Information Technology Amendment Act in India came into force on _____.	01
	1.12	Design thinking typically helps in _____.	01
	1.13	Caitlin is creating a new product for university students. She takes a design-thinking approach. Her first step is addressing who she is creating the product for and conducts research on understanding this target market. What is this step in the design-thinking process?	01
	1.14	In order to register industrial design, design should be new and _____.	01
	1.15	What happens in the test stage of design-thinking?	02
	1.16	Individuals influencing an entrepreneur's career choice and style are known as _____.	01

PART-B

2	a	If you were to apply for an Indian Patent, how will you go about doing it stage by stage? Explain with indicative timelines for each stage?	08
	b	In order to be patentable, an invention must be worthy of a patent grant. The patent worthiness of an invention is assessed by the government through patentability requirements. Explain the essential requirements of patentability.	08
3	a	The plaintiff claimed that defendants are selling products under the trademark FEXIM that is deceptively similar to the plaintiff's mark PHEXIN which is used for pharmaceutical preparations. The defendants are selling anti-biotic tablets with the trademark 'FEXIM' with the packing material deceptively similar to that of the plaintiff whereby intending to not only to infringe the trademark but also to pass off the goods as that of the plaintiff, as the two marks are also phonetically similar. Decide referring to judicial decisions, the factors to be considered in deciding the question of deceptive similarity in passing off action?	08
	b	Enumerate the stages involved in the registration of trademarks in India.	08
		OR	
4	a	The licensing and assignment of Trademark is not subject to any control. After the grant of license or assignment, the license is free to use the trademark as he likes. Comment on this statement by explaining the difference between the licensing and assignment of Trademarks.	08
	b	Identify the grounds for refusal of registration of a trademark in India. What kind of trademarks can be registered under the (Indian) Trademarks Act, 1999?	08
5	a	The emergence of protection for industrial designs is intimately connected with the growth of industrialization and methods of mass production. In this context, explain the process of evolution of industrial design protection.	08
	b	Explain the rights conferred by copyrights to its owner. Elaborate with suitable examples.	08
		OR	
6	a	"Copyright is protection in form and not in idea". Elaborate the statement with suitable examples.	08
	b	List and explain the objectives and features of the Information Technology Act 2000.	08
7	a	Explain the risk-taking and resilience traits of Entrepreneurs with two relevant case examples.	08
	b	Discuss the importance of 'communication for a entrepreneurial process to the successful.	08
8	a	What are the major obstacles of Design Thinking these days? Discuss with relevant example.	08
	b	How Design Thinking works within a product development process? Explain with an example.	08

VI Semester B. E. Examinations April/May-19

Common to BT / CH / CV / EI / IM / ME

INTELLECTUAL PROPERTY RIGHTS AND ENTREPRENEURSHIP

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6.

PART A

1	1.1	_____ is one of the requirements for patentability in India.	01
	1.2	Registered Industrial Design has protection for _____ years from the date of filing.	01
	1.3	_____ is transmitted orally and are deeply rooted in social and cultural systems.	01
	1.4	_____ and _____ are forms of intellectual property that can be used to protect innovations.	02
	1.5	The two characteristics of a good trade mark are _____ and _____.	02
	1.6	In India protection is given to literary works until _____	01
	1.7	Does style and specific manner in which a story is presented in a news article has any protection under intellectual property? If yes, name the same.	01
	1.8	*MNC* designs a shoe in Europe. But the shoe with similar design already sold in India. Does the manufacturer have to apply for registration in India too? Will the *MNC* get registration? Justify.	01
	1.9	List two categories of cyber – crime.	01
	1.10	Ram, a final year student, is from a well – off business family. He has spotted an opportunity in his home town related to production of electricity using wind. Can he become an entrepreneur and turn this into a venture? Which characteristics of entrepreneur help Ram to become entrepreneur?	02
	1.11	Which company did Danae Rengelmann, Slava Rubin, and Eric Schell start?	01
	1.12	Name any two myths about entrepreneurship.	01
	1.13	The first step in design thinking is _____.	01
	1.14	In the Maker style of entrepreneurship the main trait is _____.	01
	1.15	Which principle of 'show and tell' should be kept in mind, while meeting the customer for the first time?	01
	1.16	Empathy, observation and _____ are the main features of Design Thinking.	01
	1.17	The stage of the personal selling process when a startup gets a purchase commitment from a customer is _____.	01

PART B

2	a	Explain the procedure for the grant of a patent in India.	10
	b	Discuss the pros and cons of protecting an invention through patents and trade secrets.	06
3	a	Explain the procedural steps involved in registration of Trade Marks in India.	04
	b	A British manufacturer of biscuits has been selling cookies in Malaysia for more than 20 years, and has had a registered trade mark 'ChipsMore' for these goods during that time. Two years ago a Malaysian company started manufacturing and selling cookies under the brand 'ChipsPlus'. Analyze the case and comment on Infringement and Passing off.	06
	c	What are the reliefs available for infringement of registered trade mark to a proprietor?	06
		OR	
4	a	Enumerate the characteristics of a good trademark.	05
	b	A company *ABC* sells electronic goods and is using '*SPEEDELECTRO*' as trademark for his company for over 12 years. However *ABC* has not registered the same. A company *XYZ* decides to sell their electronic goods as '*SPEEDELECTRONICS*'. In the mind of the people who decide to buy the goods, they would associate '*SPEEDELECTRONIC*S' as *SPEEDELECTRO* and thus because of the acquired good will of *ABC's* company, they would purchase *XYZ's* products. Can *ABC* file a suit against *XYZ*? Analyze all possibilities of the case and arrive at an outcome.	05
	c	What are deceptively similar trademarks? List the factors to be taken into consideration when deciding the question of similarity.	06
5	a	Elucidate the classification of rights of a copyright owner.	06
	b	Explain the infringement of copyrights with a case example.	10
		OR	
6	a	Define cyber space. Explain the need for cyber laws with a relevant case.	06
	b	Discuss authorship issues in works used or made by computer under copyrights.	10
7	a	Discuss any five myths about entrepreneurship.	06
	b	How are entrepreneurship styles classified? List the main characteristic traits of Bill Gates, founder of Microsoft and Narayana Murthy, founder of Infosys and identify their style?	10
8	a	What is Design Thinking? Apply design thinking process to build a system to address the problem of pollution in your city.	10
	b	Identify the sales skills to become an effective entrepreneur.	06

Common to EE / EC / IM / EI / TE

INTELLECTUAL PROPERTY RIGHTS AND ENTREPRENEURSHIP

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in the first three pages of the answer book only.
2. Answer FIVE full questions from Part B.

PART A

1	1.1	In copyright assignment, if duration is not stated then it is deemed as _____ years.	01
	1.2	Define performer's right.	02
	1.3	Right conferred by registration of design is called _____.	01
	1.4	Whether prime ministers speech can be copyrighted?	01
	1.5	Expand *MSME* and *GATT*.	02
	1.6	Compulsory license will be granted only after expiry of _____ years.	01
	1.7	Can the inventor of new process of bypass surgery claims a patent for new surgical method invented by him, can this be granted? Justify.	02
	1.8	*WIPO* was established in year _____, head quartered at _____.	02
	1.9	Mention three characteristic features of entrepreneurs.	02
	1.10	How social feasibility studies vary from technical feasibility studies?	01
	1.11	What are the two common reasons given by people who chose to become entrepreneur as the key drivers for their choice?	02
	1.12	*UPOV* stands for _____.	01
	1.13	Trademark should not be descriptive but _____.	01
	1.14	One man show generally is characteristic of _____ enterprise.	01
		PART B	
2	a	Traditional knowledge can be protected by the Indian Culture Intellects. Justify.	08
	b	Patents are not universal. Validate the statement with reference to inventions that can be patented.	08
		OR	
3	a	Elucidate scenario of *IPR* in India. With emphasis on various types of intellectual property.	08
	b	Elucidate on the process of patenting in India.	08
4	a	Explain the concept of different kind of trademarks with examples.	08
	b	Discuss the rights available to the owners of registered trademarks.	08
		OR	

5		Write short notes with proper illustrations: a) Infringement and acting trademark b) Passing off c) Eco-label d) Certification trademark.	 04 04 04 04
6	a	Explain the concept of design with reference to transfer of rights of interest.	08
	b	Elucidate various rights conferred by copyrights with emphasis on copyrights protection provisions in Indian context.	08
		OR	
7	a	Explain concept, scope and nature of copyright and allied rights.	08
	b	What is the object of registration of industrial design?	08
8	a	Entrepreneur and manager are two phases of same coin. Validate with the differentiating features among them.	08
	b	In the course of economic development, explain various types of entrepreneurs who help the development process.	08
		OR	
9	a	Elucidate the concept of entrepreneurship in India with an added note on intrapreneur.	08
	b	Explain the characteristics of entrepreneurs with emphasis in its function.	08
10		Give the critical note on: a) $MSME$ b) Feasibility studies.	 08 08
		OR	
11	a	Enumerate effect of WTO with focus on Indian micro, small and medium enterprise.	08
	b	What are various strategies for identification of business opportunities?	08

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in the first three pages of the answer book only.
2. Answer FIVE full questions from Part B.

PART A

1	1.1	*WIPO* stands for _____.	01
	1.2	Duration of patent is _____ years.	01
	1.3	The term of copyright is _____ years.	01
	1.4	Trade mark identify the _____ of the product.	01
	1.5	Passing off is a _____ remedy and it can be used to enforce _____ trade mark.	02
	1.6	'Agmark' is certification of mark used for _____.	01
	1.7	Collective mark means _____ with _____.	01
	1.8	In trade mark distinctiveness can be classified into _____ and _____.	02
	1.9	Duration of initial protection for designs under industrial Design Act 2000 is _____ years and registration can be renewed up to _____ years.	02
	1.10	_____ and _____ are the allied rights of copyright.	02
	1.11	Fictitious character can be protected under _____.	01
	1.12	To have copyright under copyright act 1957 work must be _____ and author must be _____.	02
	1.13	Intrapreneurs are usually _____ within the company and they are instructed to develop the company.	01
	1.14	Define an innovative entrepreneur.	01
	1.15	Pursuing a new venture is a _____ process.	01

PART B

2	a	Discuss the impact of *TRIPs* on Indian Patent Act 1970.	08
	b	Explain the basic requirements to grant patent under Indian Patent Act.	08
		OR	
3	a	Explain the tools for protection of Trade Secrets in India.	08
	b	Define traditional knowledge. Why traditional knowledge needs to be protected?	08
4	a	Define trade mark. Explain the features and functions of trade marks.	08
	b	Explain the enforcement of unregistered trade mark.	08
		OR	

5	a	What factors are to be considered for deciding deceptive similarity?	08
	b	Discuss the grounds on which registrar can be refused to register the trade mark.	08
6	a	Define industrial design. Why a design need to be registered under the Act.	08
	b	Discuss the rights conferred to the creator of the work under Copyright Act.	08
		OR	
7	a	Explain the rights available to the proprietor of a design by registration.	08
	b	Explain the works in which copyright existed under Copyright Act in India.	08
8	a	Define an entrepreneur. Distinguish the entrepreneur and a manager.	08
	b	Discuss the role of entrepreneur in economic development of a country.	08
		OR	
9	a	Explain the reasons for slow growth of entrepreneurship in India during British period.	08
	b	Discuss the evoluation of entrepreneur in India.	08
10	a	Discuss the impact of LPG on Micro small and medium enterprises.	08
	b	Explain the significance of governmental policies towards small scale industry in India.	08
		OR	
11	a	Discuss the reasons for entrepreneur to study the market, technical and social feasibility.	08
	b	Discuss the need and rationale of $MSME$ and its role in economic development.	08

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in the first three pages of the answer book only.
2. Answer FIVE full questions from Part B.

PART-A

1	1.1	Wool Mask is an example of _____.	01
	1.2	In the absence of any agreement, for photograph taken, or a painting, engraving, or a cinematography film mode, _____ shall be the owner.	01
	1.3	The term period of protection of geographical Indication is _____ years.	01
	1.4	Compulsory license will be granted only after the expiry of _____ years.	01
	1.5	Trademark should not be descriptive but it should be _____.	01
	1.6	In case of posthumous work, the copyright subsists for _____ years from the beginning of next calendar year, after its first publication.	01
	1.7	The question papers in *UPSE* examination are the copyright of the paper setter. Justify.	02
	1.8	List the two essential documents to be generated and submitted by an inventor.	02
	1.9	Can a color by itself be subject matter of Registration of Industrial design? Justify.	02
	1.10	If the patent is expired, can that work be carried out by other company? Justify.	02
	1.11	_____ & _____ are regarded as the two basic elements involved in Entrepreneurship.	02
	1.12	The traits of Steve Jobs are an example for _____ type of entrepreneur.	01
	1.13	List the two rationale arguments in relationship with small scale industry development in India.	01
	1.14	One man show generally is a characteristic of _____ enterprise.	01
	1.15	Copyright Act came into force on _____.	01

PART-B

2	a	Explain in detail, difference between patentable and non-patentable inventions.	08
	b	Explain the significance of traditional knowledge with two instances of controversy.	08
		OR	

3	a	Explain the different methods of transfer of patent.	08
	b	In case you run a successful business venture and have a few crucial trade secrets that gives you an edge over the competition, what precautions would you take in order to protect your trade secrets from falling onto their hands?	08
4	a	What is a trademark? What are the various steps for registration of trade mark?	08
	b	Explain the essential features of infringement of trade mark with decided case studies.	08
		OR	
5	a	Explain the grounds for absolute refusal of registration of trademark.	08
	b	Explain the features and functions of Trade mark.	08
6	a	Explain the infringement of copyright with 2 case studies.	08
	b	Explain the essential features of Industrial design.	08
		OR	
7	a	Copyright is a bundle of rights. Describe various rights enjoyed by an owner of copyright.	08
	b	Explain different types of cybercrime.	08
8	a	Elaborate on the stages of the entrepreneurship process.	08
	b	Explain the characteristics and functions of an entrepreneur.	08
		OR	
9	a	In Indian context, explain the specific role that Entrepreneurship has fulfilled in the economic development of country.	08
	b	Distinguish between an entrepreneur and a manager.	08
10	a	Explain the impact of WTO and $GATT$ on trade system.	08
	b	List the characteristics of $MSME$.	08
		OR	
11	a	What are the steps to institute $MSME$ in the Indian context?	08
	b	Write short notes on: i) Financial feasibility studies ii) Technical feasibility studies.	08

Quality Assurance

VI Semester SEE Question Papers

Course codes: 21IM63

- Sep/Oct 2024 (21IM63)

USN | | | | | | | | | | |

RV COLLEGE OF ENGINEERING®

(An Autonomous Institution Affiliated to VTU)

VI Semester B. E. Examinations Sept/Oct – 2024

Industrial Engineering and Management

QUALITY ASSURANCE

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2 is compulsory. Answer any one full question from 3 and 4, 5 and 6, 7 and 8, 9 and 10.
3. Use of statistical tables and formula handbook permitted.

PART-A

			M	BT	CO
1	1.1	What is the primary purpose of using the Pareto chart in quality improvement?	01	1	1
	1.2	What is the main objective of quality audit?	01	1	1
	1.3	A company incurs the following quality costs: Prevention cost= $10000, Appraisal costs = $15000, Internal failure costs = $20000 and external failure costs = $25000. Calculate the total quality cost and percentage of each type of cost relative to the total.	02	2	2
	1.4	What is an assignable cause of variation?	01	1	1
	1.5	What is the purpose of using control limits in control charts?	01	1	1
	1.6	A control chart for a process mean is set with upper and lower control limits of 12 and 8, respectively. A sample of size 4 has the following measurements: 9, 10, 11 and 12. Determine if this sample is in control. Justify your answer by calculating the sample mean and comparing it with the control limits.	02	3	3
	1.7	List the purpose of cumulative sum (CUSUM) control chart.	01	1	1
	1.8	What does the Average Outgoing Quality (AOQ) indicate in acceptance sampling?	01	1	1
	1.9	An acceptance sampling plan has a lot size of 1000 items and uses a single sampling plan with a sample size of 50 and an acceptance number of 2. If the defect rate is 3%, calculate the expected number of defects in the sample and determine if the lot would be accepted if the actual number of defects found is 2.	02	3	2
	1.10	What is a completely randomized design (CRD) in experimentation?	01	1	1
	1.11	What is the primary advantage of using factorial experiments?	01	1	1
	1.12	In a 2^2 factorial experiment, the effect of two factors A and B on the output was studied. The following averages were observed: y_{11}= 30, y_{10}= 20, y_{01}= 25 and y_{00}= 15. Calculate the main effects of A and B.	02	2	3
	1.13	Expand MTBF . Why is it important?	01	1	1
	1.14	What is the typical shape of the failure rate curve in reliability studies?	01	1	1
	1.15	A system consists of two components in series with reliabilities of 0.95 and 0.90 and a parallel component with a reliability of 0.85. Calculate the overall system reliability.	02	3	3

PART-B

2	a	In a production environment, what are the seven essential quality control tools? And how they can be used to optimize processes and ensure consistent product quality?	08	1	1
	b	Explain the importance of analyzing patterns on control charts in quality management. Identify three patterns that may appear, their potential causes and their impact on production. How can these patterns be addressed to maintain process control?	08	1	1
3		Construct and interpret $\bar{x}$ *and* s charts using piston ring inside diameter measurements in the Table.			

Sample Number	Observations				
1	74.030	74.002	74.019	73.992	74.008
2	73.995	73.992	74.001	74.011	74.004
3	73.988	74.024	74.021	74.005	74.002
4	74.002	73.996	73.993	74.015	74.009
5	73.992	74.007	74.015	73.989	74.014
6	74.009	73.994	73.997	73.985	73.993
7	73.995	74.006	73.994	74.000	74.005
8	73.985	74.003	73.993	74.015	73.988
9	74.008	73.995	74.009	74.005	74.004
10	73.998	74.000	73.990	74.007	73.995
11	73.994	73.998	73.994	73.995	73.990
12	74.004	74.000	74.007	74.000	73.996
13	73.983	74.002	73.998	73.997	74.012
14	74.006	73.967	73.994	74.000	73.984
15	74.012	74.014	73.998	73.999	74.007
16	74.000	73.984	74.005	73.998	73.996
17	73.994	74.012	73.986	74.005	74.007
18	74.006	74.010	74.018	74.003	74.000
19	73.984	74.002	74.003	74.005	73.997
20	74.000	74.010	74.013	74.020	74.003
21	73.982	74.001	74.015	74.005	73.996
22	74.004	73.999	73.990	74.006	74.009
23	74.010	73.989	73.990	74.009	74.014
24	74.015	74.008	73.993	74.000	74.010
25	73.982	73.984	73.995	74.017	74.013

										16	3	3
		OR										
4	a	Frozen orange juice concentrate is packed in 6-oz cardboard cans. These cans are formed on a machine by spinning them from cardboard stock and attaching a metal bottom panel. By inspection of a can, we may determine whether, when filled, it could possibly leak either on the side seam or around the bottom joint. Such a non-conforming can has an improper seal on either the side seam or bottom panel. Set up a control chart to improve the fraction of non-conforming cans produced by this machine.										
		Sample Number	1	2	3	4	5	6	7	8		
		Number of nonconforming cans, D	12	15	8	10	4	7	16	9		
		Sample Number	9	10	11	12	13	14	15	16		
		Number of nonconforming cans, D	14	10	5	6	17	12	22	8	10	3	3
	b	Explain the difference between C9p and Cpk in process capability analysis.									06	1	1
5	a	Explain various features of the Group Control Chart									06	1	1
	b	A single sampling plain is as follows: $N = 5000$; $n = 100$; $c = 3$. Plot the operating characteristic curve for the plan.									10	3	2
		OR											

6	a	Compare single, double and multiple sampling plans.	06	1	1
	b	A manufacturer uses a single sampling plan to inspect lots of 1000 items each. The sampling plan involves selecting a sample of 100 items from each lot and accepting the lot if there are 2 or fewer defective items in the sample. The incoming quality (proportion defective) is 0.02 (or 2%). Calculate the probability of accepting a lot using the binomial distribution. (i) Determine the Average Outgoing Quality (AOQ) (ii) Find the Average Outgoing Quality Level (AOQL) (iii) Calculate the Average Total Inspection (ATI) (iv) Calculate the Producer's Risk (Type I Error) (v) Calculate the Consumer's Risk (Type II Error)	10	3	2
7	a	List the principles of experimentation and provide guidelines for designing experiments.	4	2	1
	b	A chemist wishes to test the effect of four chemical agents on the strength of a particulate type of cloth. Because there might be variability from one bolt to another, the chemist decides to use a randomized block design, with the bolts of cloth considered as blocks. She selects five bolts and applies all four chemicals in random order to each bolt. The resulting tensile strengths follows.			

	Bolt				
Chemical	1	2	3	4	5
1	73	68	74	71	67
2	73	67	75	72	70
3	75	68	78	73	68
4	73	71	75	75	69

Analyze the data from this experiment (use a= 0.05) and draw appropriate conclusions. 12 3 4

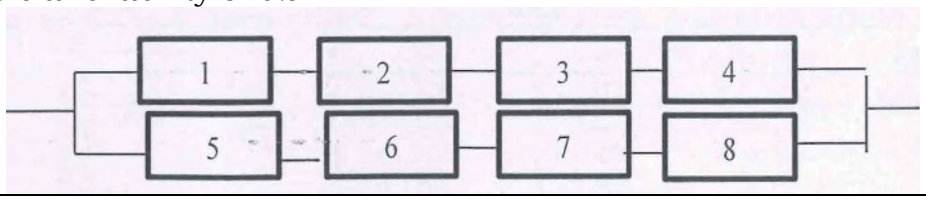

OR

8 An experiment was conducted to study the life (in hours) of two different brands of batteries in three different devices (radio, camera and portable DVD player). A completely randomized two factorial experiment was conducted and the following data resulted.

Brand of Battery	*Device*		
	Radio	*Camera*	*DVD player*
A	8.6	7.9	5.4
	8.2	8.4	5.7
B	9.4	8.5	5.8
	8.8	8.9	5.9

(i) Analyze the data and draw conclusions using | 0.05.
(ii) Which brand of batteries would you recommend? 16 3 4

9	a	Sketch the General failure rate curve (Bath tub curve) of an electronic product and identify the causes of failures in the various zones.	08	2	2
	b	In a manufacturing process, two compressors are connected to supply air to a furnace using a gas fired system. One of the compressors is standby equipment. The compressor system includes a piston, motor, coupling and compressor with the following reliabilities: $0.88, 0.90, 0.87$ *and* 0.94 respectively. The gas fired system has a reliability of 0.98 and the furnace has a reliability of 0.93 for an operating period of 150 hours. Draw the system configuration and determine the reliability of the total system for 150 hours of operation.	08	3	4

		OR			
10	a	The reliability of each component for a 20 hour operating period is as follows: • $Component\ A: RA = 0.8187\ R_A = 0.8187\ RA = 0.8187$ • $Component\ B: RB = 0.7788\ R_B = 0.7788\ RB = 0.7788$ • $Component\ C: RC = 0.6703\ R_C = 0.6703\ RC = 0.6703$ • $Component\ D: RD = 0.6703\ R_D = 0.6703\ RD = 0.6703$ • $Component\ E: RE = 0.6065\ R_E = 0.6065\ RC = 0.6065$	08	3	3
	b	Derive a general expression for the reliability of the model shown below and hence evaluate the system reliability if all components have a reliability of 0.9 	08	3	3

Financial Accounting and Costing

VI Semester B. E. Examinations September-2023

Industrial Engineering and Management

FINANCIAL ACCOUNTING AND COSTING

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6.

PART A

1	1.1	Differentiate between Book-keeping and Accounting.	02
	1.2	_____ is the basis of accounting which records expenses when resources are consumed, regardless of when payment is made.	01
	1.3	_____ is a financial statement which is driven by the need to ascertain the gross profit from the business transactions.	01
	1.4	Based on the three elements of cost, the cost variances are classified into _____, _____ and _____ variance.	02
	1.5	Variance represents the difference between _____ and _____ costs.	02
	1.6	What is process costing?	02
	1.7	During the month of March, the standard cost of actual hours worked amounted to *Rs.*42000, the standard hours allowed for actual production were 2000 and the direct labor efficiency variance amounted to *Rs.*2000 unfavorable. The standard direct labor rate per hour was _____.	02
	1.8	Differentiate between sales budget and production budget.	02
	1.9	What do you mean by Double entry systems of book keeping?	02
	1.10	If total cost of 100 units is *Rs.*5000 and those of 101 units is *Rs.*5030, then increase of *Rs.*30 in total cost is termed as _____ cost.	01
	1.11	Mention any four advantages of preparation of cost sheet.	02
	1.12	Aggregate of all direct cost is known as _____ cost.	01

PART B

2	a	Explain the different kinds of accounts and state the rules of debit and credit for them with examples.	07
	b	Journalize the following transactions in the books of Mr. Ram.	09

			Rs.
2019	*Jan* 1	*Mr. Ram started his business*	*Rs* 80,000
	Jan 4	*Brought goods for cash*	*Rs* 20,000
	Jan 6	*Deposited in Bank*	*Rs* 10,000
	Jan 8	*Sold goods to Krishna*	*Rs* 10,000
	Jan 10	*Purchased goods from Kumar*	*Rs.* 15,000
	Jan 15	*Brought furniture for cash*	*Rs.* 5000
	Jan 20	*Received commission*	*Rs.* 500
	Jan 28	*Withdrew cash*	*Rs.* 1000
	Jan 31	*Paid Rent*	*Rs.* 2000

3 a There are several mistakes in *ABC* company (Pvt) Ltd Trial Balance. You are requested to identify errors and make corrected Trial Balance.

Sl.No	*Heads of accounts*	*Debit*	*Credit*
1	*Owner equity*		1551
2	*Drawings*	560	
3	*Equipment's*	2850	
4	*Sales*		2850
5	*Due from customers*		530
6	*Purchases*	1260	
7	*Purchase return*	364	
8	*Bank loan*		996
9	*Creditors*	528	
10	*Taxes*	720	
11	*Cash in hand*	226	
12	*Note payable*	680	
13	*Inventory*		264
14	*Repair*	461	
15	*Return Inward*		98
		Rs. 7649	*Rs.* 6289

12

b Comment on the provisions for bad debts, cash discounts in the balance sheet preparation. Explain these items. 04

OR

4 Following is the Trial Balance of *M/S BMW* & Associates for the year ended 31st *July* 2021. Prepare trading, Profit & Loss *A/C* and Balance Sheet.

Particulars	*Rs.*	*Particulars*	*Rs.*
Capital	813400	*Creditors*	39000
Sales	1090000	*Purchase returns*	24500
Plant & machinery	356000	*Stock*	150500
Purchases	437000	*Discount allowed*	40000
Freight Inward	35000	*Insurance*	15000
Salaries	110000	*Advertisements*	56000
Other administration expenses	60000	*Building*	650000
Loan from IDBI	350000	*Bad debts*	2000
Furniture	75000	*Investment in NSC's*	90000
Wages	153900	*Cash*	6500
Depreciation on machinery	25000	*Bank*	13000
Debtors	42000		
Closing stock as on 31/07/2021			*Rs.* 57000

16

5 Prepare a cost sheet for the year 31/3/20216 from the following figures extracted from book of Best Engineering company.
Opening stock:
i) Raw material – 40,350
ii) Work in progress -15,000 and
iii) Finished stock -35590

Cost incurred during the period:

Materials purchased	2,50,000
Wages paid	2,00,000
Carriage inward	2,000
Consumable stores	10,000
Wages of storekeeper	7,000
Depreciation of plant & machinery	10,000
Materials destroyed by fire	5,000
Repairs and renewals	5,010
Office Managers salary	10,000
Salary to office staff	20,500
Printing and stationary	10,000
Power	10,500
Lighting for office building	2,000
Carriage outwards	3,000
Freight	5,000
Entertainment	2,500
Warehousing charges	1,500
Legal charges	2,000
Expenses for participating in industrial exhibition	6,000

Closing stock:

i) Raw material: 35,000
ii) *WIP* : 14,500 and
iii) Finished stock : 40,030
iv) Profit 25% on cost — 16

OR

6 The following are the details of Process X, process Y and process Z.

	Process X	*Process Y*	*Process Z*
Input units	2000	1840	1740
Normal loss unit	10%	5%	10%
Direct material	40,000	60,400	69,240
Wages	70,000	84,520	1,00,000
Overheads	30,000	40,000	60,000
Scrap value per unit	25	50	60
Output of Process Z is 1600*units. Prepare the necessary accounts.*			

16

7 a From the following data, calculate the labour cost variance.

Particular	*SH/unit*	*SR/hr*	*Total actual hours*	*Actual rate/hr.*
Skilled	5000	1.5	4500	2
Unskilled	8000	0.5	10,000	0.45
Semiskilled	4000	0.75	4200	0.75

Number of units produced = 1000 — 10

b Standard cost is defined as "the predetermined cost that is calculated at the management's standards of efficient operations and the relevant necessary expenditure". Elaborate on the statement with examples to illustrate your points. — 06

8	a	Expense for budgeted production of 10,000 units in a factory are given below:	

$Material$	50
$Labour$	20
$Variable\ OH$	10
$Fixed\ OH\ (Rs.50{,}000)$	5
$Variable\ expense\ (Direct)$	2
$Selling\ expense\ (10\%\ fixed)$	10
$Distribution\ expense\ (20\%\ fixed)$	5
$Administration\ expense\ (Rs.40000)$	4
$Total\ cost/unit$	106

Prepare a flexible budget for production of 8000 units indicating each items cost/unit. 10

b In what respect does the production budget contribute to managerial:

i) Planning
ii) Coordination
iii) Control

Explain. 06

VI Semester B. E. Examinations August-2022

Industrial Engineering and Management

FINANCIAL ACCOUNTING AND COSTING

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6.

PART A

1	1.1	Journal is commonly known as the book of _____ entry.	01
	1.2	The liabilities of a firm are $Rs.8{,}000$ and the capital of the proprietor is $Rs.10750/-$. The total assets are $Rs.$ _____.	02
	1.3	Use Debit or credit in the blanks below: a) Increases in expenses are _____; decreases are _____. b) Increases in assets are _____; decreases are _____.	02
	1.4	Pushpa and Company's Trial Balance contains the following information: 12% Bank loan, $Rs\,40{,}000$, Interest paid $Rs.3{,}800$. Interest debited to the profit & loss account is _____.	02
	1.5	While finalizing the current year accounts, the company realized that an error was made in the calculation of closing stock of the previous year. In the previous year, closing stock was valued more by $50{,}000/-$. As a result previous year profit is _____ and the current year profit is _____ stated.	02
	1.6	Income tax paid by Mr. A amount to $Rs.3000/-$. The accounting treatment is to be _____ from the capital.	02
	1.7	State any two examples for indirect costs	02
	1.8	A flexible budget recognizes the difference in behavior between _____ and _____ in relation to fluctuations in output, turnover or other variable factors etc.	02
	1.9	Material cost variance is the sum of _____ and _____.	02
	1.10	_____ budgets are concerned with expected cash receipts/ disbursement.	01
	1.11	List any four categories of budgets.	02

PART B

2	a	Differentiate between single entry and double entry systems of book keeping.	04

	b	Journalize the following transactions in the books of Somu 2020 March 1. Commence the business with cash *Rs* 80,000 4. Brought goods for cash for *Rs* 20,000/− 6. Deposit *Rs* 10,000 in Bank 8. Purchased goods from Kumar for *Rs* 15,000 10. Sold goods to Krishna worth *Rs.* 10,000 15. Brought furniture of *Rs.* 5000 for cash 20. Received commissions of *Rs* 500 28. Withdraw cash of *Rs* 1000 for person value 31. Paid Rent of *Rs* 2000	12
3	a	Prepare a Trial balance from the following. Name of the account — Balances in Rs Capital 10,000 Debtors 2,700 Purchases 9,500 Wages 5,000 Goods in trade 2,000 Sales 14,500 Carriage 150 Machinery 3,500 Creditors 1,400 Bank 1,500 Rent 450 Drawings 900 Sundry-expenses 200	12
	b	How is profit and loss account different from trading account? Explain	04
		OR	
4		From the trial balance of a company prepare a trading, P&L account for the year ending 30*th June* 2019 and balance sheet as on that date. Debit Balances. Rs. — Credit Balances Rs. Opening stock 750 — Capital 2625 Purchases 1490 — Returns outwards 45 Returns inwards 40 — Sales 3810 Duty on import goods 260 — Commission earned 200 Carriage on □urchases 140 — B/P 1500 Carriage on sales 200 — Sundry creditors 770 Office salaries 240 Drawing 400 — Adjustments: Rent paid 180 — Stock in hand/ Closing stock 985 General expenses 150 — Rent due but not paid 30 Bank balance 300 Cash in Hand 100 Sundry Debtors 1000 Buildings 2000 M/C 1000 B/R 250 Depreciation 200 Horses & Carts 150 Internet 90 Discount 10	16

5 a The product of a manufacturing concern passes through two processes A & B and then to finished stock. It is ascertained that in each process 5% of the total weight is lost. 10% scrap which from process 'A' & 'B' realizes $Rs.80/-$ per tonne & $Rs.200/-$ per tonne respectively. The following are the figures relating to both the processes:

	Process A	Process B
Materials (tonnes)	1000	70
Cost of Materials (Rs/tonne)	125	200
Wages (Rs)	28,000	10,000
Manfr. Expenses (Rs)	8000	5250
Output (tonnes)	830	780

Preapre the process cost account showing cost/tonne of each process. There was no stock or WIP in any process. 12

b Highlight the differences between Job costing or Process costing. 04

OR

6 The annual demand of a product is 2400 units. It is produced in batches and largest size of a single batch is 6000 units. After each batch is complete the setup cost is $Rs.750$ and annual carrying cost is $Rs.\ 2.25/unit$. Assume average inventory as $q/2$ of n. of units made in each batch. Selecting $4, 6, 8, 12$ & 24 batches/annum, determine the annual costs of each batch and state the optimum number of batches to minimize total cost. 16

7 a From the following information. Calculate total:

i) Material cost variance
ii) Material price variance
iii) Material usage variance

Material	Standard		Actual	
	Qty (kg)	Cost, Rs/kg	Qty (kg)	Cost, Rs/kg
X	10	4	12	3.75
Y	15	2	18	4.50

10

b Discuss the classification of variances. 06

8 a Expense for budgeted production of 10,000 units in a factory are given below:

Material	50	Distribution expense (20% fixed)	5
Labour	20	Administration expense (Rs. 40000)	4
Variable OH	10		
Fixed OH (Rs. 50,000)	5		
Variable expense (Direct)	2	Total cost/unit	106
Selling expense (10% fixed)	10		

Prepare a flexible budget for production of 8000 units indicating each items cost/unit. 10

b Differentiate between:

i) Sales budget and Production budget
ii) Flexible budget and Master budget 06

COMMON TO 2018 AND 2016 SCHEME

EMPLOYABILITY SKILLS AND PROFESSIONAL DEVELOPMENT OF ENGINEERS

Time: 02 Hours *Maximum Marks: 50*

Instructions to candidates:

Answer any 25 questions. Write the question number and the correct answer against the question number

1	1	Priya must survey all of the people in her department to get their ideas on how to launch a new product. The technique that would be the best to use is _____.	01
	2	The problem solving model includes _____ steps .	01
	3	The _____ is a suitable method for priotizing ideas.	01
	4	NAF technique is _____.	01
	5	The five step design thinking process popularized by Standford University's d.school includes _____.	01
	6	_____ is a method used to compare two designs (web site, app, etc.)?	01
	7	Shoe swapping is a tool for _____.	01
	8	The coin landed on heads 5 times ; its definitely going to be tails next time. The fallacy is _____.	01
	9	After a car accident , both drivers blame the other for causing the crash. Both , or at least one of them has the _____ bias.	01
	10	The scientist who provided crucial clues to the structure of DNA with the help of X-ray diffraction is _____.	01
	11	What are some ways that you can increase your creativity ? a. Practice b. Organize your life c. Educate Yourself d. All of the above	01
	12	Creativity and innovation are basically the same concepts a. True b. False c. Both a and B d. None of the above	01
	13	Sheila and her colleague are generating ideas by acting as another person. This is an example of a. Role storming b. Brainstorming c. Stepladder technique d. Brain writing	01

14.	Donald Trump was the business man behind the success of the Four seasons chain of hotels. a. True b. False c. Both a and B d. None of the above	01
15	The fishbone is a tool that helps to : a. Highlight links between ideas b. Increase creativity c. Analyze cause and effect d. None of the above	01
16	Which of the following is not one of the five phases of the creative problem-solving model? a. Preparation b. Analysis c. Incubation d. Evaluation	01
17	Creativity can be defined as a. Generation of ideas b. Identification of business ideas c. A problem- solving tool d. None of the above	01
18	Creativity is for only designers a. True b. False c. Both a and b d. None of the above	01
19	Which of the following standards must be adopted before making a decision? a. Encourage and explore different interpretations of user problems b. Work in isolation c. User research d. Make decision based on the data available	01
20	Which of the following is not a technique to generate ideas? a. Fishbone b. Brainstorming c. Mind mapping d. Shoe swap	01
21	How many steps are involved in defining a problem? a. Five b. Seven c. Eight d. Nine	01
22	Problem solving techniques can be used in a. Business problems b. Social problems c. Economical problems d. All of the above	01

23	Which of the following can help you increase your creativity? a. Practice b. Give yourself time c. Get some distance d. All of the above	01
24	Which step should you take before starting a brainstorming session? a. Define your purpose b. Define your user's feedback c. Define your solutions d. Define your profit margin	01
25	Empathy is the last stage of design thinking a. True b. False c. Both a and b d. None of the above	01
26	POV in design thinking is a. Point of View b. Position of View c. Both a and b d. None of the above	01
27	Brainstorming can be done with a. Only one person b. A group c. Random users d. Specific users	01
28	Black Hat refers to a. Devil's advocate b. Cool and in control c. Both and and b d. None of the above	01
29	Design thinking is a problem-solving technique that is used to design products and services based on the knowledge you have of what the customer needs a. True b. False c. Both a and b d. None of the above	01
30	The technique that was developed to allow everyone to be involved , to address the limitations of brain storming a. Brain reading b. Brain writing c. Brain dumping d. Reverse brain storming	01
31	Which prototypes are more basic early-stage representations of the final product or service? a. No-fidelity b. Low-fidelity c. Medium-fidelity d. High-fidelity	01

32	The greatest value of De Bono's hats technique is that it : a. Allows you to know the perspective of each person by the color of their hat b. It is fun to see the different hats c. It ensures that all perspectives are expressed d. It is an interesting team building activity	01
33	Which is not the tool for Ideation? a. Mind-map b. Brainstorming c. Brain-Writing d. Idea Probe	01
34	Design Thinking is similar to Creative Thinking a. True b. False c. Both a and b d. None of the above	01
35	What happens at testing stage? a. User Research b. User Feedback c. User Prototyping d. User Empathy	01
36	High Fidelity prototypes are a. Easy to make b. Less expensive c. Functional representation of solution d. Final products	01
37	What is counter example? a. Premises are TRUE and Conclusion is also TRUE b. Premises are FALSE and Conclusion is also TRUE c. Premises are FALSE and Conclusion is also FALSE d. Premises are TRUE and Conclusion is also FALSE	01
38	Is the following statement TRUE or FALSE? Arguments can be valid even when there is no connection between the premises and the conclusion a. False b. True c. Both a and b d. None of the above	01
39	An argument is SOUND when : a. Premises are TRUE and Conclusion is FALSE b. Premises are FALSE and Conclusion is TRUE c. All Premises are TRUE and argument is VALID d. All the above	01
40	Which of the following arguments is INVALID? a. The smartest students all go to engineering. Hence, I know that engineering students are so smart. b. Zombies do nothing but eat brains. So, Zombies are always hungry. c. Tall peaks are hard to climb. Mount Everest is a tall peak. It is hard to climb Mt Everest. d. You can trust dogs more that cats. Mr Woof is a dog and Miss Meow is a cat. You can trust Mr Woof more than Miss Meow.	01

41	The following argument is a circular argument. True or False? You can't understand something the first instant you hear it because it takes time to understand things. a. False b. True c. Both a and b d. None of the above	01
42	Is the following argument a good argument or a bad argument? Cricket keeps you fascinated with the tension. That's why the tension in cricket is so interesting. **Premise** : Cricket's tension is interesting **Conclusion** : Cricket has interesting tension a. Good argument b. Bad argument c. Both a and b d. None of the above	01
43	Is the following argument VALID, INVALID, SOUND, CIRCULAR or FINE? I just know that India will lose the match. They always do. They always lose their football matches and almost always lose cricket. I'll be more heartbroken if they lose their cricket match. I care about it more. **Premise 1** : If India loses their football match, I'll be less upset if they lose their cricket match **Premise 2:** India always loses football matches and always ALWAYS loses cricket matches. **Conclusion:** I will be upset. a. Valid b. Invalid c. Circular d. Fine	01
44	Is the following argument Valid or Invalid **Premise:** Quantum mechanics is true **Conclusion:** Therefore the predictions of quantum mechanics are all correct. a. Valid b. Invalid c. Both a and b d. None of the above	01
45	Is the following argument a case of inference to the best explanation? People who get the vaccine don't contract the disease. Therefore the vaccine prepares the immune system to fight off the disease. **Premise:** People who get the vaccine don't contract the disease **Conclusion :** The vaccine prepares the immune system to fight off the disease. a. No, it is not an inference to the best explanation b. Yes, it is an inference to the best explanation c. Both a and b d. None of the above	01

46	Is the following argument a case of inference to the best explanation? **Premise:** His parents are both doctors **Conclusion :** He will become a doctor a. Yes, it is an inference to the best explanation b. No, it is not an inference to the best explanation c. Both a and b d. None of the above	01
47	Is the following argument a good argument from evidence or a bad argument form evidence, according to Bayesianism? **Premise:** This owlet is brown. That owlet is brown. That other owlet is brown. **Conclusion :** So they all are brown. a. Good argument from evidence b. Bad argument from evidence c. Both a and b d. None of the above	01
48	Look at the argument and its four possible breakdowns. Select the best interpretation. Do not quit half-way through! College work only makes your life better if you actually graduate and finish the degree. It is just pointless to give up before you have your certificate. **a. Interpretation [1]** **Premise 1:** College will not make life better if you quit it halfway through. **Premise 2:** You should not quit something if it will not make your life better. **Conclusion :** Do not quit college half way through! **b. Interpretation [2]** **Premise 1:** Quitting college means you will not get your certificate **Premise 2:** If you will not get certificate then it is pointless **Conclusion :** College is pointless. **c. Interpretation [3]** **Premise 1:** If you quit college, you will not get your certificate **Premise 2:** If you quit college, you will not have understood what you have studied **Conclusion :** You should not quit college. **d. Interpretation [4]** **Premise 1:** If you quit college, then you will not get your certificate **Premise 2:** If you do not get your certificate then college will have been pointless **Premise 3 :** You shouldn't do something if it will be pointless. **Conclusion :** You should not quit college	01

49	Is the argument valid or invalid? The number of people in the room is x. x>3 Therefore, x>2 a. Valid argument b. Invalid argument c. Both a and b d. None of the above	01
50	Identify the fallacies in the following: Ajay: Yes, I believe there could be extraterrestrial life in the universe. Mehul : Ha! So you believe that alien UFOs have been visiting Earth for thousands of years. That's clearly studpid, there is no real evidence to support that. Ajay : I din't say anything about UFO's a. Slippery slope b. Strawman Fallacy c. Post Hoc Fallacy d. Hasty Generalization	01

Supply Chain and Logistics Management

VI Semester SEE Question Papers

Course codes: 18IM63, 16IM64, 16IM64 / 12IM72

- Grade Improvement Nov 2021 (18IM63)
- Grade Improvement Nov 2020 (16IM64)
- Fast Track Oct 2020 (16IM64 / 12IM72)
- Fast Track Jul 2019 (16IM64)

(An Autonomous Institution affiliated to VTU)

VI Semester B. E. Grade ImprovementExaminationsNov-2021

Industrial Engineering and Management

SUPPLY CHAIN AND LOGISTICS MANAGEMENT

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

Answer any FIVE full questions out of TEN. Each carries 20 marks

Use of statistical tables permitted

1	1.1	Graphically show intracompany inter functional scope of strategic fit.	02
	1.2	As the number of facilities in a supply chain increases, total transportation cost increases upto a point and then decreases. State the reason for this.	02
	1.3	Identify any two models used in analysis of network design decisions..	02
	1.4	What are the four drivers of supply chain performance?	02
	1.5	As safety inventory increases both ____ and ____ increases.	02
	1.6	If demand increases by a factor of K, the optimal lot size __ by a factor of _____.	02
	1.7	Define tailored transportation.	02
	1.8	Identify any two benefits of effective sourcing decisions.	02
	1.9	List the supply chain macroprocesses.	02
	1.10	With one example classify which are the parties involved in B2C e-business.	02
2	a	Describe the cycle and push/pull views of a supply chain. How do you relate them to supply chain of L.L Bean?	10
	b	Define supply chain management. Explain the decision phases in a supply chain.	10
3	a	Explain with suitable example, why achieving strategic fit is critical to a company's overall success.	12
	b	What are the abilities that supply chain should have if it is to be more responsive? Explain	08
4	a	List and explain the factors influencing network design decisions.	10
	b	Draw the network of the following distribution design options. Also bring out the advantages and limitations. i. Manufacturer storage with diret shipping. ii. Distributor storage with last mile delivery.	10
5	a	Being the head of TVS motors, discuss the role of network design in their supply chain.	10
	b	In the context of designing distribution network, elaborate on impact of e-business on customer service.	10
6	a	Explain the role of cycle inventory and safety inventory in supply chain practices.	10
	b	The mean demand/period for a product is 2500units with standard deviation/ period being 500units. The lead line taken is 2 weeks and review interval is 4 weeks. Assume periodic review policy and cycle service level of 90%. Find the safety stock and order upto level.	10

<table>
<tr><td>7</td><td>a</td><td>In the context of multiechelon supply chains,
Explain:

i. Nested inventory policy
ii. Integer replenishment policy.</td><td>10</td></tr>
<tr><td></td><td>b</td><td>Consider the following all unit discount pricing schedule. Annual demand is 7000 units ordering cost is Rs 60. Holiday charges are 15%. Evaluate the number of bottles that should be ordered in each lot.
<table>
<tr><td>Order quantity</td><td>Unit price in Rs</td></tr>
<tr><td>0-3000</td><td>4.0</td></tr>
<tr><td>3000-6000</td><td>3.35</td></tr>
<tr><td>6000 or above</td><td>3.05</td></tr>
</table></td><td>10</td></tr>
<tr><td></td><td></td><td></td><td></td></tr>
<tr><td>8</td><td>a</td><td>What are some ways that a firm like Walmart benefits from good sourcing decisions?</td><td>10</td></tr>
<tr><td></td><td>b</td><td>Identify pros and cons of different transportation networks.</td><td>10</td></tr>
<tr><td></td><td></td><td></td><td></td></tr>
<tr><td>9</td><td>a</td><td>Explain in detail tailored transportation network by customer density and distance.</td><td>10</td></tr>
<tr><td></td><td>b</td><td>What are the reasons for outsourcing? Illustrate with suitable examples?</td><td>10</td></tr>
<tr><td></td><td></td><td></td><td></td></tr>
<tr><td>10</td><td>a</td><td>What is bullwhip effect? What are the managerial levers that help achieve coordination in the supply chain? Explain.</td><td>10</td></tr>
<tr><td></td><td>b</td><td>What is vendor managed inventory? How it is different from continuous replenishment strategy? How manufacturer benefited out of VMI?</td><td>10</td></tr>
</table>

RV COLLEGE OF ENGINEERING®

(An Autonomous Institution affiliated to VTU)

VI Semester B. E. Grade Improvement Examinations Nov-2020

Industrial Engineering and Management

SUPPLY CHAIN AND LOGISTICS MANAGEMENT

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B.In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6.
3. Use of statistical tables permitted.

PART A

1	1.1	What are the four drives of supply chain performance?	02
	1.2	Draw cost-responsiveness efficient frontier curve.	02
	1.3	Graphically depict variation of transportation cost and response time with number of facilities.	02
	1.4	What are the two factors which determine appropriate level of safety inventory?	02
	1.5	List the supply chain macro processes.	02
	1.6	Write a note on inventory turnover ratio.	02
	1.7	If demand increases by a factor of K, the optimal lot size _____ by a factor of _____.	02
	1.8	What is Milkrun in the context of transportation?	02
	1.9	Identify any two benefits of effective sourcing of decisions.	02
	1.10	What is tailored transportation?	02

PART B

2	a	List and explain the broad steps involved in achieving a strategic fit between the company's competitive strategy and SC strategy.	10
	b	Describe the framework for structuring the drivers with the help of a block diagram.	06
3	a	Draw the network of the following distribution design options. Also bring out the advantages and limitations of the same. i) Manufacturer storage with direct slipping. ii) Distributor storage with last mile delivery.	10
	b	Identify and describe the factors influencing network design decisions.	06
		OR	

4	a	Demand allocation decisions have to be made for plants in a supply chain in which many manufacturing plants serve different markets. Multiple plants may be used to satisfy demand at a market. Perform the following to formulate a mathematical model that minimizes total cost of production, inventory and transportation. i) Identify the inputs required for mathematical model. ii) Identify the design decision variables. iii) Formulate objective function. iv) Formulate the constraint equations for the model.	10
	b	What are the six key factors to be considered when designing the distribution network? Explain briefly.	06
5	a	What is the role of cycle and safety inventory in supply chain?	06
	b	Best buy sells 3 models of computers, the Litepro, Medpro and Heavypro. Annual demands for the 3 products are 12000 *units*, 1200 *units* and 120 *units* respectively. Each model costs Best buy 500. A fixed transportation cost of 4000 is incurred each time an order is delivered. For each model ordered and delivered on the same truck, an additional fixed cost of 1000 is incurred for receiving and storage. Best buy incurs a holding cost of 20%. Evaluate the lot size that the Best buy manager should order if lots for each product are ordered and delivered jointly for all 3 models. Also evaluate the annual cost of such a policy.	10
		OR	
6	a	W.W Grainger sources from hundreds of suppliers and is considering the aggregation of inbound shipments to lower costs. Truckload shipping costs 500/*truck* along with 100 per pickup. Average annual demand from each supplier is 10,000 *units*. Each unit costs 50 and Grainger incurs a holding cost of 20%. What is the optimal order frequency and order size of Grainger decides to aggregate four suppliers/truck? What is the optimal order size and frequency if each truck has a capacity of 2500 *units*?	10
	b	Identify managerial levers that reduce lot size and cycle inventory in a supply chain without increasing cost.	06
7	a	What are the different modes of transportation? Explain briefly the important characteristics of any three of them.	10
	b	List and explain the risks of using a third party.	06
8	a	Describe supply chain coordination, the bullwhip effect and their impact on SC performance.	10
	b	What is vendor managed inventory? How it is different from continuous replenishment strategy?	06

USN | | | | | | | | | | |

RV COLLEGE OF ENGINEERING®

(An Autonomous Institution affiliated to VTU)

VI Semester B. E. Fast track Examinations Oct-2020

Industrial Engineering and Management

SUPPLY CHAIN AND LOGISTICS MANAGEMENT

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6

PART-A

1	1.1	Mention the process views of a supply chain.	02
	1.2	List the steps involved in achieving strategic fit between the supply chain and competitive strategies?	02
	1.3	Outbound transportation costs per unit tend to be higher than inbound costs. Do you agree with the above statement? Give suitable example to justify your answer.	02
	1.4	Draw a graph showcasing variation in logistics cost and response time with number of facilities.	02
	1.5	Mention the components of ordering cost.	02
	1.6	List the factors to be considered to determine appropriate level of safety inventory.	02
	1.7	Differentiate between the terms offshoring and outsourcing.	02
	1.8	What is the purpose of supplier scoring and assessment?	02
	1.9	Highlight the various funds that will impact IT in the supply chain.	02
	1.10	Mention the important characteristics of information that will support effective supply chain decisions.	02

PART-B

2	a	Consider the supply chain involved when a customer purchases a book at a book store. Identify the cycles in this supply chain and the location of the push/pull boundary.	08
	b	Give arguments to support the statement that Walmart has achieved good strategic fit between its competitive and supply chain strategies. What challenges does it face as it works to open smaller format stores in urban environments.	08
3	a	Explain the basic steps involved in decision tree analysis to evaluate supply chain decisions under uncertainty.	08
	b	Trips logistics, a third party logistics firm that provides warehousing and other services is facing a decision regarding the amount of space to lease for the upcoming three year period. The general manager has forecast that Trips logistics will need to handle a demand of 100,000 units for each of the next three years. Historically, Trips logistics has required 1,000 sq.ft of warehouse space for every 1000 units of demand. For the purposes of the discussion, the only cost Trips logistics faces is the cost for the warehouse.	

		Trips logistics receives revenue of \$1.22 for each unit of demand. The general manager must decide whether to sign a three year lease or obtain warehousing space on the spot market each year. The three year lease will cost \$1 per square foot per year, and the spot market rate expected to be \$1.20 per square foot year for each of the three years. Trip logistics has a discount rate of $K = 0.1$.	08
		OR	
4	a	How do the location and size of the warehouses affect the performance of firm such as Amazon? What factors should Amazon take into account when deciding where and how big its warehouses should be?	08
	b	Conduct *SWOT* analysis on supply chain management of Mumbai Dabbawalla.	08
5	a	Demand for Red Four mobile at best buy is 1,000 units per month. Best buy incurs a fixed order placement, transportation and receiving cost of \$4000 each time an order is placed. Each mobile costs best buy \$500 and the retailer has a holding cost of 20 percent. Evaluate the number of mobiles that store manager should order in each replenishment lot.	08
	b	What is the role of cycle and safety inventory in supply chain?	08
		OR	
6	a	Assume that weekly demand for *TVs* at SamSon office supplies is normally distributed, with a mean of 2500 and standard deviation of 500. The manufacturer takes two week to fill an order placed by the Samson manager. The store manager currently orders 10,000 *TVs* when the inventory on hand drops to 6000. Evaluate the safety inventory and the average inventory carried by Samson. Also evaluate the average time a *TV* spends at Samson.	08
	b	Explain the major components of inventory holding cost with suitable examples.	08
7	a	Highlight the Pros and Cons of different transportation networks.	08
	b	What is Tailored transportation? Mention some transportation options based on customer density and distance.	08
8	a	With neat sketch elucidate the Bull Whip effect in supply chain.	08
	b	Identify the major processes involved in effectively managing supplier Relationship.	08

16IM64

USN | | | | | | | | | | |

RV COLLEGE OF ENGINEERING®

(An Autonomous Institution affiliated to VTU)

VI Semester B. E. Fast Track Examinations July-19

Industrial Engineering and Management

SUPPLY CHAIN AND LOGISTICS MANAGEMENT

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6.

PART A

1	1.1	Consider an example of a customer purchasing a wireless router for Best Buy and paying $60. The difference between the $60 that the customer paid and the sum of all costs incurred by the supply chain to produce and distribute the router represents the supply chain is known as _____.	01
	1.2	_____ are the actual physical locations in the supply chain network where product is stored, assembled or fabricated.	01
	1.3	What is the fundamental trade-off that managers achieve when making facilities' decisions?	02
	1.4	Amazon stocks the medium to fast moving items at their intermediate warehouses and uses package carriers to transport products from the warehouses to the final customer. This is an example for _____ type of distribution network design option.	01
	1.5	Write only the objective function to minimize total supply chain cost for capacitated plant location model.	01
	1.6	List any four factors that influence network design decisions.	02
	1.7	Trade promotions generally increase cycle inventory in a supply chain and hurt performance. This realization has led many firms, including the world's largest retailer, to adopt _____, Here the price is fixed over time and no short-term discounts are offered. This eliminates any incentive for forward buying and all stages of the supply chain purchase in quantities that match demand.	01
	1.8	If demand increases by factor of k, the optimal lot size also increases by a factor of _____.	01
	1.9	The store manager at Jean-Mart currently purchases in lots of 1,000 pairs. Then Jean-Mart carries a cycle inventory of _____ pairs of jeans.	02
	1.10	Define 'Milk Run' in the context of transportation in SCM.	01
	1.11	In _____ contracts, the manufacturer charges the retailer a low wholesale price c, and shares a fraction of retailer's revenue.	01
	1.12	Define the postponement strategy.	02
	1.13	A supply chain lacks _____ if each stage optimizes only its local objective, without considering the impact on the complete chain.	01
	1.14	Fluctuations in orders increase as they move up the supply chain from retailers to wholesalers to manufacturers to suppliers is called _____.	01
	1.15	What are the five key processes involved in Internal Supply Chain Management?	02

PART B

2	a	There is a close connection between the design and management of supply chain flows (product information, and funds) and the success of a supply chain. In this context, justify "Wal-Mart' has been a leader at using supply chain design, planning and operation to achieve success.	06
	b	Outline the basic steps for achieving strategic fit between the company's competitive strategy and supply chain strategy. Further elaborate on these steps citing suitable example.	10
3	a	Draw the diagram of 'Manufacturer storage with direct shipping' type design option for transportation. Identify it's any three performance characteristics connected to service.	08
	b	During network design, managers need a methodology that allows them to estimate the uncertainty in their forecast of demand and price and then incorporate this uncertainty in the decision-making process. In this context, explain such a methodology, for evaluating network design decisions under uncertainty.	08
		OR	
4	a	With the help of block diagram, explain a framework for supply chain network design decisions.	08
	b	Justify the statement: "Network decisions have a significant impact on performance of the supply chain".	08
5	a	Demand for vitamins is 10000 bottles per month in Drugs Online (DO). DO incurs a fixed order placement, transportation and receiving cost of $Rs.100$ each time an order for vitamins is placed with the manufacturer. DO incurs a holding cost 20%. The price charged by the manufacturer varies according to the all unit discount pricing schedule shown. Evaluate the no. of bottles that DO manager should order in each lot. $Order\ quantity$ | $Unit\ price$ $0-5000$ | $Rs.3.0$ $5000-10000$ | $Rs.2.96$ $10000\ or\ above$ | $Rs.2.92$	12
	b	Describe different measures of product availability.	04
		OR	
6	a	A manufacturing company purchases 9000 parts of a machine for annual requirements ordering for month usage at a time, each part costs $Rs.20$. The ordering cost per order is $Rs.15$ and carrying charges are 15% of the average inventory per year. You have been assigned to suggest a more economical purchase policy for the company. What advice do you offer and how much would it save to the company per year?	12
	b	Give reasons for the following: i) Amazon.com has lower levels of book and music inventories than bookstore chains such as Borders and Barnes & Noble, which must keep inventory in every retail store. ii) Consider the sale of Palm personal Digital Assistants ($PDAs$) at $B\&M$ office supplies. When a new palm model is introduced, $B\&M$ carries a much higher level of safety inventory relative to demand. After few days of sales, it reduces level of safety inventory carried relative to demand.	04

7	a	Discuss by giving example. "Firms planning inventory aggregation must consider the trade-offs among transportation, inventory and facility costs".	06
	b	Identify and explain the assessment factors that are to be considered while scoring and assessing the supplies (Any ten of the factors to be identified and explained).	10
8	a	What is vendor managed inventory? How it is different from continuous replenishment strategy? How manufacturer is benefited out of VMI?	10
	b	What does $CPFR$ stand for? Elaborate on key features of $CPFR$ model.	06

Enterprise Information Systems

VI Semester SEE Question Papers

Course codes: 16IM62

- Grade Improvement Nov 2020 (16IM62)
- Fast Track Oct 2020 (16IM62)
- Apr/May 2019 (16IM62)

USN | | | | | | | | | | |

RV COLLEGE OF ENGINEERING®

(An Autonomous Institution affiliated to VTU)

VI Semester B. E. Grade Improvement Examinations Nov-2020

Industrial Engineering and Management

ENTERPRISE INFORMATION SYSTEMS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B.In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6.
3. Use of statistical tables permitted.

PART A

1	1.1	List the four key board rationales for implementing *ERP* systems.	02
	1.2	What is meant by Electronic Data Interchange?	02
	1.3	Identify the three driving forces behind reengineering.	02
	1.4	What is Business Process Reengineering?	02
	1.5	Generally datamarts exist in three forms. List them	02
	1.6	What constitutes closed loop *MRP*?	02
	1.7	What is Business intelligence as defined by Gartner Group?	02
	1.8	Summarize the two broad ways in which *EIS* applications help in effectively delivering *SCM*.	02
	1.9	What is the meaning of 'Best of Breed' in the context of Enterprise system Development and Deployment?	02
	1.10	Data warehouse projects can fail for a number of reasons. But according to Wu.J, what is one of the most common reason?	02

PART B

2	a	What is Materials Requirement Planning? Tabulate the information needed and obtained in Material Requirement planning.	08
	b	EIS is not merely integration of diverse enterprise processes, but can also possess key characteristics to meet the requirements. In the light of above statement describe any four common features found in *EIS*.	08
3	a	Reengineering is concerned with questioning the fundamentals of what is done. Illustrate how risk increases with the scope of work involved. Also outline atleast five conditions under which Reengineering works best.	08
	b	With the help of an illustration, explain different levels of *BPR* attainment with respect to process quality design.	08

OR

4	a	"*BPR* has unfortunately been associated with "downsizing" or "rightsizing", both of which means laying off workers" Comment on the above statement.	08
	b	Furnish specific examples (two each) of how *IT* has changed business practices and consumer expectations.	08
5	a	Explain the evolution of business intelligence systems with the aid of an appropriate sketch.	08
	b	Describe the four stages in business intelligence development along with an illustration.	08
		OR	
6	a	'Datawarehouses are centre points for storage for many systems' In the light of above statement, elaborate on datawarehouse linkages with information and business intelligence, with an appropriate illustration.	08
	b	Business Intelligence includes two major components-the business intelligence platform and end-user tools. Justify your answer.	08
7	a	Tabulate the main differences between *EIS* and *SCM* against the following points of comparison: Comprehensiveness, sourcing tables, processing speed and managing of constraints.	08
	b	Web enabled` technologies have revolutionized the way businesses are conducted. They have a huge impact on *SCM*. Elaborate on the above statement.	08
8	a	Review the *USP* of nest generation of Enterprise software.	08
	b	Describe atleast four features of the next generation of *EIS* software.	08

USN | | | | | | | | | | |

RV COLLEGE OF ENGINEERING®

(An Autonomous Institution affiliated to VTU)

VI Semester B. E. Fast Track Examinations Oct-2020

Industrial Engineering and Management

ENTERPRISE INFORMATION SYSTEMS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B. In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6.

PART-A

1	1.1	List any four common features of *EIS*.	02
	1.2	What re the key inputs to *MRP* system?	02
	1.3	Mention any two driving forces behind reengineering.	02
	1.4	What is business intelligence?	02
	1.5	List any four application areas in data mining.	02
	1.6	What is data integrity?	02
	1.7	What is product lifecycle management?	02
	1.8	How does *EIS* applications help in effective delivering of supply chain management.	02
	1.9	List any two new technologies which enhances *EIS* implementation.	02
	1.10	Mention any two features of next generation *EIS* software.	02

PART-B

2	a	Identify and explain four key rationales for implementing Enterprise Resource planning systems.	08
	b	Highlight the Pros and Cons of a typical Enterprise Information systems.	08
3	a	Draw a typical flow of inputs converted to outputs through a process, with the focus on measures of process effectiveness.	08
	b	Provide specific examples (two each) of how *IT* has changed business practices and consumer expectations.	08
		OR	
4	a	Analyze the various conditions under which reengineering works better.	08
	b	With the help of suitable examples highlight different levels of *BPR* attainment with respect to process quality design.	08
5	a	Establish a roadmap to embrace the evolution of business intelligence from simple data to support business decision making.	08
	b	With the help of suitable examples bring out the difference between data warehousing and data mining.	08

		OR	
6	a	Establish relationship of data warehouses and business intelligence.	08
	b	Mention the various applications of data mining.	08
7	a	Compare Enterprise Information systems and supply chain management based on several dimensions.	08
	b	Analyze the impact of web enabled enterprise information systems/ Enterprise resource planning on supply chain management.	08
8	a	Analyze the various features of Next generation of enterprise software.	08
	b	Explain few of the futuristic trends in the development of enterprise information systems.	08

VI Semester B. E. Examinations April/May-19

Industrial Engineering and Management

ENTERPRISE INFORMATION SYSTEMS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1. Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2. Answer FIVE full questions from Part B.In Part B question number 2, 7 and 8 are compulsory. Answer any one full question from 3 and 4 & one full question from 5 and 6.

PART A

1	1.1	List any four common features of EIS.	02
	1.2	Mention three $C's$ behind Reengineering process.	02
	1.3	What are the three key steps in Business Intelligence?	02
	1.4	List any two of the benefits of PLM.	02
	1.5	List the various components of a successful BI architecture.	02
	1.6	What are the different forms of data marts?	02
	1.7	Give four examples of data mining applications.	02
	1.8	Differentiate between $OLAP$ and $OLTP$.	02
	1.9	Draw a typical block diagram of MRP system.	02
	1.10	Expand $MRP-III$.	02

PART B

2	a	Highlight the Pros and cons of a typical EIS system.	08
	b	Explain the various reasons for implementing ERP.	08
3	a	Analyze the various conditions under which Reengineering works better.	08
	b	With the help of suitable examples display different levels of BPR attainment with respect to process quality design.	08
		OR	
4	a	Draw a typical flow of inputs converted to outputs through a process, with the focus on measures of process effectiveness.	08
	b	Highlight some of many processes involved in accomplishing operational functions within an organization.	08
5	a	Differentiate between Data ware house and Business intelligence.	08
	b	Explain the various stages of BI and Road map of BI.	08
		OR	

6	a	With the help of a block diagram explain the business intelligence system architecture.	10
	b	Mention the various applications of data mining.	06
7	a	Through an illustration, explain how the EIS/ERP and SCM can be synchronized?	08
	b	Compare EIS and SCM based on several dimensions.	08
8	a	Analyze the various features of next generation of EIS software.	08
	b	Explain few of the futuristic trends in the development of EIS.	08

Operations Management

VI Semester SEE Question Papers

Industrial Engineering and Management

OPERATIONS MANAGEMENT

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

3 Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.

4 Answer FIVE full questions from Part B.

PART-A

		Give one word for the following.	
1	1.1	A group of resources performing all or part of one or more processes.	01
	1.2	The means by which operations implements corporate strategy and helps to build a customer-driven firm.	01
	1.3	The strategy that specifies the pattern of decisions made in managing processes so that the processes will achieve their competitive priorities.	01
	1.4	Determination of the process type relative to the kinds of resources needed, how resources are partitioned between them, and their key characteristics.	01
	1.5	The degree to which a resource such as equipment, space, or the workforce is currently being used, and is measured as the ratio of average output rate to maximum capacity.	01
	1.6	It is what its capacity should be for some future time period to meet the demand of the firm's customers (external or internal), given the firm's desired capacity cushion.	01
	1.7	A factor that limits the performance of a system and restricts its output (capacity).	01
	1.8	The maximum time allowed for a job / work on a unit at each station in a line assembly.	01
	1.9	The repeated observations of demand for a service or product in their order of occurrence to form a pattern.	01
	1.10	An individual item or product that is held in inventory somewhere along the supply chain, such as in a distribution center.	01
	1.11	A common forecasting practice, whereby the forecast for the nest period $[F_{t+1}]$ equals the demand for the current period $[D_t]$	01
	1.12	It is a measure that indicates whether a method of forecasting is accurately predicting actual changes in demand.	01
	1.13	The process of making sure that demand and supply plans are in balance, from the aggregate level down to the short-term scheduling level.	01
	1.14	An additional cost involved in order to expedite past due orders.	01
	1.15	The cost of lost sales and the potential cost of loosing customer to a competitor.	01
	1.16	The summation of finish time and time since job arrived at workstation.	01
	1.17	A system that translates the master production schedule and other sources of demand into the requirements for all subassemblies and components needed to produce the required parent items.	01

	1.18	A record of all the components of an item, the parent-component relationships, and the usage quantities derived from engineering and process designs.	01
	1.19	A process that details how many end items will be produced within specified periods of time and breaks the sales and operations plan into specific product schedules.	01
	1.20	The difference between the customer orders already booked and the quantity that operations is planning to produce.	01

PART-B

2	a	"Hyundai Motors Private Limited could act as both manufacturing and service provider". Justify the statement with reasons.	06
	b	Consider Amazon, whose website enjoys millions of hits each day and puts customers in touch with millions of services and products. What are Amazon's competitive priorities and what should its operations strategy focus on?	10
		OR	
3	A	How do the process strategy decisions of Flipkart and Burger King differ, and how do their process structures affect customer satisfaction? Demonstrate using customer-contact matrix.	10
	b	Dr. Chad is an orthodontist. He estimates that adding two new chairs will increase fixed costs by $150,000, including the annual equivalent cost of the capital investment and the salary of one more technician. Each new patient is expected to bring in $ 3,000 per year in additional revenue, with variable costs estimated at $ 1,000 per patient. The two new chairs will allow Dr. Chad to expand his practice by as many as 200 patients annually. How many patients would have to be added for the new process to break even?	06
4	a	A young boy sets up a lemonade stand at the end of a College Street. Temperatures in the area climb at 40℃ during the summer. The intersection is near a major university and a large construction site. Briefly discuss to this young entrepreneur how his / her business might benefit from economies of scale.	06
	b	Identify an industry in which expansionist strategy has generally been followed by most firms in the past. Under which conditions will it be better for a firm to follow the wait-and-see strategy rather than expansionist strategy? Then identify a firm or an industry that has done so successfully.	10
		OR	
5	a	Take a process that you encounter on a daily basis, such as the lunch cafeteria, and identify the bottlenecks that limit the throughput of this process. Also examine the ways in which the bottlenecks can be relieved, keeping in mind – the theory of constraints.	08
	b	A company is setting up an assembly line to produce 192 units per 8 hour shift. The following table identifies the work elements, times, and immediate predecessors: i) Draw the precedence diagram. ii) What is the desired cycle time (in sec)? iii) What is the minimum number of stations required? iv) What is the balance delay of the system?	

		$Work\ Element$ | $Time\ (Sec)$ | $Immediate\ Predecessor(s)$ A | 40 | $None$ B | 80 | A C | 30 | D, E, F D | 25 | B E | 20 | B F | 15 | B G | 120 | A H | 145 | G I | 130 | H J | 115 | C, I $Total$ 720	08
6	a	Before using forecasting techniques, a manager must make two decisions about what to forecast and what type of forecasting technique to select for different items. Elucidate.	06
	b	Illustrate, with examples, all the steps involved in the judgment methods of forecasting.	10
		OR	
7	a	Chicken Palace periodically offers carryout five-piece chicken dinners at special prices. Let Y be the number of dinners sold and X be the price. Based on the historical observations and calculations in the following table, determine the regression equation, correlation coefficient, and coefficient of determination. How many dinners can Chicken Palace expert to sell at \$3.00 each? $Observation$ | $Price\ (X)$ | $Dinner\ Sold\ (Y)$ 1 | \$ 2.70 | 760 2 | \$ 3.50 | 510 3 | \$ 2.00 | 980 4 | \$ 4.20 | 250 5 | \$ 3.10 | 320 6 | \$ 4.05 | 480	06
	b	The Northville Post Office experiences a seasonal pattern of daily mail volume every week. The following data for two representative weeks are expressed in thousands of pieces of mail: Day | $Week\ 1$ | $Week\ 2$ $Sunday$ | 5 | 8 $Monday$ | 20 | 15 $Tuesday$ | 30 | 32 $Wednesday$ | 35 | 30 $Thursday$ | 49 | 45 $Friday$ | 70 | 70 $Saturday$ | 15 | 10 $Total$ | 224 | 210 i) Calculate a seasonal factor for each day of the week. ii) If the postmaster estimates, 230,000 pieces of mail to be sorted next week, forecast the volume for each day of the week.	10
8	a	Examine the stages of operations planning and scheduling for a manufacturing company.	10

	b	When does an organization opt for either chase or level strategy? Elaborate.	06
		OR	
9	a	Currently a consulting company has five jobs in its backlog. The time since the order was placed, processing time, and promised due dates are given in the following table: $Customer$ | $Time\ Since\ Order\ Arrived\ (days\ ago)$ | $Processing\ Time\ (days)$ | $Due\ Date\ (days\ from\ now)$ A | 15 | 25 | 29 B | 12 | 16 | 27 C | 5 | 14 | 68 D | 10 | 10 | 48 E | 0 | 12 | 80 Create a schedule using the EDD rule, calculating the average days past due and flow time. In this case, does EDD outperform the $FCFS$ rule?	08
	b	Consider the following two machines and six jobs flow shop-scheduling problem. Using Johnson's algorithm, obtain the optimal sequence and the makespan. $Job\ (1)$ | $Machine\ Number$: $Machine\ 1$ | $Machine\ 2$ 1 | 5 | 4 2 | 2 | 3 3 | 13 | 14 4 | 10 | 1 5 | 8 | 9 6 | 12 | 11	08
10	a	Consider a service provider that is in the delivery business, such as UPS or FedEx. How can the principles of MRP be useful to such a company?	06
	b	Consider a master production schedule for a major automobile company, such a Hyundai. Discuss the ways in which MPS is formulated.	10
		OR	
11	a	A seat assembly consists of a seat frame and a seat cushion. The seat frame consists of 4 seat frame boards. Draw the BOM (in the form of a tree structure) for 20 such seat assemblies.	04
	b	The MPS start quantities for product A calls for the assembly department to begin final assembly according to the following schedule: 100 units in week 2; 200 units in week 4; 120 units in week 6; 180 units in week 7; and 60 units in week 8. Develop a material requirements plan for the next 8 weeks for items B, C, and D. The BOM for A is shown in the following figure, and data from the inventory records are shown in the following table. **$Data\ Category$** | **B** | **C** | **D** $Lot-sizing\ rule$ | $POQ\ (P=1)$ | $L4L$ | $FOQ = 500\ units$ $Lead\ time\ (LT)$ | $1\ week$ | $2\ weeks$ | $3\ weeks$ $Scheduled\ receipts$ | $None$ | $200\ (week\ 1)$ | $None$ $Beginning\ (on-hand)\ inventory$ | 20 | 0 | 425 	12

R. V. COLLEGE OF ENGINEERING

Autonomous Institution affiliated to VTU

VI Semester B. E. Examinations April/May-18

Industrial Engineering and Management

OPERATIONS MANAGEMENT

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

8 Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.

9 Answer FIVE full questions from Part B.

PART A

1	1.1	Distinguish order winner from an order qualifier.	02
	1.2	List the three elements of product process matrix.	02
	1.3	Define utilization and write the formula to find the utilization in capacity planning.	02
	1.4	State atleast two key practical applications of the theory of constraints.	02
	1.5	Define tracking signal and write the formula to find tracking signal.	02
	1.6	With an example, distinguish between dependent variable and independent variable.	02
	1.7	Distinguish between MRP and $MRPII$.	02
	1.8	Give 2 level BOM for a ladder Back Chair.	02
	1.9	Distinguish between Backlogs and Backorders.	02
	1.10	State the two priority sequencing rules that are commonly used in practice.	02

PART B

2	a	What are the key capabilities that operations must develop to complete successfully in a market segment?	10
	b	How do the process strategies of e Bay and McDonald's differ, and how do their choices relate to customer introduced variability?	06
		OR	
3	a	With suitable examples, explain the four process choices of manufacturing process structuring.	10
	b	Define Break even analysis. A company manufactures diesel filters. Fixed cost of the company is Rs 5 lakhs and total variable costs are 40% of the sales. i) To gain a profit of Rs 50,000 what should be the magnitude of sales? ii) What is the profit gained for a sale of Rs 4,00,000?	06

4 a A copy center in an office building prepares bound reports for 2 clients. The center makes multiple copies of each report. The processing time to run, collate and bind each copy depends on among other factors, the number of pages. The center operates 250 days/yr, with one 8 hour shift. Management believes that a capacity cushion of 15% is best. It currently has 3 copy machines. Based on the following table of information, determine how many machines are needed at the copy center.

$Item$	$Client\ X$	$Client\ Y$
$Annual\ demand\ forecast(copies)$	2000	6000
$Standard\ processing\ time(hr/copy)$	0.5	0.7
$Average\ lot\ size(copies/report)$	20	30
$Standard\ setup\ time(hrs)$	0.25	0.4

06

b Explain the 7 principles of the Theory of constraints. 10

OR

5 a A company is setting up an assembly line to produce 192 units per 8 hr shift.

$Work\ element$	A	B	C	D	E	F	G	H	I	J
$Time(sec)$	40	80	30	25	20	15	120	145	130	115
$Predecessor(s)$	-	A	D,E,F	B	B	B	A	G	H	C,I

i) What is the desired cycle time?
ii) What is the minimum number of stations? 10
iii) What are the efficiency and balance delay?

b List and explain the steps involved in a systematic approach to long term capacity decisions. 06

6 a Explain the four judgment methods used to forecast. 08

b A lathe manufacturer had noted the sales invoices from January to August and noticed the sales during each month as $10, 11, 10, 11, 14, 15, 14$ and 15 units respectively. What would be his estimate of sales for September?

i) If he had followed 4 month weighted moving average(with weights $0.4, 0.3, 0.2$ & 0.1)
ii) If he has followed simple exponential smoothing with $\alpha = 0.2$ & his estimated sales for January is 11. 08

OR

7 a The forecast and the actual demand for the 6 months are given below. Compute the various forecast errors:

i) MAD
ii) $RSFE$
iii) Tracking signal
iv) MSE
v) MFE
vi) $MAPE$.

$Month$	$Actual\ Demand$	$Forecast\ Demand$
1	71	78
2	80	75
3	101	83

$Month$	$Actual\ Demand$	$Forecast\ Demand$
4	84	84
5	60	88
6	73	85

12

b Explain the patterns of demand. 04

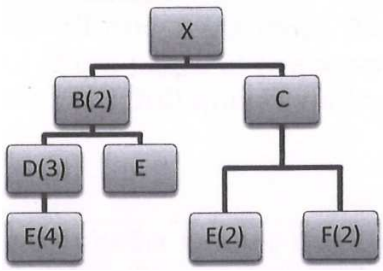

8 a Explain the time phased information contained in the inventory record. 10

b Item A is made from components B, C and D. Item B is a subassembly that requires 2 units of C and 1 unit of E. Item D is an intermediate item made from F. All other usage quantities are 2. Draw the BOM for item A. 06

OR

9 a What are the three major inputs for an MRP system? Explain with the help of a block diagram. 08

b Following is the problem of MRP. The product tree structure for end item 'X' is as follows:

i) For the product tree structure shown above find the quantities of B, C, D, E & F to assemble one 'X'.

ii) Determine the quantities of these components that will be required to assemble 200 '$X's$'. 08

10 a Explain scheduling strategies(any four). 08

b Find the best makespan using the CDS heuristic method for the following flow shop problem.

Job	M/C 1	M/C 2	M/C 3	M/C 4
1	4	3	7	8
2	3	7	2	5
3	1	2	4	7
4	3	4	3	2

08

OR

11 a Identify the performance measures that are important in selecting a schedule. 04

b Find the sequence that minimizes the total elapsed time required to complete the following tasks on two machines.

$Task$	A	B	C	D	E	F	G	H	I
$M/C\ I$	2	5	4	9	6	8	7	5	4
$M/C\ II$	6	8	7	4	3	9	3	8	11

Autonomous Institution affiliated to VTU

VI Semester B. E. Examinations April/May-17

Industrial Engineering and Management

OPERATIONS MANAGEMENT

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

10 Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.

11 Answer FIVE full questions from Part B.

PART A

1	1.1	Differentiate between process and an operation.	02
	1.2	State three principles concerning the implementation of process strategy.	02
	1.3	What is the relationship between utilization and capacity cushion?	02
	1.4	List all the steps that help managers make sound capacity decisions.	02
	1.5	What is line balancing?	02
	1.6	Draw a neat sketch to exhibit trend demand pattern with respect to quantity and time.	02
	1.7	State the two key decisions that are considered for making effective forecasts.	02
	1.8	Distinguish dependent demand from independent demand with an example.	02
	1.9	Differentiate between a backorder and a stockout.	02
	1.10	Differentiate between forward scheduling and backward scheduling.	02

PART B

2	a	Explain the differences between manufacturing and service organizations with suitable examples.	08
	b	Calculate the productivity for the following operations. i) Three employees process 600 insurance policies in a week. They work 8 hrs/day, 5 days/week. ii) A team of workers makes 400 units if a product which is sold in the market for $Rs.10$ each. The accounting department reports that for this job the actual costs are $Rs.400$ for labour, $Rs.1000$ for material and $Rs.300$ for overhead.	08
		OR	
3	a	What are the key capabilities that operations must develop to complete successfully in a market segment?	10
	b	Explain the three process strategy decisions.	06
4	a	List and explain the steps involved in a systematic approach to longterm capacity decisions.	10
	b	Define theory of constraints. How the firms operational measures relate to its financial measures.	06
		OR	

5 a A company is setting up an assembly line to produce 192 units/8hrs shift. The following table identifies the work elements, times and immediate predecessors.

Work element	*A*	*B*	*C*	*D*	*E*	*F*	*G*	*H*	*I*	*J*
Time(sec)	40	80	30	25	20	15	120	145	130	115
Predecessors	-	*A*	*D, E, F*	*B*	*B*	*B*	*A*	*G*	*H*	*C, I*

i) What is the desired cycle time?
ii) What is the theoretical minimum number of stations?
iii) Use trial and error to work out a solution and show your solution on a precedence diagram.
iv) What are the efficiency and balance delay of the solution found? 10

b List the tools used for capacity planning and explain any one in detail. 06

6 a Explain the patterns of demand. 06

b A lathe manufacture had noted the sales invoices from Jan to Aug and noticed the sales during each month as 10,11,10,11,14,15,14,15 units respectively. What would be his estimate of sales for sep?
i) If he had followed 4 month weighted moving average (with wts. $0.4, 0.3, 0.2, 0.1$)
ii) If he had followed *SES* with $\propto = 0.2$ and his estimated sales for Jan is 11. 10

OR

7 a Explain any two judgement methods used to forecast. 06

b Alpha company has the following sales pattern. Compute the sales forecast for the year 10.

Year	1	2	3	4	5	6	7	8	9
Sales (Lakhs)	6	8	11	23	29	34	40	45	56

10

8 a Explain the time phased information contained in the inventory record. 08

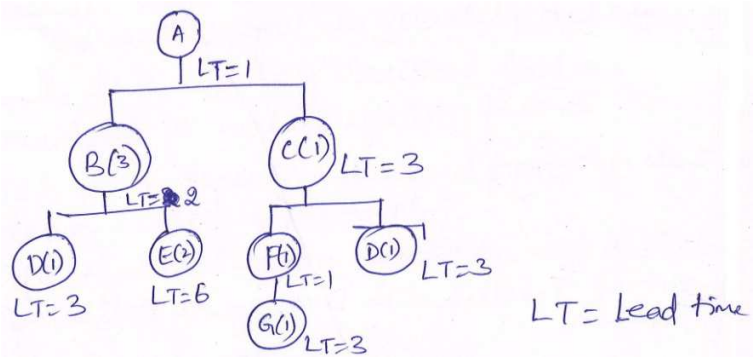

b A company has forecast the requirements for a component as shown in the table. The company maintains a safety stock of 50. Complete the *MRP*. Determine the inventory on hand at the end of period 12.

Order quantity $= 80$ *Lead time* $= 4$ *S.stock* $= 50$	1	2	3	4	5	6	7	8	9	10	11	12
Projected requirement	25	25	30	25	25	30	25	25	35	30	30	30
Receipts		80										
On hand at the end of period $= 75$												
Planned order volume												

08

OR

9 a What are the three major inputs for a *MRP* system? Explain with a block diagram. 10

	b	If there is no existing inventory and no scheduled receipts, how many units of items G, E and D must be purchased to produce five units if end item A?  Fig 9(b)	06
10	a	The following data is available with respect to 5 jobs: Job | A | B | C | D | E $Processing\ time$ | 4 | 17 | 14 | 9 | 11 $Due\ date$ | 6 | 20 | 18 | 12 | 12 Sequence the jobs using following Priority rules: i) First come first served ii) Earliest due date iii) Shortest processing time iv) Largest processing time v) Least slack. Compare $FCFS$ and SPT based on: x) Flow time y) Average number of jobs each day.	10
	b	Explain the types of schedulers. (any two)	06
		OR	
11		Consider the following problem in single machine scheduling with independent jobs. Job | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 t_j | 5 | 12 | 8 | 10 | 3 | 15 | 8 | 6 d_j | 10 | 16 | 11 | 16 | 6 | 25 | 12 | 14 w_j | 2 | 1 | 1 | 2 | 3 | 4 | 2 | 3 Obtain the optimal schedule for each of the following performance measure a) To minimize mean flow time. b) To minimize the maximum lateness. c) To minimize weighted mean flow time. Also compute $\bar{F}$, L_{max} and $\overline{F_w}$	16

V / VI Semester B. E. Fast Track Examinations July-16

Industrial Engineering and Management

OPERATIONS MANAGEMENT

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

3 Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.

4 Answer FIVE full questions from Part B.

PART-A

1	1.1	Define operations management.	01
	1.2	Differentiate between market segmentation and market needs assessment.	02
	1.3	Student tuition at a university is $Rs.100$ per semester credit hour. The state supplements revenue by matching student tuition, rupee for rupee. Average class size for a typical three credit course is 50 students. Labor costs are $Rs.4000/-$ class, material costs are $Rs.20$ per student per class and overhead costs are $Rs.25{,}000$ per class. Multifactor productivity ratio is _____.	02
	1.4	The unique resources and strengths that an organization's management considers when formulating strategy is known as _____.	01
	1.5	A strategy used by manufacturers that make products to customer specifications in low volume is known as _____.	01
	1.6	A plant manager just received marketing's latest forecasts of product A sales for the next year. The manager wants its production line to be designed to make 2400 products per week for at least the next 3 months. The plant will operate 40 hours per week. If total production time is 244 seconds. a) What should be the line's cycle time? b) What is the smallest number of workstations that the manager could hope for in designing the line for this cycle time?	02
	1.7	_____ method is a process of gaining consensus from a group of experts while maintaining their anonymity.	01
	1.8	a) Compute three week moving average forecast for the arrival of medical clinic patients in week 4.the numbers of arrival for the past three weeks were $Week$ | 1 | 2 | 3 $Patient\ arrivals$ | 400 | 380 | 411 b) If the actual number of patient/arrivals in week 4 is 415. What is the forecast error for week 4?	02
	1.9	Explain and define $CPFR$.	02
	1.10	Distinguish between Forward Scheduling and backward Scheduling.	02

	1.11	What is dependent demand and independent demand in the context of MRP?	02
	1.12	List any two examples for $FIFO$ and $LIFO$ rules of scheduling in manufacturing/service sectors.	02

PART-B

2	a	List and explain the challenges faced by operations manager in an organization to prepare for competition with global players.	08
	b	A haircut organization operates with eight haircut shops on a $250\ days/year$, $8\ hours/day$ basis. They charge $Rs.50$ for a haircut. One shop has annual fixed costs of $Rs.3{,}00{,}000/-$ and variable costs estimated at $Rs.20$ per customer. i) What is the contribution per customer? ii) How many customers per hour must the shop average in order to break even?	08
		OR	
3	a	What are the major process decisions, operations managers must consider while dealing with processes? Explain.	10
	b	Distinguish between Jobs, Batch and line processes.	06
4	a	Explain four step procedure that help managers to make capacity related decisions?	09
	b	State the seven key principles of the theory of constraints.	07
		OR	
5	a	Illustrate the two strategies for expanding capacity.	08
	b	XYZ fast foods have enjoyed considerable success by using call box ordering stations and multilane channels. It can serve 32 cars per hour in one lane of its drive thrus. Now they are planning for a new drive thru facility in a city. Market research data suggests it may have the peak hourly demands estimated below.	

	Number of cars per hour				
	$0 < 40$	$40 < 80$	$80 < 120$	$120 < 160$	$160 < 200$
Probability (% chance)	0.10	0.35	0.4	0.13	0.02
cumulative probability	0.10	0.45	0.85	0.98	1.00

		the operations manager is considering two alternatives for deciding how much capacity to install. What capacity is required to meet 85% of the estimated peak hourly demands. accommodate 110% of the estimated average demand plus a 25% allowance of growth?	08
6	a	State the conditions under which Delphi method is used and at least three disadvantages resulting from its use.	04

	b	A lathe manufacturer had noted the sales invoices from January to August and noticed the sales during each month as $10, 11, 10, 11, 14, 15, 14$ and 15 units respectively. What would be his estimate of sales for September? i) If he has followed 4 month weighted moving average (with weights $0.4, 0.3, 0.2$ and 0.1). ii) If he has followed simple exponential smoothing with $\propto = 0.2$ and his estimated sales for January is 11.	12
		OR	
7	a	What is the difference between qualitative and quantitative techniques of forecasting? When is a quantitative model more appropriate?	06
	b	The following table shows the actual sales of upholstered chairs for a furniture manufacturer and the forecasts made for each of the last eight months. Calculate CFE, MSE, MAD and $MAPE$ for this product.	10

Month	***Demand***	***Forecast***
1	200	225
2	240	220
3	300	285
4	270	290
5	230	250
6	260	240
7	210	250
8	275	240

8	a	Identify the nature and importance of the information of that MRP can provide to each of the functional areas. Explain the processing logic of MRP with a suitable example. What are the limitations of MRP?	10
	b	Explain the key inputs of an MRP system with the help of block diagram.	06
		OR	
9	a	How can the concept of dependent demand be useful to service providers?	06
	b	Enumerate the key functions of Master Production Schedule.	04
	c	List and explain the strategies used to absorb fluctuations in demand.	06
10	a	Explain the term scheduling. What are its objectives?	05
	b	How is the sales and operations planning process similar to the forecasting process?	05
	c	Explain the key differences between the FOQ, POQ and $L4L$ lot sizing rules.	06
		OR	

11	a	The following data pertains to manufacturing activity: Job, j | $Processing\ time, t_j$ | $Weight\ W_j$ 1 | 7 | 1 2 | 18 | 2 3 | 6 | 1 4 | 8 | 2 5 | 12 | 3 Determine the sequence which will minimize the weighted mean flow time of the problem. Also find the weighted mean flow time.	10
	b	What does an advanced planning system do and what are the functions of its major components?	06

Industrial Engineering and Management

OPERATIONS MANAGEMENT

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

5 Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.

6 Answer FIVE full questions from Part B.

PART-A

1	1.1	A conversion process that includes manufacturing yields _____.	01
	1.2	Decision tree analysis is helpful in solving the _____ problem of facility expansion.	01
	1.3	The capability is the rate of _____ of a facility.	01
	1.4	The _____ package is used for computerized 8inventory and scheduling activities.	01
	1.5	Master scheduling follows _____ in production activities.	01
	1.6	_____ scheduling is an approach where the customer orders are processed as late as possible so that they are finished and delivered exactly on their due date.	01
	1.7	If the sequencing of jobs is done based on increasing order of due dates, then it is known as _____ rule.	01
	1.8	Given the following data: $Week$ | 1 | 2 | 3 $Demand$ | 40 | 36 | 41 a) The actual demand in week 4 is 45. Forecast for week 4 by three week moving average is _____. b) The forecast error for week 4 is _____.	02
	1.9	The amount of time job spends in the system is _____.	01
	1.10	List the process views of a supply chain.	01
	1.11	A typical supply chain should consist of _____.	02
	1.12	The four different types of errors that are generally computed in forecasting are:	02
	1.13	Write the formula for system capacity and system efficiency.	02
	1.14	List the basic inputs for MRP.	02
	1.15	Describe scheduling.	01

PART-B

2	a	Explain briefly the process views of a supply chain.	08
	b	Explain briefly the three steps top achieve the strategic fit.	08
		OR	
3	a	Differentiate between manufacturing and service operation.	06
	b	List the different strategies in operation management for strategic management.	10
4	a	Explain design capacity and system capacity.	06
	b	Explain briefly the capacity planning strategies.	10
		OR	
5	a	Briefly explain the theory of constraints.	06
	b	List and explain the various models used in decision making related to capacity planning.	10
6	a	List the types of forecasting in decision making.	08
	b	Explain the different demand patterns.	08
		OR	
7	a	Alpha company has the following sales pattern. Compute the sales forecast for the year 10 using linear regression.	

$Year$	1	2	3	4	5	6	7	8	9
$Sales\ (in\ lakhs)$	6	8	11	23	29	34	40	45	56

10

	b	Explain the Delphi method of forecasting.	06
8	a	Explain the Master production scheduler with a flow chart showing relationship of MPS to other manufacturing planning and control activities.	08
	b	Explain materials requirements planning support your answer with an examples.	08
		OR	
9	a	Given the forecast requirements for end item y, complete MRP. Note that a scheduled receipt of 60 units is due in period 2 and a safety stock of 25 is to be maintained. Lead time $= 2$ weeks and order quantity is 60 units.	

$Week$	1	2	3	4	5	6	7	8	9	10
$Gross\ requirement$	20	20	20	30	20	20	20	25	20	35
$Scheduled/planned\ receipts$		60								
$On\ hand/at\ end\ period\ (50)$										
$Planned\ order\ release$										

10

	b	With the given product structure tree and inventory compute the net requirements for A, B, C, D and E to produce 50 units of x.	

Components	*A*	*B*	*C*	*D*	*E*
Inventory or hands on order	20	10	15	30	100

06

10	a	Given the following information set the aggregate planning problem as a transportation problem.	

Demand / Capacity	*Period* 1 500	2 700	3 750
Regular production	500	500	500
Overtime	50	50	50
Subcontract	120	120	120

		Beginning inventory = 100 units (In pounds), Regular production = 60/unit(In pounds), overtime = 80/unit(In pounds), Subcontracting = 90 per unit(In pounds), inventory carrying cost = 1 per unit period(In pounds). Back ordering is not permitted. Final inventory = 100 units.	12
	b	What is scheduling? Explain with respect to single machine concept.	04

OR

11	a	A machine operator has to perform 3 operations turning, threading and knurling on number of jobs in that order. Determine the optimal schedule and the idle times for the 3 machines.	

Job	*M/C* 1 *Turning (min)*	*M/C* 2 *Threading (min)*	*M/C* 3 *Knurling (min)*
1	3	8	13
2	12	6	14
3	5	4	9
4	2	6	12
5	9	3	8
6	11	1	13

10

	b	Consider the following single machine scheduling problem.	

Job (j)	1	2	3	4	5
Processing time (ti) hrs	4	5	8	4	10
Due date (di)	5	8	12	6	11

		Determine maximum lateness using *EDD* rule.	06

SIMULATION MODELING AND ANALYSIS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1 Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
2 Answer FIVE full questions from Part B.
3 Use of statistical tables permitted.

PART A

1	1.1	The collection of variables to describe the system at any time, relative to the objective of study is knows as _____.	01
	1.2	The activities and events occurring within a system are called as _____.	01
	1.3	_____ is the determination that a model is an accurate representation of the real system.	01
	1.4	Define system.	02
	1.5	When $C = 0$ in a linear congruential recursive relationship, it is known as _____.	01
	1.6	A sequence of random number generated must have two important statistical properties _____ and _____.	02
	1.7	The random number when generated by some deterministic process but they qualify the pre-determined, Statistics test for randomness are _____.	01
	1.8	Direct transformation method is used to generate random variate for _____ and _____ distribution.	01
	1.9	The cumulative distribution function$F(x)$ of an exponentially distributed random variable X is given by _____ for $X \geq 0$.	01
	1.10	The uniform $(20, 38)$ random variate corresponding to a random number 0.2451 is _____.	02
	1.11	Quantile – Quantile plots are plotted with _____ on x axis and _____ on y axis.	02
	1.12	_____ test provides guidance for evaluating the suitability of input model.	01
	1.13	_____ software of deneb robotics is used for robotic simulation and programming and _____ for ergonomic analysis.	02
	1.14	Arena is built on the _____ simulation language.	01
	1.15	Steady state simulation is sued to study the steady state behavior of a _____ system.	01

PART B

2	a	Explain with help of flow chart the various step involved in a simulation study.	08
	b	List the area of application of simulation. Explain any three of them.	08

OR

3 a A transport cooperation operates 15 long distance buses each with 1 driver. The cooperation has a policy of keeping 3 reserve drivers on call to replace those who report sick. If a driver is not available, the bus trip is cancelled. The probability distribution for daily number of sick driver is as follows.

Number of sick	0	1	2	3	4	5
Probability	0.17	0.25	0.23	0.15	0.10	0.10

Use montecarlo to determine the utilization of reserve drier and also the probability that at least one trip is cancelled. Use following random numbers: $91, 14, 23, 51, 84, 43, 92, 19, 49, 37, 65, 95, 89, 54, 45$. 08

b Explain the different types of simulation models. 08

4 a Explain the steps in time advance event scheduling algorithm with help of example. 08

b Determine whether there is an excessive number of runs above and below the mean for the sequence of numbers given in the following table. Use $\alpha = 0.05$

0.41	0.68	0.89	0.94	0.74	0.91	0.55	0.62	0.36	0.27
0.19	0.72	0.75	0.08	0.54	0.02	0.01	0.36	0.16	0.28
0.18	0.01	0.95	0.69	0.18	0.47	0.23	0.32	0.82	0.53
0.31	0.42	0.73	0.04	0.83	0.45	0.13	0.57	0.63	0.29

08

OR

5 a Given the following sequence of numbers, test whether 2nd, 9th and 16th number in sequence are auto-correlated where $\alpha = 0.05$

0.30	0.48	0.36	0.01	0.54	0.34	0.96	0.06	0.61	0.85
0.48	0.86	0.14	0.86	0.89	0.37	0.49	0.60	0.04	0.83
0.42	0.83	0.37	0.21	0.90	0.89	0.91	0.79	0.57	0.99
0.95	0.27	0.41	0.81	0.96	0.31	0.09	0.06	0.23	0.77
0.73	0.47	0.13	0.55	0.11	0.75	0.36	0.25	0.23	0.72
0.60	0.84	0.70	0.30	0.26	0.38	0.05	0.19	0.73	0.44

08

b The sequence of number $0.54, 0.73, 0.98, 0.11$ & 0.68 has been generated. Use the Kolmogorov – Smirnov test with $\alpha = 0.05$. To determine if the hypothesis that the number are uniformly distributed on the interval $(0, 1)$ can be rejected. 08

6 a Develop a generator for a triangular distribution with range $(2, 6)$ and mode at $x = 3$. Use $R = 0.36, 0.38, 0.89, 0.01, 0.24, 0.18$. 10

b Explain the inverse transformation technique for generation of a random variable, sampling from exponential distribution. 06

OR

7 a Lead times have been found to be exponentially distributed with mean 3.7 day generate 5 random mean times with the distribution $0.931, 0.417, 0.612, 0.079, 0.826$. 08

b Explain the factor that needs to be considered in optimization via simulation. 08

8	a	Explain the three step approach formulated by Nayler and tinger to aid in validation process.	08
	b	Records pertaining to the monthly number of job related injuries at an underground coal mine were being studied by a government agency. The value for the part 100 months were as follows:	

Injuries/month	0	1	2	3	4	5	6
Frequency of occurrence	35	40	13	6	4	1	1

		Apply the chi-square test to these data to test the hypothesis that the underlying distribution is Poisson. Use a level of significance of $\alpha = 0.05$.	08
		OR	
9	a	List the steps in the development of useful model of input data.	08
	b	Consider the following frequency table of observation on the random variable X	

Value	0	1	2	3	4
Observed frequency	24	30	31	4	4

		Based on these 100 observations, is a Poisson distribution with a mean of 1.2 an appropriate model? Perform a goodness of fit procedure with $\alpha = 0.05$.	08
10	a	Explain the factors to be considered while selecting a simulation software package.	10
	b	Differentiate between terminating and non-terminating simulation with help of an example.	06
		OR	
11	a	Explain the way by which the initialization bias in the output estimate canbe reduced in a steady state simulation.	08
	b	Explain the trends in simulation software.	08

SIMULATION MODELING AND ANALYSIS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

12 Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.

13 Answer FIVE full questions from Part B.

14 Use of statistical tables permitted.

PART A

1	1.1	The collection of entities that interact together over time to accomplish one or more goals is known as _____.	01
	1.2	A system is often affected by changes occurring outside the system. Such changes are said to occur in the _____.	01
	1.3	Simulation models that contain no random variable are classified as _____.	01
	1.4	A queuing system is described by its _____ population.	01
	1.5	_____ a variable represents simulation time.	01
	1.6	Changing simulation settings like advancing the clock and building new snapshot is called _____.	01
	1.7	_____ method produces a sequence of integers between zero and m-1.	01
	1.8	_____ tests are concerned with the testing of dependence between numbers in a sequence.	01
	1.9	The method of generating external arrival stream in simulation is called _____.	
	1.10	The important part of model assumption used in the validation of simulation is called _____.	01
	1.11	The objective of _____ simulation is to study long run behavior of the system.	01
	1.12	Sample mean and sample variance are used to estimate the parameters of a _____.	01
	1.13	The properties of random numbers are _____ and _____.	01
	1.14	In multiplicative congruential method the value of C is _____.	01
	1.15	Stochastic models in simulation depend upon _____.	01
	1.16	For evaluating the stability of a potential input model _____ test provides helpful guidance.	01
	1.17	_____ Test is used to check the frequency with which certain digits are repeated in a series of numbers.	01
	1.18	_____ simulation software is offered by the Lanner group.	01
	1.19	*ARENA* comes with the _____ analyzer and _____ analyzer.	01
	1.20	_____ Simulation software is offered by Deneb Robotics.	01

PART B

2 a Define simulation. What are the advantages and disadvantages of simulation? 05

b Explain the steps involved in a simulation study. 05

c A small grocery store has only one checkout counter. Customers arrive at the checkout counter at random from 1 to 8 minutes apart. Each possible value of inter arrival time has the same probability of occurrence. The service times vary from 1 to 6 months with the probability as given below:

Service –time distribution

Service time (minutes)	*Probability*
1	$0-10$
2	$0-20$
3	$0-30$
4	$0-25$
5	$0-10$
6	0.05

The problem is to analyze the system by simulating the arrival and service of 5 customers.

Random number for IAT: $913, 727, 15, 948, 309$

Random number for service time: $84, 10, 74, 53, 17$

Compute:

i) Average service time

ii) Probability of server being idle

iii) Average time customer spends in the system. 06

OR

3 a Explain simulation of inventory system. 08

b Given A, B and C, three independent random variables, variable A is normally distributed with $\mu = 100$ and $\sigma^2 = 400$. Variable B is a discrete uniformly distributed with probability distribution given by $p(b) = 1/5$ with $b = 0,1,2,3$ and 4. Variable c is distributed in accordance with the following table:

Value of C	*Probability*
10	0.10
20	0.25
30	0.50
40	0.15

Use simulation to estimate the mean of a new variable D, defined as $D = (A - 25B)/2C$

Use a sample size 10

Random normal number for A : $-0.84. 1.03, 0.16, 2.04, -1.34$

Random number for B : $0.24, 0.83, 0.64, 0.95, 0.06$

Random number for A: $0.18, 0.89, 0.38, 0.64, 0.04$. 08

4 a Explain the basic concepts in discrete event simulation. 08

b List the properties of random numbers. 04

c Use the linear congruential method to generate a sequence of random numbers with $X_o = 27, a = 17, c = 43$ and $m = 100$ 04

OR

5	a	Define Time-advance algorithm. Briefly explain the steps in the algorithm.	08
	b	Perform a test of uniformity using the Kolmogorov Smirnov test with a level of significance α of 0.05 for the random numbers generated. $0.44, 0.81, 0.14, 0.05, 0.93$.	08
6	a	Generate random variate for the exponential distribution that has pdf given by: $f(x) = \begin{cases} \lambda e^{-\lambda x} & , x > 0 \\ 0 & , x < 0 \end{cases}$ Use inverse transform technique.	08
	b	Generate random variate for triangular distribution which has pdf $f(x) = \begin{cases} x & , \quad 0 \le x \le 1 \\ 2 - x & , \quad 1 < x \le 2 \\ 0 & , \quad otherwise \end{cases}$ Use inverse transform technique.	08
		OR	
7	a	Apply A_R method for gamma distribution with mean 2.2 minutes and variance $2 - 10$ minutes. Generate random variates using the random numbers: $R_1 = 0.832, 0.434$ $R_2 = 0.021, 0.716$	08
	b	Briefly explain the meaning of optimization via simulation.	04
	c	Discuss in brief the steps in random search algorithm.	04
8	a	Explain the steps involved in the development of useful model of input data.	08
	b	The values for the past 1`00 months of records pertaining to the monthly number of job related injuries are as follows: $Injuries/month$ | $Frequency\ of\ occurrence$ 0 | 35 1 | 40 2 | 13 3 | 6 4 | 4 5 | 1 6 | 1 Apply chi-square test to the data to test the hypothesis that the underlying distribution is Poisson. Use a level of significance of $\alpha = 0.05$.	08
		OR	
9	a	Explain model building, verification and validation of simulation models.	08
	b	Explain the 3-step approach formulated by Naylor and Finger to aid in the validation process.	08
10	a	Explain the measures of performance and their estimation for output analysis of simulation models.	08
	b	Briefly explain output analysis of steady state simulation.	08
		OR	
11	a	List and explain the types of simulation with respect to output analysis.	08
	b	Explain briefly trends in simulation software.	04
	c	Explain the features if $ARENA$ simulation software.	04

SIMULATION MODELING AND ANALYSIS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

5 Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.
6 Answer FIVE full questions from Part B.
7 Use of statistical tables permitted.

PART-A

1	1.1	In _____ type of model one or more input variables and output variables are random in nature.	01
	1.2	Random numbers generated using spreadsheet are called _____.	01
	1.3	Differentiate between verification and validation?	02
	1.4	Consider the following sequence generated by tossing a coin 10 times: *HTTHHTTTHT*. In this example, length of the run is _____.	01
	1.5	_____ test is used to determine the significance of interval between recurrences of same digit.	01
	1.6	Random numbers have two statistical properties namely _____ and _____.	02
	1.7	Random variate for uniform distribution is given by _____.	01
	1.8	The _____ method generates random variates by adding together two or more random variables to obtain a new random variable with the desired distribution.	01
	1.9	List the standard compromises optimization via simulation makes due to existence of sampling variability.	02
	1.10	What is calibration?	01
	1.11	What is the meaning of standard statistic 'current contents' as applied to a system having items of some kind flowing through it?	01
	1.12	List the broad steps in model building.	02
	1.13	Non-Terminating simulation is alos known as _____ simulation.	01
	1.14	Optimization tool 'SimRunner' is developed by simulation software named _____.	01
	1.15	What are the Common characteristics of simulation packages?	02

PART-B

2 a What are disadvantages of simulation? How these disadvantages can be offset? 08

b XYZ spare parts company wishes to determine the level of stock it should carry for items in its range. Demand is not certain and there is a lead time for stock replenishment. For one item X, the following information is obtained.

$Demand\ (Units/day)$	3	4	5	6	7
$Probability$	0.10	0.20	0.30	0.30	0.10
$Carrying\ Cost\ (Per\ unit\ Per\ day)$	$Rs.2$				
$Ordering\ Cost\ (Per\ order)$	$Rs.50$				
$Lead\ Time\ for\ Replenishment$	$3\ days$				

Stock on hand at the beginning of the simulation exercise was 20 units. Carry out a simulation run over a period of 10 days with the objective of evaluating the inventory rule: Order 15 units when present inventory plus outstanding falls below 15 units. The sequence of random numbers to be used is: 0,9,1,1,5,1,8,6,3,5,7,1,1,2,9 using the first number for day one. Calculate total cost of operating this inventory rule for 10 days. 08

OR

3 a Name entities, attributes, activities, events and state variables for the following systems:

i) A small appliance repair shop
ii) A cafeteria
iii) A grocery store
iv) A fast-food restaurant. 08

b A company manufactures 30 units per day. The sale of these items depends upon demand which has the following distribution:

$Sale\ (Units)$	$Probability$
27	0.10
28	0.15
29	0.20
30	0.35
31	0.15
32	0.05

The production cost and sale price of each unit are $Rs.40$ and $Rs.50$ respectively. Any unsold product is to be disposed off at a loss of $Rs.15$ per unit. There is a penalty of $Rs.5$ per unit if the demand is not met. Using the following random numbers, estimate the total profit/loss for the company for the next 10 days.

Use the Random Numbers: $10, 99, 65, 99, 95, 01, 79, 11, 16$ and 20. 08

4 a What is world view? Explain three phases of activity scanning approach. 08

b Given the following sequence of numbers, test whether $4^{th}, 9^{th}, 14^{th}$ number in the sequence are auto correlated, where $\alpha = 0.05$.

0.41 0.68 0.89 0.94 0.74 0.91 0.55 0.62 0.36 0.27
0.19 0.72 0.75 0.08 0.54 0.02 0.01 0.36 0.16 0.28
0.18 0.01 0.95 0.69 0.18 0.47 0.23 0.32 0.82 0.53
0.31 0.42 0.73 0.04 0.83 0.45 0.13 0.57 0.63 0.29 08

		OR	
5	a	Provide the detailed flow chart of a typical arrival event and a departure event in a single channel queuing system.	08
	b	Based on Runs up and Runs down, determine whether the following sequence of 50 numbers is such that the hypothesis of independence can be rejected where $\alpha = 0.05$. $0.99\ 0.17\ 0.99\ 0.46\ 0.05\ 0.66\ 0.10\ 0.42\ 0.18\ 0.49$ $0.37\ 0.51\ 0.54\ 0.01\ 0.81\ 0.28\ 0.69\ 0.34\ 0.75\ 0.49$ $0.72\ 0.43\ 0.56\ 0.97\ 0.30\ 0.94\ 0.96\ 0.58\ 0.73\ 0.05$ $0.06\ 0.39\ 0.84\ 0.24\ 0.40\ 0.64\ 0.40\ 0.19\ 0.79\ 0.62$ $0.18\ 0.26\ 0.97\ 0.88\ 0.64\ 0.47\ 0.60\ 0.11\ 0.29\ 0.78$	08
6	a	What is random variate? How would you generate random variates for the exponential distribution?	06
	b	A machine is taken out of production if it fails or after 5 hours, which ever comes first. By running similar machines until failure, it has been found that time to failure, X has the Weibull distribution with $\alpha = 8, \beta = 0.75$ and $\gamma = 0$. Thus, the machine is taken out of production can be represented as $Y = Min\{x, 5\}$. Develop a step-by=step procedure for generating Y. use $R_i = 0.13;\ 0.04;\ 0.65;\ 0.79;\ 0.76$.	10
		OR	
7	a	Write the algorithm for random search.	06
	b	Develop a generator for a triangular distribution with range $(1, 10)$ and mode at $x = 4$. $R = 0.66, 0.38, 0.64, 0.87, 0.52, 0.12, 0.18, 0.22, 0.14, 0.27, 0.08$	10
8	a	Daily demands for transmission overhaul kits for the $D-3$ dragline were maintained by Earth moving Tractor Company with the following results. $0\ 2\ 0\ 0\ 0$ $1\ 0\ 1\ 1\ 1$ $0\ 1\ 0\ 0\ 0$ $2\ 0\ 1\ 0\ 1$ $0\ 1\ 0\ 0\ 2$ $1\ 0\ 1\ 0\ 0$ $0\ 0\ 0\ 0\ 0$ $1\ 0\ 1\ 0\ 1$ $0\ 0\ 3\ 0\ 1$ $1\ 0\ 0\ 0\ 0$ How are the daily demands distributed? Develop and test an appropriate model.	10
	b	Explain the methods available for obtaining information when data is not available.	06
		OR	

9	a	Consider the following frequency table of observations on the random variables X: $Values:$ 0 1 2 3 4 $Frequency$: 4 21 10 13 2 Based on these 50 observations, is a binomial distribution with $n = 6$ and $p = 0.25$ an appropriate model? Perform a goodness-of-fit procedure with $\alpha = 0.05$.	09
	b	Site an example where lead time and demand are not independent random variables. Develop a suitable model for such a case.	07
10	a	Differentiate between terminating and steady state simulation with respect to output analysis with an example.	08
	b	Mention some important points which you would consider in selecting simulation software.	05
	c	Explain the features of Arena's output analyser.	03
		OR	
11	a	Explain briefly point estimate and interval estimate as measures of performance.	08
	b	List the trends in simulation software.	08

Industrial Engineering and Management

SIMULATION MODELING AND ANALYSIS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

12 Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.

13 Answer FIVE full questions from Part B.

14 Use of statistical tables permitted.

PART A

1	1.1	Generation of artificial history of the system is called _____.	01
	1.2	Stochastic models in simulation depend upon _____.	01
	1.3	In a simulation study two types of documentation are _____ and _____.	01
	1.4	If there is already one customer in the queue and one customer in the system who is leaving, then there will be _____ number of customers in the queue at the time of the next imminent event of arrival.	01
	1.5	Random numbers are distributed _____ and independently on the interval _____.	01
	1.6	The probability distribution of a sum of two or more independent random variables is called a _____ of the distributions of the original variables.	01
	1.7	State the suggested estimators for the following distribution which are frequently used in simulation a) Exponential b) Poisson c) Gamma.	02
	1.8	_____ event is the immediate next event occurring in the system simulation.	01
	1.9	State two examples of dependence between random numbers.	01
	1.10	In a triangular distribution, if $a = 0, b = 2$ and $c = 4$, mean, mode and median are _____, _____ and _____.	02
	1.11	What do you mean by replication of runs?	01
	1.12	List the goals of validation process.	02
	1.13	_____ and _____ are two prominent examples of robust heuristics which can be applied to problems with mixed types of decision variables.	02
	1.14	Whether a simulation is considered to be terminating or not depends on _____ and the _____.	02
	1.15	_____simulation occurs when simulation models are placed in other software.	01

PART B

2 a Assuming suitable example describe the steps involved in conduction of a simulation study. 08

b Consider a continuously operating job shop. Inter arrival times of jobs are distributed as follows:

$Time\ between\ arrivals(hrs)$	0	1	2	3
$Probability$	0.23	0.37	0.28	0.12

Processing times for jobs are normally distributed with mean 50 minutes and standard deviation 4 minutes. Construct a simulation table, and perform a simulation for 8 new customers. Assume that when the simulation begins there is one job being processed (scheduled to be completed in 20 minutes) and there is one job with a 15 minutes processing time in the queue. Use the following random numbers for inter arrival times and service time respectively- $79, 39, 7, 17, 91, 99, 80, 57$ and $448, 326, 51, 73, 81, 648, 924, 267$

i) What is the average time in the queue for the 8 new jobs?
ii) What is the average processing time of the 8 new jobs?
iii) What is the maximum time in the system for 8 new jobs? 08

OR

3 a Distinguish between the following , with examples:
i) Exogenous Activities and Endogenous activities.
ii) Deterministic and stochastic models.
iii) Discrete system and continuous system. 06

b Given A, B and C as three independent random variables. Variable A is normally distributed with mean $= 100$ and variance $= 400$. Variable B is discrete uniformly distributed with probability distribution given by $P(b) = \frac{1}{5}$, with $b = 0,1,2,3$ and 4. Variable C is distributed in accordance with the following table:

$Value\ of\ C$	10	20	30	40
$Probability$	0.10	0.25	0.50	0.15

Use simulation to estimate the mean of a new variable D, defined as $D = (A - 25B)/2C$.
Use a sample size of 5.
Random normal numbers for A: $-0.84, 1.03, 0.16, 2.04, -1.34$
Random normal numbers for B: $0.24, 0.83, 0.54, 0.95, 0.06$
Random normal numbers for C: $0.18, 0.89, 0.38, 0.64, 0.04$ 10

4 a List the random number tests used in practice. The sequence of numbers $0.43, 0.70, 0.60, 0.38$ and 0.89 has been generated. Use the Kolmogorov – Smirnov test with significance level of 0.05 to determine if the hypothesis that the numbers are uniformly distributed can be rejected. 06

b Based on the length of runs above and below the mean test, determine whether the following sequence of 60 two digit random numbers is such that the hypothesis of independence can be rejected with a level of significance , $\propto = 0.05$

		0.30	0.48	0.36	0.01	0.54	0.34	0.96	0.06	0.61	0.85
		0.48	0.86	0.14	0.86	0.89	0.37	0.49	0.60	0.04	0.83
		0.42	0.83	0.37	0.21	0.90	0.89	0.91	0.79	0.57	0.99
		0.95	0.27	0.41	0.81	0.96	0.31	0.09	0.06	0.23	0.77
		0.73	0.47	0.13	0.55	0.11	0.75	0.36	0.25	0.23	0.72
		0.60	0.84	0.70	0.30	0.26	0.38	0.05	0.19	0.73	0.44

10

OR

5	a	Discuss event-to-event simulation in comparison with fixed time step simulation using a flow chart.	08
	b	What is event scheduling/ time advance algorithm? Illustrate with an example.	08
6	a	Enumerate on convolution method and direct transformation method of generating random variates.	10
	b	What is "optimization through simulation" and what is the difficulty involved in achieving it?	06
		OR	
7	a	Explain the inverse transform technique used for generating random variates of the following distributions: i) Uniform distribution. ii) Triangular distribution.	10
	b	Down time of machine is found to be gamma distributed with mean 2.2 minutes and variance 2.1 minutes. Generate a gamma distribution random variate using acceptance rejection technique. Use the following random numbers $0.832, 0.021, 0.434, 0.716$.	06
8		Records pertaining to the monthly number of job related injuries at an underground coal mine were studied by a federal agency. The values for the past 100 months were as follows:	

Injuries/month	0	1	2	3	4	5	6
Frequency of occurrence	35	40	13	6	4	1	1

a) Apply the chi-square test to these data to test the hypothesis that the underlying distribution is Poisson. Use a level of significance of 0.05. 10

b) Explain the steps in the development of useful model of input data. 06

OR

9	a	Explain the three step approach formulated by Naylor and Finger to aid in the validation process.	09
	b	Define x as the number of underfilled bottles from a filling operation in a carton of 24 bottles. 60 cartons are inspected and the following observations on x are recorded.	

Values	0	1	2	3
Frequency	39	23	12	1

Based on these 75 observations, is a binomial distribution an appropriate model? Perform a goodness of fit procedure with $\propto = 0.05$. 07

10	a	Explain “point estimation” and “interval estimation” with respect to output analysis of simulation model.	10
	b	Write a note on initialization bias in steady state simulations.	06
		OR	
11	a	Describe the trends in simulation software.	08
	b	List the factors considered when evaluating and selecting simulation software.	08

SIMULATION MODELING AND ANALYSIS

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

9 Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.

10 Answer FIVE full questions from Part B.

PART-A

1	1.1	_____ is an abstraction of reality.	01
	1.2	Instantaneous occurrence that may change the state of the system is called _____.	01
	1.3	The sequence of actions in which a simulation language performs to advance the clock and build a new snapshot is called _____.	01
	1.4	In general, chi-square test can be applied for testing uniformity of random numbers if the sample size is _____.	01
	1.5	Arena is written in _____ simulation language.	01
	1.6	Acceptance rejection technique is used to generate _____.	01
	1.7	A simulation system that runs continuously for long period of time is called _____.	01
	1.8	_____ is the first step in input modeling.	01
	1.9	_____ is the determination that a model is an accurate representation of the real system.	01
	1.10	Sim Runner works with _____.	01
	1.11	Define a system.	02
	1.12	The properties of random numbers are _____ and _____.	02
	1.13	The two parameters that are necessary to describe a normal distribution are _____ and _____.	02
	1.14	Define a run with reference to runs test.	02
	1.15	What is a convolution of a distribution?	02

PART-B

2	a	List the areas of application of simulation. Explain any three of them.	08
	b	Demand for widgets follows the probability distribution as shown:	

Daily demand	0	1	2	3	4
Probability	0.33	0.25	0.20	0.12	0.10

Stock is examined every day and if the inventory level has reached 6 units or less, then an order of 10 widgets are placed. The lead time is probabilistic and follows the following distribution.

Lead Time (days)	1	2	3
Probability	0.3	0.5	0.2

when the simulation begins, 12 widgets are on hand and no orders have been back ordered. Simulate 2 cycles of operations (Assume 5 days in a cycle).
Analyse the system and determine:
i) Average ending inventory.
ii) The number of days shortage condition occurs.
RD for lead time: $5, 1$
RD for demand : $24, 35, 65, 81, 54, 93, 81, 00, 95, 40.$ 08

OR

3 a With a flowchart explain the steps involved in a simulation study. 08

b Lead time for a stock item is normally distributed with a mean of 7 days and a standard deviation of 2 days. Daily demand is distributed as follows:

Daily demand	0	1	2	3	4
Probability	0.367	0.368	0.184	0.062	0.019

Determine the lead time demand for 2 order cycles. Use $258, 071$ as random digits to generate lead time for the two cycles and $551, 675, 530, 200, 602, 865, 916, 635, 619, 246, 671, 450$ to generate demand. 08

4 a Explain the concepts in discrete event simulation. 08

b A sequence of random numbers $0.44, 0.81, 0.14, 0.05, 0.93$ has been generated. Use Kolmogorov Smirnov test with a level of significance 0.10 to determine if the hypothesis that the numbers are uniformly distributed on the interval (0,1) can be rejected. 08

OR

5 a List the steps in event-scheduling algorithm. 05

b Use the mixed congruential method to generate a sequence of three two-digit random integers between 0 and 24 with $X_0 = 13, a = 9$ and $c = 35$. 03

c Based on the runs up and down test, determine whether the following sequence of 30 two-digit random numbers is such that the hypothesis of independence can be rejected with the level of significance $\propto = 0.05$

0.97	0.87	0.63	0.66	0.30	0.69	0.37	0.01	0.66	0.51
0.92	0.36	0.47	0.80	0.94	0.31	0.07	0.09	0.19	0.29
0.94	0.87	0.85	0.66	0.78	0.94	0.56	0.67	0.07	0.43

08

6 a What is a random variate? Explain the inverse transformation technique for generation of a random variable, sampling from exponential distribution. 08

b Consider the 30 numbers given in the table for question 5(c). Test whether the $2^{nd}, 6^{th}, 10^{th}$ and so on, numbers in the sequence are auto correlated, where $\propto = 0.05$. 08

OR

7	a	Explain briefly meaning of optimization via simulation.	08
	b	Develop a random-variate generator for triangular distribution with range $(2, 6)$ and mode at 3. Generate four values of random variates. Use $R = 0.36, 0.18, 0.89, 0.60$	08
8	a	Explain the three step approach formulated by Nayler and Finger to aid in the validation process of a simulation model.	08
	b	Records pertaining to monthly number of job-related injuries at an underground coal mine were being studied by a federal agency. The values for the past 100 months were as follows:	

Injuries/month	0	1	2	3	4	5	6
Frequency of occurrence	35	40	13	6	4	1	1

Apply the chi-square test to these data to test the hypothesis that the underlying distribution is poisson. Use a level of significance of $\propto = 0.05$. 08

OR

9	a	Explain the different steps in model building.	06
	b	The following data are available on the processing time at a machine (in minutes): $0.64, 0.59, 1.1, 3.3, 0.54, 0.04, 0.45, 0.25, 4.4, 2.7, 2.4, 1.1, 3.6, 0.61, 0.20, 1.0, 0.27, 1.7, 0.04, 0.34$. Develop an input model for the processing time.	10
10	a	List and explain the types of simulation with reference to output analysis.	08
	b	Explain the trends in simulation software.	08

OR

11	a	List the various simulation packages. Explain any three of them.	08
	b	Explain briefly point estimate and interval estimate as measures of performance.	08

COMPUTER INTEGRATED MANUFACTURING

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

10 Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.

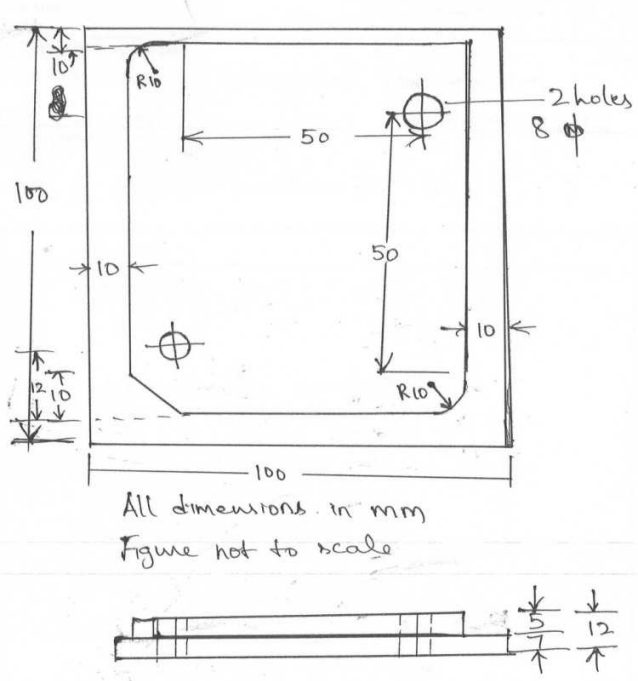

11 Answer FIVE full questions from Part B.

PART A

1	1.1	The use of computer software packages to aid in the analytical, development, costing and ergonomic problems associated with the product of design is known as _____.	01
	1.2	The different phases that a product undergoes from the conceptualization of the product until the end product reaches the customer is known as _____.	01
	1.3	The final stage of implementation of CAD system is _____.	01
	1.4	The use of computer system to plan, manage and control the operations of a manufacturing plant through direct computer interface with the production is known as _____.	01
	1.5	CNC drilling machine is considered to be a _____ controlled machine.	01
	1.6	Fixed automation is characterized by _____ rates.	01
	1.7	List the basic components of DNC system.	02
	1.8	What are two types of bar code technology?	02
	1.9	Mention any two limitations of NC machines.	02
	1.10	Name any two automation strategies that will result in reduction of scrap.	02
	1.11	Name any two types of $AGV's$.	02
	1.12	Define: i) MLT ii) Production rate.	02
	1.13	Write G/M codes for the following.	02

PART B

2	a	Define CAD and explain the role of computers in manufacturing.	08
	b	Discuss about advantages gained by the adoption of CAD and CAM.	08
		OR	
3	a	Explain the process of design characterized by Shigley.	06
	b	Discuss interaction between CAD and CAM database with the help of block diagram.	06
	c	List any four advantages of computer aided design.	04

4	a	Classify numerical control system and explain NC positioning system.	08
	b	What are the advantages and disadvantages of DNC?	08
		OR	
5	a	Explain: i) Canned cycles ii) Radius and length compensation.	06
	b	Write a manual part program for the following component. Assuming missing data suitably. 	10
6	a	Define automation. Why is automation necessary? Explain how automation strategies improve productivity.	08
	b	Draw a neat sketch of information processing cycle and explain its functions.	08
		OR	
7	a	A machine shop has 3 machines producing same part. The shop operates 14 shits per week at an average of 7 hrs/shift and average production rate of each machine is 20 units per hour. i) Determine the production capacity per week. ii) If the availability of the machine is 95% and the utilization of the machine is 85%, find the expected plant output.	05
	b	Write a note on buffer storage in production.	05
	c	A rotating work table is driven by a geneva mechanism with 5 slots. The driver rotates at 25 rev/min. Find i) Cycle time. ii) Available processing time. iii) Indexing time or repositioning time.	06
8	a	With sketches, explain any two types of automated assembly systems.	10
	b	Write a note on multi station assembly machines.	06
		OR	

9	a	Explain $AGV's$ applications.	06
	b	Explain with a neat diagram, the elements of parts delivery system at an assembly work station.	10
10	a	With a suitable block diagram, explain retrieval type of $CAPP$. How is it different from generative type of $CAPP$.	10
	b	Discuss three selection criteria for CAD/CAM implementation.	06
		OR	
11	a	What is FMS? Explain the components of FMS.	10
	b	Explain the application of bar code technology and use of bar code reader in industrial scenario.	06

Instructions to candidates:

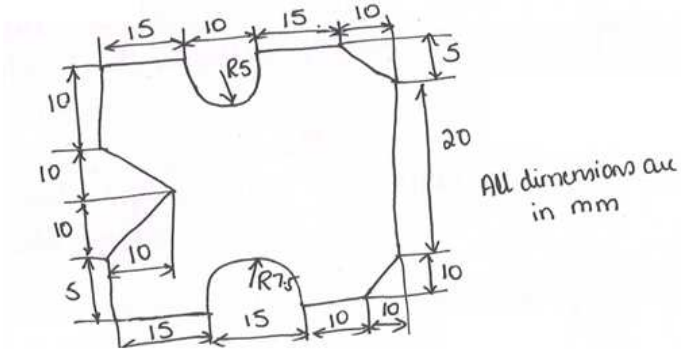

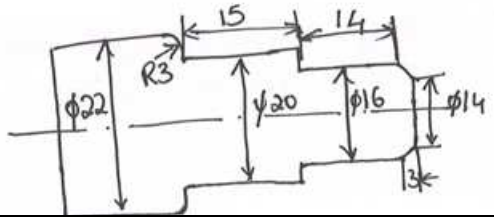

3 Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.

4 Answer FIVE full questions from Part B.

PART-A

1	1.1	General codes are also called as _____.	01
	1.2	In insert nomenclature $TNMG110408.T$ & 04 stands for _____ & _____.	02
	1.3	What are the different information flows that are followed in an industry?	02
	1.4	High initial investment for custom engineered equipment and high production rate are typical features of _____ type of automation.	01
	1.5	Asynchronous transfer system is also known as _____ & _____ system.	01
	1.6	Draw the part drawing which was turned on a lathe using following part program. $GO1\ X15$ $GO1\ Z-20$ $GO3\ X20\ Z-25\ R5$ $GO1\ Z-35$ $GO1\ X25\ Z-40$ The program is written in absolute system. The largest diameter of the part is $25\ mm$.	02
	1.7	List the two approaches used in computer aided process planning.	02
	1.8	Operation time for machining operation is composed of three elements, the actual machining time, _____ & tool handling time per work piece.	01
	1.9	Define product flexibility.	02
	1.10	State the difference between home zero and machine zero.	02
	1.11	What kind of attenuation would you recommend for manufacturing of: i) Cement ii) Light bulbs.	02
	1.12	A total of 800 shafts must be produced in the lathe section of the machine shop during a particular week. Each shaft is identical and requires a m/c cycle time $T_C = 11.5\ min$. all of the lathes in the department are equivalent in terms of their capability to produce the shaft in the specified cycle time. How many lathes must be devoted to shaft production during the given week; if there are 40 hs of available time on each lathe?	02

PART-B

2	a	The process of designing is characterized by shigley as an interactive procedure which consists of six identifiable steps. Elaborate. Support your explanation with a block diagram.	10
	b	Explain briefly the two categories of CAM.	06
		OR	
3	a	With the help of block diagram, explain the procedure for creating the database in a manufacturing system.	08
	b	List the benefits and advantages of CAD/CAM.	08
4	a	Explain the different types of NC motion control systems.	06
	b	Write the manual part program for the component shown below. 	10
		OR	
5	a	Derive the equations of manufacturing lead time for the following situations: i) All operation time, setup times and non operation times are equal. ii) For job shop in which batch size is 1.	06
	b	Write the manual part program for the component shown below. 	10
6	a	With the help of block diagram, explain the information processing in manufacturing environment.	10
	b	Discuss the two important reasons for the use of buffer storage zones.	06
		OR	
7	a	Define an automated flow line. Discuss any one type of automated flow line with a neat block diagram.	08
	b	Explain the automation strategies that are employed to improve productivity in manufacturing operations.	08

8	a	List and explain any two types of automated assembly systems.	08
	b	Elaborate on the four main components of an automated guided vehicle.	08
		OR	
9	a	With the help of neat sketch explain different components in part feeding devices in an automated assembly system.	10
	b	Write a note on the following: i) $AGVS$ pallet trucks ii) $AGVS$ fork lift trucks.	06
10	a	Explain the functions of material handling and storage system in an FMS.	06
	b	Illustrate the generative $CAPP$ system of automated process planning with the components needed in it.	10
		OR	
11	a	If CAD/CAM system is required for a company; what is the general procedure and guidelines that are to be followed for the implementation of the system.	08
	b	Explain the two types of Barcode technology used for shop floor control in manufacturing industries.	08

VI Semester B. E. Examinations April/May-17

Industrial Engineering and Management

COMPUTER INTEGRATED MANUFACTURING

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

1 Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.

2 Answer FIVE full questions from Part B.

PART A

1	1.1	Categorize the applications of CAD/CAM into two broad areas.	02
	1.2	Identify the type of production activity generally carried out in the manufacturing of prototypes, aircraft and other such equipment.	02
	1.3	What is meant by Part program manuscript in the context of numerically controlled manufacturing?	02
	1.4	What is meant by Direct Numerical Control?	02
	1.5	Mention the two categories of automated elements of a typical production system.	02
	1.6	List the subsystems of a typical automated assembly system.	02
	1.7	Identify the two main reasons for the occurrence of partially automated production lines in industries.	02
	1.8	Distinguish between Dedicated Flexible Manufacturing System and Random-order Flexible Manufacturing System.	02
	1.9	Identify the four reasonable tests of flexibility in an automated manufacturing system.	02
	1.10	Distinguish between width modulated and height modulated bar code symbologies.	02

PART B

2	a	Illustrate the relationship among four types of production in terms of product variety and production quantities.	08
	b	"The process of designing something is characterized by Shigley as an iterative process". Justify the above statement.	08
		OR	
3	a	Illustrate the relationship between CAD/CAM database and design and manufacturing in a typical production oriented company.	08
	b	Analyze the application of computers for various design related tasks.	08

4	a	Explain the three basic components of an operational numerical control system.	08
	b	Discuss with relevant sketches, the basic types of numerically controlled motion control systems.	08
		OR	
5	a	Elaborate on the functions and advantages of Direct Numerical Control Systems.	08
	b	Explain different components of Direct Numerical Control Systems.	08
6	a	Explain different levels of automation and control in a typical manufacturing environment.	08
	b	Critically review the strategies for automation and production as advocated by M.P.Groover.	08
		OR	
7	a	Classify the system configurations in automated production lines. Also write a brief note about each.	08
	b	Evaluate the reasons for incorporating storage buffers in automated production lines.	08
8	a	Explain the hardware constituents of a typical parts delivery work station.	08
	b	Illustrate the principal physical configurations of Automated assembly systems.	08
		OR	
9	a	Explain the principles that can be applied in product design to facilitate automated assembly.	08
	b	Identify the three categories of automated guided vehicles. Explain the applications of each of the categories.	08
10	a	Discuss the types of work stations commonly found in an *FMS* environment.	08
	b	Explain the functions of material handling and storage systems in an *FMS* environment.	08
		OR	
11	a	Explain briefly different methods used to collect data from the shop floor.	08
	b	Distinguish between the features of retrieval and generative approaches to computer aided process planning.	08

Autonomous Institution affiliated to VTU

VI Semester B. E. Examinations April/May-16

Industrial Engineering and Management

COMPUTER INTEGRATED MANUFACTURING

Time: 03 Hours ***Maximum Marks: 100***

Instructions to candidates:

7 Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.

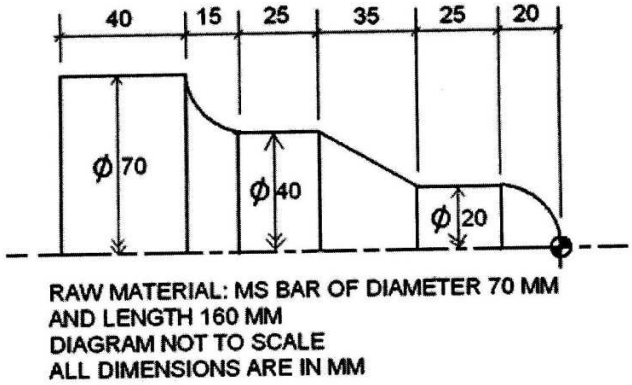

8 Answer FIVE full questions from Part B.

PART-A

1	1.1	Define CAD/CAM.	02
	1.2	State two reasons for using a computer aided design system to support the engineering design function.	02
	1.3	List three basic components of an NC system.	02
	1.4	In part programming, G and M codes represents _____ and _____ functions.	02
	1.5	List different types of automation.	02
	1.6	Classify automated assembly systems by their physical configurations.	02
	1.7	Define rotary indexing machine of a automated flow line system.	02
	1.8	List the concepts and technologies that can be included in an FMS.	02
	1.9	Computer Aided Process Planning consists of _____ and _____ systems.	02
	1.10	What is bar code reader?	02

PART-B

2	a	Explain with a neat block diagram of a product cycle with the emphasis on CAD/CAM.	08
	b	Explain with a neat block diagram the general design process of CAD/CAM.	08
		OR	
3	a	Explain the fundamental reasons for implementing a computer aided design systems.	08
	b	Explain the following applications of computer for design. i) Geometric modeling ii) Engineering analysis iii) Design review and evaluation iv) Automated drafting	08
4	a	Explain at least four advantages and four disadvantages of Numerical Control machines.	08
	b	Explain the following block format of the CNC programming: $N135\ G01\ X1.0\ Y1.0\ Z0.125\ F5.0$	08

		OR	
5		Write the part program for turning operations using G and M codes for the following:  RAW MATERIAL: MS BAR OF DIAMETER 70 MM AND LENGTH 160 MM DIAGRAM NOT TO SCALE ALL DIMENSIONS ARE IN MM Fig 5a	16
6	a	Define automation and list the reasons for automation.	08
	b	A production machine is operated $65 hr/week$ at full capacity. Its production rate si$20 units/hr$. During a certain week, the machine produces 1000 good parts and was idle the remaining time. i) Determine the production capacity of the machine ii) What was the utilization of the machine during the week under consideration?	08
		OR	
7	a	Provide a brief note on automated flow lines to meet the objectives of the use of flow line automation.	08
	b	Enumerate different rotary transfer mechanism and explain anyone with a neat sketch.	08
8	a	Explain with a neat diagram the elements of parts delivery system at an assembly workstation.	12
	b	Classify the automated assembly systems.	04
		OR	
9	a	Explain different types of material handling equipment and illustrate them with example.	12
	b	List the applications of Automated guided vehicle systems.	04
10	a	Provide a brief note on the retrieval and generative type computer aided process planning.	10
	b	List the benefits of computer aided process planning.	06
		OR	
11	a	What is an Flexible Manufacturing System and explain the components of Flexible Manufacturing System.	10
	b	Discuss a typical shop floor control system.	06
